3304	Cuskin	Peter	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the</p>

				lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 3 7	John	Petrie		Objects to proposed housing allocation at West Park. Despite numerous developments over the years, the area has still retained a unique atmosphere because of West Park. Park has been used for recreation for generations. Retraining the park enhances natural and historic environment and the quality and local distinctiveness of the built environment.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 8 3 7	NP	Petrie		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 2219	Fiona	Peeverley		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			<p>Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 4 1 4	E	Phillips		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

5 2 4	Jeroen	Pichal	Objects to Policy SA2 (South Sunderland Growth Area). Objects to Policy SA3 - all housing release sites. Objects to Policy SA4 - safeguarded land. The Council are basing their plans on flawed reports. The proposals are in favour of developers profits with disregard to the interests and wellbeing of the public.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base.
2 2 7 2	J	Pickard	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The

					noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1120	George Antliff	Pickering		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
13	Stephanie	Pickering		Supports the development of the Former Vaux site but is opposed to the Southern Area Playing Fields. Believes that the pitches are protected and cannot be built on. The pitches are used constantly by both adults and children. Council is contradicting itself by promoting health aspects but then taking away pitches. Overall of loss of pitches will be greater than 6. Although there is other open space in the area it is not possible to play football on them. Publicising the drop in events has been poor. The local infrastructure will never cope with all these additional homes plus the growth that Durham is proposing nearby. Should be building on brownfield sites before Green Belt. Questions why Washington needs more houses when the population is not expected to increase.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss. The Council has sought to ensure that consultation on the Core Strategy and Development Plan is as open as possible and have gone beyond the legal requirements to ensure that the consultation was fair, transparent, proportional, effective and inclusive. The Consultation was in accordance with the legal requirements prescribed by the Town and Country Planning Regulations 2012 and the Council's Statement of Community Involvement.
3996	Kathleen	Pickering		Cannot understand the Stephenson car park attached to Hetton Lyons Country Park being considered suitable for a gypsy transit site. Existing temporary caravan sites at Herrington Country Park and Seaburn Camp would be more suitable as already accommodate caravans, or the Houghton Council Depot. No possibility for extending Stephenson's car park if necessary in future. Where would the travellers graze their horses? Hetton Lyons Country Park is one of 5 in Sunderland with Green Flag status. If car park taken away then school children would have difficulty accessing as would have to use more dangerous Down Pit Lane. Car park is well used, not under used, need more car park space not less. Proposed site would making raising the Country Park's profile more difficult " been	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

			<p>successful bringing large community events like Dragon Boat Race and Summer Festival. Hetton Angling Club use the car park the most, if not available then roadside parking near Stephenson's Lake would add to traffic problems on B1285. Transit site would be disastrous for wildlife " water voles (protected species) in a water course just yards from the car park, any toxic element (chemical toilets) getting into the water course would have a damaging effect. Also feed into the fishing lake, Blossom Pond, Lyons Lake and then Hetton Bogs (Local Nature Reserve and SSSI). If chosen, this site will affect the character of the immediate area (the Country Park and its access), houses and business nearby " should not do so in Policy H6(5-vi). Also another section of the Country Park under consideration as an extension for travelling showmen - grossly unfair. Petitions being signed by the Hetton community. Ambiguities in the Core Strategy Development Plan Gypsy and Traveller Site Assessment Report Re. para.4.7 " rather vague, are unauthorised encampments one or a number of caravans? No evidence for the number of plots, why have travellers not been surveyed? How many reside in bricks and mortar houses? How do you know who are legitimate travellers? How can you assess how many plots needed when it varies? Travellers use social media to publish when there's a site available, so more will come than anticipated. Re. selection process (para.6.2) " error as Hetton Lyons Country Park is green space, not Green Belt; access to health facilities and schools contradicted and not crucial in site conclusion; avoiding adverse effects on occupiers' wellbeing and not detrimental to the city's regeneration is discrimination against the public losing access to the country park; Stephenson's Lake car park floods in certain areas; would class Hetton Lyons Country Park as a natural sensitive area as it is green space with protected water voles in the water course by the car park; live/work lifestyle shouldn't apply why travellers will only be staying up to 7 days. Re. site conclusion (p.11, para.7.22) " are you suggesting losing or re-routing pedestrian access to the Country Park, horse access via the bridle path and cycle access via a designated cycleway? Re. Site Assessment Schedule (site 94) " there are so many negatives in this conclusion I cannot understand why it was selected as a possible site. Re. Proposed Vision - Sunderland 2033 report (PBA) " dispute the statement about a green infrastructure network and improving green open space as you are proposing to hinder access to a green open space for residents and visitors to Hetton Lyons Country Park by making the car park a transit site for travellers.</p>	
2 4 2 2	David	Pickup	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 2 8	Ann-Marie	Pitcairn	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1809	K	Pleasants	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

				and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2 2 2 3	J M	Plempner	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 					<p>the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2400	Christopher	Plowe		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to</p>

