4 5 5 3	Joyce	Smith		<p>Oppose HRS11 land at West Park, Middle Herrington, as a housing site. unnecessary loss of land that is Green Belt/park/nature conservation/wildlife interest - only allocate if absolutely necessary to make up for clear shortfall in housing land. But Brexit will lower the demand due to economic and migration factors, so shouldn't put Green belt at risk in this uncertainty. UK housing market is slowing down already. alternative sites - SHLAA identifies 186 sites including West Park site 676 'not currently developable', but now being proposed as developable. But not change in status of 124 of those 186 sites that are not greenfield. Ample brownfield locations exist elsewhere in Sunderland and more effort must be made to bring those forward despite constraints before destroying precious Green Belt/park/nature conservation/wildlife interest land. amenity green space - southern part recognised as valuable in Greenspace Audit so should be retained. health and wellbeing - southern part is a popular leisure space for the community. Nearest other sites are 3km away. What improvements will adequately compensate for loss of West Park? non-designated heritage asset - northern part contains medieval ridge and furrow, historic surrounding wall and mature wooded parkland, sufficient integrity and context for special heritage value - only intact historic parkland feature in Sunderland. UK Government guidance - housing and economic land availability assessments should take account of constraints such as Green Belt, which indicate that development should be restricted and which may restrain the ability of an authority to meet its need - this Green Belt should reasonably be preserved in view of uncertainty about housing need. NPPF considerations - need alone is not only factor (para.14, 79, 110-112, 126). In view of its heritage value and context, West Park is an 'irreplaceable resource' and should be considered a 'non-designated heritage asset' and protected by NPPF section 12. Habitat Regulations - doubt about possible impact on a protected area adds to weight against West Park site. Sunderland CC WHO Healthy City designation - protection of West Park supports connectedness with the past, cultural and biological heritage. Local and Regional significance - West Park is a prominent and attractive feature at main gateway into the city, first impressions of the area would be significantly diminished. Contradiction with success of Herrington Country Park - impossible to restore the historic/cultural/heritage/environmental/wildlife substance of the</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>

				Park, so cannot be justified to lose it. Overall negative impact far exceeding positive benefits of delivering housing. Many other sites available now and will be in future with little/no environmental/historic/leisure value. Present assessments are deficient as don't take account of Brexit uncertainty.	
186	Joyce	Smith		Opposed to the proposed Housing Release Site at West Park. Believes that the proposed development would spoil the entrance into the City.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
10	Michael	Smith		Opposed to the development of the former Vaux Site unless it can be proved that all of the office space will be occupied. Opposed to the Housing Release Site adjacent to Herrington Country Park	The Vaux is allocated in the Publication draft for office and residential development. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
685	Robert	Smith		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Health and safety concerns. Impact on adjacent care home. Potential increase in crime. Objects to Policy SA3 - HRS11 (West Park). It will destroy one of the only two green fields left.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4605	W C	Smith		Oppose HRS11 land at West Park, Middle Herrington, as a housing site. unnecessary loss of land that is Green Belt/park/nature conservation/wildlife interest - only allocate if absolutely necessary to make up for clear shortfall in housing land. Contradiction with success of Herrington Country Park - impossible to restore the historic/cultural/heritage/environmental/wildlife substance of the Park, so cannot be justified to lose it. Overall negative impact far exceeding positive benefits of delivering housing. Many other sites available now and will be in future with little/no environmental/historic/leisure value. Present assessments are deficient as don't take account of Brexit uncertainty.	
4606	W C	Smith	Opposed to the proposed Housing Release Site at West Park. Believes that the proposed development would spoil the entrance into the City.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3527	Gary	Smith	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3160	David	Smith		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3641	Georgina	Smith		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. The Council has adopted a tolerance policy.
3 6 1 9	Julie	Smurthwaite		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 6 0	Jack	Snaith		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 3 4	Amanda	Snee		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 8 7	Adele	Snell		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 3 9		Snow		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. It is not suitable as it is next to private housing and an old peoples home. Concerns over littering and potential increase in crime.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 2		Snow		Objects to proposed gypsy site at Leechmere Industrial Estate. Specific concern regarding impact to local businesses, old persons home and private housing. Concern about disruption this could cause to local area and clean-up costs borne by Council.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4	Dianne	Snowdon		Supports Vaux Allocation. Supports Housing Release site allocations and Safeguarded Land allocation. Supports proposed Travelling Showpeople site allocations. Objects to proposed Gypsy and Traveller sites at Hendon and Leechmere. Supports proposed Gypsy and Traveller site allocation at Hetton.	Support acknowledged. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

6 5	John	Snowdon		Opposed to the proposed Travelling Showpeople sites and the proposed Gypsy and Travellers site at Hetton Lyons.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 9 4	Kim	Snowdon		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 0 0	Lisa	Snowdon		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 3 3	M E	Soakell		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 0 2	Ashley	Soloman		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 3 0 3	Tiffany	Souler		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 4 9 6	Ian	Soulsby	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. People would be deterred from using the park and it would have an impact on the ecological value of the area. More suitable brownfield sites that should be used instead.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. 					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 2 2	Margaret	Sparks		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 8	Anne	Sparrow		Opposed to both of the proposed Travelling Showpeople sites and the Gypsy and Traveller site at Hetton Lyons. Believes that the people of Hetton were gifted the land for leisure and recreation and that local people will no longer use the site if the car park is used.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 5 4	Joanna & Richard