			<p>impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. 4 1	Catherine	Polley	Supports the development of the Former Vaux Site and the South Sunderland Growth Area Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 5 0 6	Stuart	Porthouse	<p>Opposed to the proposed Housing Release Site at West Park on the grounds that it is a well-used amenity space and if removed would leave the area further depleted of open space, additional pressure would be placed on existing schools, roads and GPs. Makes reference to the Inspector's report from the 1984 Public Local Inquiry.</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>
1 6 9 4	M	Portsmouth	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any</p>

					potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 4 4	L	Potter	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.		The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. 2081	Anthony	Prendercast		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2075	Sarah	Prendercast		Objects to Policy SA3 site HRS12 (Penshaw). 3003	Christopher	Price		Letter in opposition/objection to the development outlined in section HRS12 of the City of Sunderland Core Strategy and Development Plan (land adjacent to Herrington Country Park, Penshaw) I am objecting to this development for the following reasons: Increase in the volume of traffic on an already overstretched road system. Increased noise and traffic if the development goes ahead. Increased strain on local services such as doctors, schools and sewerage. There are already brown field sites within the City that could be developed before building on the greenbelt. This development will encroach upon the greenbelt that maintains the identity and distinctiveness of former coalfield communities of Shiny Row, Herrington and Penshaw. The land will be lost forever therefore rare flora and fauna will be lost. Objects to	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 4018	John	Price	Hetton Town Council	Notes many residents didn't receive consultation documents, several areas omitted. Encloses responses outlining individual objections comments from residents and community groups. Attaches copies of letters individually submitted by Cllr D Wallace and Peter Reed of NETS in Hetton Lyons Industrial Estate re. effect travellers may have on his adjacent business and property. Main concern raised by residents relates to proposed travellers stopping area on the public car park at Hetton Lyons Country Park's Colliery Lane entrance. Members concerned at not being made aware/briefed of the proposals to advise residents accordingly. Concerns about loss or interference with public use and access of the valued Hetton Lyons Country Park as a major recreational facility and attraction with purpose-designed facilities for angling, cycling and national cycle-cross events. Locating a travellers site is inappropriate and unsuitable, detrimental both to the facility and environment - see reasons identified in meeting minutes and many individual comments. HTC Members recorded following comments in meeting minutes: many residents didn't receive information; lack of any evening drop-in consultation sessions; concern evident by many residents and community groups completing response forms and campaigns mounted; most concerns at unsuitability of Hetton Lyons Country Park site for travellers, problems of noise, environmental vandalism, waste fly tipping, toilet facilities and detrimental to Green Flag site; concern that Cabinet report inaccurately referred to the area as "Hetton Ponds" and not describing the valued country park amenity; residents comments that travellers site would be detrimental to nearby new housing development and local businesses on Hetton Lyons industrial estate; many residents had written to local MP Bridget Phillipson to gain her support in opposing the travellers site plan; HTC formally oppose proposal for a travelling community overnight stop off site at Hetton Lyons Country Park. Members also concerned that Hetton district had >700 new homes in recent years on several new development sites, some on greenfield sites, and that enough land been lost to development so don't wish for any further developments. Reasoning that existing road network congested and can't cope with traffic increases (contrary to developers reports) - funding of the much needed Central Route bypass road would eliminate the traffic congestion and improve current road safety concerns. Other comments: renovate long term empty homes, address acute need for appropriate properties for elderly, encourage and stress need to develop brownfield sites before precious greenfield areas. need policy to deal with blight of empty properties/private lettings. Put road infrastructure in place first to enable business development opportunities. Support Leechmere and Hendon sites for travellers.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
229	Claudine	Price		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks

2				<p>and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
3 1 3 1	Malcolm	Price		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
2 7 8 4	Christopher	Price		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

					and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 4 0 6	Julie	Price		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. 3 0 1 1	Christopher	Prise		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
3 0 1 3	Jane	Prise		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 					within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
5 1	Andrew	Proctor	family	Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers. Believe that house prices will fall	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 7 1	Mavis	Proctor		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 7 9	Angela	Proud		Objects to Policy SA3 - site HRS7 (Southern Playing Fields). Concern over impact on traffic, schools and medical facilities. No public transport links close to site. Loss of green belt land and sporting facilities would be detrimental to the area.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
6 7 6	Joseph	Proud		Objects to Policy SA3 - site HRS7 (Southern Area Playing Field). Objects to loss of green belt and sports facilities. There is a covenant allowing sports use only. Concerns over additional traffic, noise and pollution. Impact on local schools and medical facilities. Loss of views. Site only chosen because more desirable to developers. No public transport near site. Plenty of sites closer to Washington available. Loss of green belt should not be considered where there are other sites available, such as previous industrial or residential land.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. 2 7 5 8	David	Prudhoe		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 7 3 2	Amy	Purvis		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 2 9	Joseph	Purvis		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 1 5	Matthew	Pye		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess

				capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
8 2 4	Thomas	Pyeall		<p>Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.</p> <p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

2 4 8 6	Helen	Quinn		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 			be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
8 2 6	Thomas	Race	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 9 7	George	Race	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 3 5 3	D	Rae	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the

				<p>village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2892	Ian	Ramsay	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
180	Joanne	Ramshaw	Object to Policy SA3 (sites HRS1-3). Object to loss of greenfield land around village which will affect the look of the village. It will also increase traffic to existing narrow roads. School is already full - new children cannot be accommodated at school. Once the developments take place the character of the village will be changed forever.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be

				altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
3 8 8	Katherine	Ramshaw	Objects to Policy SA3, site HRS12 (Penshaw). Specifically object to: impact of protected species that use the site (including skylarks and lapwings); increase in traffic volume; strain on schools and doctors; loss of views. Concern that brownfield sites are not being prioritised before Green Belt.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3295	Joanne	Ramshaw	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 2 7 9	Wills	Ramshaw	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.		The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 9 5	Jason	Ramshaw		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

4 2 8 1	Yvonne	Ramshaw		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 9 1	Anne	Rankin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised</p>

					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1520	Simon	Reay	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. 2150	Christopher	Reay		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

4048	Edith	Reay		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
56	Christina	Reddel		Opposed to the Housing Release Site on land adjacent to Herrington Park as it will spoil views, join up the villages, cause traffic issues and local services would be unable to cope.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
282	Stephanie	Reddel		Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park as feels that the proposed housing is unnecessary as new builds are struggling to sell and will change the character of the area. Additional traffic will cause more congestion on local roads. Views will be ruined.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register

				A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 1 8 6	Ernest	Redman		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. 4 0 9 1	Robert lee	Redman		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 7 2	Elizabeth	Redshaw		Objects to Policy SA3 site HRS11 (West Park). Specific objections relate to: withdrawal of covenant; loss of quality greenspace; increased traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1	John	Reed		Opposes travelling community transit/stopover site at Stephenson	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further

1 3 8				Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Specifically opposed to detrimental effect that site would have on using park as a venue for cycle racing events- this car park is only tarmac car park available, and also the main access point to facilities within the park. Park is also a key location for triathlon and equestrian events. It would jeopardise future events in the park.	consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 8 9	Judith	Reed		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 3 2	Jordan	Reed		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a

				contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
6 1 6	A	Reed	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 2 0 6	M	Reid		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
7 8 4	James	Reid		<p>Supports the proposed development of the Former Vaux Site however believes that it should not be relied upon as part of the immediate housing supply due to given the uncertainty of its viability. Supports the proposed Housing Release Sites at George Washington Pitch and Putt, at Ferryboat Lane and the Safeguarded</p>	<p>Support noted. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base.</p>

			<p>Land. Supports the site at George Washington Pitch and Putt on the grounds that Washington is a sustainable location being close to major centres which are accessible on the strategic road network and has a series of local centres, good education facilities and employment opportunities. The site would perform a logical extension to Washington and no longer meets the Green Belt criteria. With regards to the site at Ferryboat Lane, believes that the site is a sustainable logical extension of Sunderland's urban area and its development would have limited impact on the landscape. With regards to the Safeguarded Land, believes that this designation restricts the development potential of the land and have a vision to deliver a sustainable urban extension to Washington. A Masterplan Framework has been prepared that assesses the key site constraints and opportunities and sets out clear design principles for a masterplan. Having reviewed the Local Plan they ask that the following be considered: 1. Housing numbers should be reviewed and increased 2. The location of new housing should be reconsidered to reflect market delivery realities. 3. The spatial strategy should be reviewed to give greater priority to Sunderland and Washington. 4. The Safeguarded Land should be allocated for development rather than safeguarded. 5. Further land to the north should also be released from the Green Belt to meet longer term development needs.</p>	
1 8 7	Liz	Reid	<p>Opposed to the proposed Housing Release Sites at Springwell and asks a number of questions. including why the Council is pressing ahead while the government is issuing new methodologies for calculating housing numbers? Why is Green Belt land being considered? No more Green Belt land should be considered for deletion considering the amount needed for IAMP. Material used for consultation is not very clear. Why hasn't other Green Bet land being considered, why only Washington? Believes that more development will happen once developers have started on site and that such small numbers of houses can be provided on sites elsewhere.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an on-going national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an</p>

				Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
3 1 8 3	Rebecca	Reid	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 5 6	Anne	Rennie	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that brownfield sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government’s proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that</p>

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 2 3 4	Carol	Rennie	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

2 7 0 5	Yvonne	Renwick	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 7 0 3	Derrick	Renwick	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 7 2 5	M	Renwick		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 3 7	Stephen	Reynolds		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 5 9 7	Eleanor	Reynolds		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 6	Zoe	Richards		Opposed to the proposed Travelling Showpeople sites and the Gypsy and Travellers site at Hetton Lyons. Would spoil an area used by families and dog walkers and would no longer feel safe in the area.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
3 6 7 7	Daniel	Richards		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 7 6	Mark	Richards		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 7	Kellie	Richardson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 8	David	Richardson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 5 1	C	Richardson		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups. 				young people and local scout groups.	
1 4 9 8	K	Richardson		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

2	Mal	Richardson	Opposes travelling community transit/stopover site at Stephenson		Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further

3 5 1				Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9	Gail	Richardson		Is opposed to all of the proposed Gypsy and Traveller sites	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 7 4	J	Richardson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 5 3	Kimberley	Richardson		Objects to Vaux site, all 4 SSGA sites, all 15 HRS sites, all Travelling Showpeople sites and all gypsy sites.	The Vaux is allocated in the Publication draft for office and residential development. In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are

				sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
1703	Lee	Richardson	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution. 2914	L	Richardson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.		The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each

				development
3 2 2 8	Bill	Richardson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				development
4 1 5 2	Alan	Richardson		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.
4 4 7 3	William	Richardson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being
4 5 9 9	Jacqueline	Richardson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.
4 3 0 3	Gillian	Riddell		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.
2 1 3 4	R	Riddle		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.
3 0	Lyndsey	Riddlesden		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no
				Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.
				Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
				Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
				The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the

01			<p>evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
63	Ann	Riding	<p>Opposed to the proposed Travelling Showpeople site as believe they are unsuitable on traffic grounds and too close to the existing communities. Opposed to the proposed Gypsy and Traveller site at Hetton Lyons as the car park is well used by the local community and for events being held in the park. Access to the site is via a busy road and access to this road at the Four Lane Ends is via a mini roundabout off the busy main road. Has no objection to a site being elsewhere in the area, feels there is a lot of land on the outskirts of Hetton that could be used instead of an area committed to leisure and good health promotion</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
3033	Ann	Riding	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. 6 9 6	David	Ridley		<p>Supports Vaux site. Opposes SSGA site north of Burdon Lane. Supports travelling showpeople sites. Supports 2 proposed gypsy sites at Hendon and Leechmere but opposes site at Hetton Lyons. Specifically opposes Hetton Lyons due to: impact to park use by locals and visitors to regional events; potential damage to industrial estate; impact to local businesses and local residents.</p>	<p>In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document.</p>

Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
4 1 1 8	Gail	Ridley		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

4601	Christopher	Ridley		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

1 2 7 8	Philip	Ritzema	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.		The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought.

					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 0 6	Linda	Ritzema		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

6 2 2	Linda	Ritzema	<p>Objects to Policy SA3 - sites HRS 1,2 , 3 and 4. Green belt sites should not be developed when brownfield sites are available. Concern over impact on local roads. Existing empty houses should be refurbished or redeveloped. Refurbishment or redevelopment of housing would create jobs. Plenty of service outlets already around Springwell. New houses will do the opposite of enhancing the environment. Developer wishes are being put before those of local community.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council</p>

				has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
6 2 1	Philip	Ritzema	Objects to Policy SA3 - sites HRS 1,2 and 3 (Springwell sites). Don't build on the green belt. Questions the need for more housing. The greenbelt is important to the environment. Springwell is a rural village. Impact on wildlife.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 					Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 8 7 6	Denise	Rivett		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 9 0	Allan	Robe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 1 9 6	Angela	Roberts	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

2 6 6 6	Jonathan	Roberts		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 4 5 9	Christine	Roberts		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 0 8 4	J T	Robertson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3029	David	Robertson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4097	S	Robertson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2140	Deborah	Robins		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
502	Paul	Robinson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining

			<p>accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>sustainable and viable option left is to release parts of the Green Belt. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 7 4 7	Callum	Robinson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

			<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

2181	P	Robinson	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate</p>

					any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2600	Louise	Robinson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2775	B	Robinson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft

			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified</p>

					<p>following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

1 4 1 2	K	Robson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are

					within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 6 4	Dorothy	Robson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 3	Bill	Robson		<p>Opposed to North Burdon Lane and South Ryhope sites as well as all of the housing release sites. Opposed to building on greenspace when it is not proven necessary. Building in Washington will worsen air quality, congestion and traffic risk. Existing residents will leave</p>	<p>In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure.</p>
4 5 5 0	Chloe	Robson		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the</p>

					time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
1680	Tom	Robson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3071	Pat	Robson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2860	Patricia	Robson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

			lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 8 7 3	Margaret	Robson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport</p>	

					Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 9 4	K	Rodgerson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. 4 7	Tracey	Rolfe	Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to

				designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.	
1 2 7 5	Sharon	Rose		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 			Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4093	Claire	Routledge	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3755	Jennifer	Rowan	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the

					<p>corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 6 3 6	D	Rowe	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 				contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 2 0	Julie	Rowe	Supports SSGA development at Cherry Knowle (though development should not be too close to the dene, and still concern on scale of development and impact on schools and GPs). Objects to SSGA development at Chapelgarth, Burdon Lane and South Ryhope- losing village identities with scale of development; increasing traffic- roads cannot cope; loss of countryside and impact on wildlife and walking routes. Objects to SA3, site HRS11 West Park- questions legality of proposal. Objects to loss of greenspace and loss of key gateway into city. Objects to Leechmere as Gypsy site- impact to adjacent nursing home from proximity of proposal. Objects to Hetton Lyons proposal too.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 8 2 8	Lynda	Rowe	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1083	Jade	Rowley		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1044	Marie	Rowley		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution. 3 7 5 1	Lesley	Roxburgh		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining

			<p>accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
48	Rebekah	Ruddock	<p>Support for the development of the Former Vaux Site and all of the sites of the South Sunderland Growth Area except the land to the north of Burdon Lane which is opposed. Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers.</p>	<p>The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

1007	Paul	Rushworth	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
806	David Alan	Russell	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2143	John Edwin	Russell	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has

			views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 3 6 9	Karen	Russell	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The

					Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 3 6 0	P	Sanderson		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to</p>

			<p>impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. 2 2 8 2	Joan	Saville		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for	Leechmere has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

			development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Wildlife sanctuary is located on border of site.

The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the</p>

			<p>protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. 3028	Margaret	Scanlin	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3982	Karen	Schakel	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2407	Julie	Schnieder	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
8 1 1	Peter	Schorah	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 1 2	P	Scott	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
7 8 6	John Karl	Scott	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. 1 4 2 3	Jocelyn	Scott	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			<p>services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 2 3 3	Judith	Scott	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 2 7 1 6	J	Scott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6	A M	Scott		Objects to Policy SA3 - site HRS 11 (West Park). Family has used the	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site

6 5			site for recreation for a number of years. Council have history of losing actions for short term gain, but long term pain. Would represent the loss of another gem within the city.	is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 2 9	Ann E	Scott	Objects to PolicySA3 - Site HRS11 (West Park). Concerns over traffic impact. Concern over impact on public amenity and air quality. Will destroy the attractiveness of the area. Council should honour the spirit and terms of the land transfer from the Rural District Council. Objects to proposed gypsy and traveller site at Hetton Lyons pond.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 5	Christine	Scott	Opposed to the proposed gypsy and traveller site at Hetton Lyons. Opposed to the loss of the car park and the impact it will have on the people using the park especially the angling club. Believes that it will put added pressure on the Council and people will stop using the country park. Would like to know when the Council purchased the land. Would put added pressure on local schools and GPs.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 1 4	Dionne	Scott	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
5 4	Graeme	Scott	Opposed to all of the Housing Release Sites Opposed to the proposed sites for Travelling Showpeople and the Gypsy and Travellers site at Hetton Lyons. With regards to Hetton Lyons the consultee is opposed to the site due to the impact it could have on crime in the area and antisocial behaviour and would like to know how the Police have been consulted. Would like to see how the site's suitability has been assessed with respect to Reduction of Crime and Disorder/community cohesion/social inclusion and where horses would be grazed. Does not consider the consultation to be adequate. Believes that the Council has an undertaking to proactively promote quality places that are attractive and sustainable and which contribute to quality of life, community wellbeing and local character and focus on protecting and enhancing the plan areas environmental assets, whilst allowing development in areas where potential environmental harm is minimal or can be adequately mitigated. The development of the Gypsy and Traveller site at Hetton Lyons will have a detrimental impact on the local environment for example the transfer of fuel between containers and generators as well as noise, impact on air quality and may impact on the regeneration of the area.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Council has sought to ensure that consultation on the Core Strategy and Development Plan is as open as possible and have gone beyond the legal requirements to ensure that the consultation was fair, transparent, proportional, effective and inclusive. The Consultation was in

					accordance with the legal requirements prescribed by the Town and Country Planning Regulations 2012 and the Council's Statement of Community Involvement.
3 9 6 5	Leslie	Scott		Astonished at West Park site being proposed for housing development. Description of the site fails to understand the status of this space, no recognition of playing field opened by Duke of Edinburgh in 1950s and part of the park is public amenity space given over to grazing in the summer as part of a separate legal agreement in place before the Council inherited it in 1967. Use respected by residents, especially dog walkers. Fundamental weakness of the document if such scenic and important public amenity space that defines the character of the Herrington's features in the first 3% of green belt needed to meet future development. Illogical, unnecessary and needs deleting - would be municipal vandalism.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 1 1	Leslie	Scott		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: housing need projections are estimates- margin of error throws into doubt Green Belt incursion justification; 3% Green Belt incursion yet West Park is part of this; further non-Green Belt sites should be made available instead of Green Belt; loss of greenspace/Parkland; concern about withdrawal of covenant; contrary to retention of quality landscape; loss of key gateway site; impact on local amenity; impact on local traffic; impact to school capacity; merging of Middle and East Herrington; impact on cultural identity of city.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
6 0 9	Paul	Scott		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 6 2	Robert	Scott		Objects to proposed gypsy site at Leechmere. Objects to potential disruption that gypsy families would cause in immediate proximity to businesses on industrial estate. Object to siting of site- too far away from A1 and A19 for gypsy travellers to use, and gypsies would still end up using other locations within the city.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 6 4	T E	Scott		Objects to Policy SA3 - site HRS 11 (West Park). Family has used the site for recreation for a number of years. Council have history of losing actions for short term gain, but long term pain. Would represent the loss of another gem within the city.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 0 7	Keith	Scott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

3				for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Council has adopted a tolerance policy.
4310	Graeme A	Scott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4206	Phil	Scott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3953	Katie	Scott		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106

				agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 8 3	S	Scott	Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 9 5	Karl	Scott	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 2 4 5	Christine	Scouler		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 6 0	I	Scratcher		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a

				contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 3 8 4	Hannah	Scullend	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. 4 4 7 1	Owen David	Seafield		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1 2 4	David Alexander	Seed		Objects to proposed housing on West Park. Concerns over loss of green areas. Adverse impact on local communities. Concerns over impact on wildlife and existing trees. Concerns over impact on pollution/noise/volume of traffic. Proposal conflicts with objectives to create thriving centres or protect/enhance the historic environment.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 2 6	Karen	Seed		Objects to proposed housing allocation at West Park. Does not believe building executive housing on this site will meet objective to build affordable homes where people want to live. Already lots of executive houses for sale in the area. Building on Green Belt will make area less attractive to live in. Park is well used. Concerns over impact on wildlife. Disagrees that there is insufficient land to meet housing needs in other areas. Concerns over impact on local road network. Impact on doctors and schools.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
9 5	Rachael	Seed		Opposed to the Housing Release Site at West Park. Believes that development will change the character of the area and increase pressure on local services and increase volume of traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 0 0 4	William	Seers		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 8 3	Gemma	Seery		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 8 7 0	Ella	Sewell		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. 1 1 3	Richard	Shale		Objects to proposed Housing Release Sites HRS11 and 12. West Park is a park where people can walk and children can play. Residents advised that there would be no new housing around Herrington Country Park. Schools in area already oversubscribed. Objects to all proposed travelling showpeople and gypsy and traveller sites. Concerned over who would police the sites.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 2 6 6	Norma	Shanks		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 6 4	Janet Elizabeth	Sharp		Object to Policy SA3, site HRS11. Object to loss of greenspace and site for children to play, given to people of Herrington to use for greenspace purposes. The remaining play area can only be accessed by crossing a busy road. Loss of greenspace in an area where greenspace access is already limited, and this provides relief to already built-up area, and relief from A19 and Durham Road, and reduces fumes. East Herrington Primary School will have to be enlarged. More homes in area will increase traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 3 5	Janet Elizabeth	Sharp		Objects to Policy SA3 - HRS11 (West Park). The park is used for recreation. The park gives a good first impression of the city. The A19 and A690 are busy roads generating a lot of pollution; the park acts as a breathing lung for the area. The park was gifted to the Council as a green space for people to enjoy. The proposal would create a continuous built up area from Middle Herrington to Doxford Park. Impact on local primary school. The park is a safe place for children to play.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 1 4 5	Janet Elizabeth	Sharp		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: withdrawal of covenant; loss of greenspace/recreation area; greenspace loss will stop pollution absorption; increased traffic and pollution; loss of accessible part of Green Belt; loss of grazing; loss of ancient ridge and furrow; impact on primary school; impact to village character; important thoroughfare from bus stops on A690.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 6 5	Peter	Sharp		Object to Policy SA3, site HRS11. Questions the legality of SCC altering the lease at West Park. Loss of greenspace for people to use and play. Loss of ancient farming land. Wildlife will be negatively affected. Increased traffic to area from additional housing. Local school cannot absorb all local children. Area will become too build-up. Land to the north is prone to flooding. Environment negatively affected by building on greenspaces and increasing traffic. Build on brownfield land first. City Centre needs improving.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 3 4	Peter	Sharp		Objects to Policy SA3 - HRS11 (West Park). The park is used for recreation. The park gives a good first impression of the city. The A19 and A690 are busy roads generating a lot of pollution; the park acts as a breathing lung for the area. The park was gifted to the Council as a green space for people to enjoy. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 1	Peter	Sharp		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: withdrawal of covenant; loss of greenspace/recreation area;	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be

30				greenspace loss will stop pollution absorption; increased traffic and pollution; loss of accessible part of Green Belt; loss of grazing; loss of ancient ridge and furrow; impact on primary school; impact to village character; important thoroughfare from bus stops on A690.	at odds with the recommendations set out in the Greenspace Report.
3552	Judith	Sharp		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3550	Rebecca	Sharp		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons

				<p>prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 40	D K	Sherwood-Smith		Object to Policy SA3, site HRS11 (West Park). Specifically objects to loss of parkland; kick about area; site used by wildlife; attractive	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be

8				gateway entrance to city; historic loss (ridge and furrow).	at odds with the recommendations set out in the Greenspace Report.
4 4 3	M	Sherwood-Smith		Objects to Policy SA3 - HRS11 (West Park). The park is used for recreational use. The land is archaeological significance with medieval ridge and furrow. Site contains protected species and birds. The site provides an attractive approach to the city.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 3 8 9	Gavin	Shipley		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 6 7 0	Alex	Short		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal

			<p>for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. 2 2 0 1	A	Sikora		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 9 5 8	Eileen	Sills		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. 1	George	Simpson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to:	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance

5 1 2				<p>housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register

				and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 6 0 5	Dave	Simpson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 3 0 1	Catherine	Sjorup		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the

					Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 3 0 2	John	Sjorup		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised</p>

					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 7 9 4	Greg	Skeoch	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. 4 4 6 2	Richard	Skinner	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 6 1	Laura	Skitt	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 6 2 0	William	Slassor		Objects to Policy SA3 - sites HRS 12 and 15 (Land adjacent to Herrington Country Park and Philadelphia). Against executive housing at Philadelphia, more social housing and affordable housing is needed. There is plenty of land at Pennywell to build on. Need more high skill, high wage jobs. Shiney Row only has takeaways. Deplore the loss of any Green Belt. The new housing developments will put additional pressure on schools and doctors.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A number of studies have been carried out including a Phase 1 Habitat Survey, Archaeology Study and Heritage Statement, Transport Assessment and Noise survey relating to this site and also the wider redevelopment of the Philadelphia Complex, and it is anticipated that the issues raised can be mitigated against. In particular sensitive design is needed to minimise impact to neighbouring properties and to blend with the remainder of the Philadelphia Complex development, including the Listed buildings.

2 2 5 0	Anita	Sleeman	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 1 3	Margaret	Sleeman	Objects to Policy SA3, site HRS12 (Penshaw).	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3 9 1 1	Rebecca	Sliwam		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 4 8	Terri	Sloane		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 5 7 3	M	Sloanes	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site</p>

				frameworks.	
3 8 9	Leigh	Sloanes		Objects to Policy SA3, site HRS11 (West Park). Specifically object to loss of area setting; impact on wildlife; mature trees; impact on key city gateway; increase in traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 2 9	Leigh	Sloanes		Objects to proposed housing on West Park. The park is a jewel in the crown and creates a good impression as a gateway to the city. Park is cherished by local community, allows nature to flourish and has mature trees. The city centre is rundown and should be regenerated. Questions the need for executive houses, as many are for sale. Impact on traffic and congestion. There are many other areas to develop or regenerate before considering development on West Park.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 4 4	Leigh	Sloanes		Opposed to the proposed Housing Release Site at West Park on the grounds that it would mean the loss of a valued piece of open space, it has great ecological and historical value, a gateway into the City, the City Centre is in need of regeneration, the additional air pollution caused by increase in traffic and the additional pressure that would be put onto existing roads and schools. Believes that there is sufficient executive housing and brown field sites in the area. Any jobs created would be short term.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 5 1 0	Kenneth	Slowther		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

776	Kevin	Slowther	Objects to Policy SA3 site HRS7 (Southern Area PF), specifically to the loss of playing fields and that there are other brownfield sites in Washington that could be developed instead.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites.

					<p>Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.</p>
1 4 8 6	Stuart	Small		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 3 9 9 2	Lisa	Smart		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
5 4 5	Thomas	Smith		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
5 5 7	Malcolm	Smith		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
7 2 4	Janet	Smith		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks

			<p>and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 8 9 3	Karen	Smith		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 3 8 6	Jordan	Smith		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2904	John	Smith		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 2 9 6	G	Smith		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 3 0 0	Lisa	Smith		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 1 4	Andrew	Smith		Objects to Leechmere gypsy site (Policy H6), but supports both travelling showpeople sites (also Policy H6). Concern that Leechmere site is located within a Key Employment Area, creating traffic in an already busy industrial site. This would not be a safe place for children to live, particularly due to vehicle movements. Concerns about placing of site next to vulnerable people in sheltered accommodation which would increase anxiety and stress levels of vulnerable persons. Concern that Gypsy proposal conflicts with Core Strategy EP3 (Key Employment Areas) and how this proposal could give rise to significant regeneration benefits. Also object to the potential costs that would be borne from adapting this site for such use.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 3	Douglas	Smith		Opposed to Housing Release Site at West Park. Questions the ownership of the park and believes it should remain as open space. Development would put extra pressure on existing services and infrastructure, spoil the character of the area.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 9 0	Douglas W	Smith		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to the proposed withdrawal of covenant; loss of greenspace/parkland; increase in traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 0 6 5	Eileen	Smith		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.

6 2 4	Geoff	Smith		<p>Supports Policy SA3 - site HRS12 (Land adjacent to Herrington Country Park). Pleas no access onto Chester Road. Road extension to Chiselhurst Road is essential as part of any scheme, although not clear where this would link with. Understand need for new housing and this would be a good site, with road improvements. Concern regarding impact on schools and health centres.</p>	<p>Comments noted.
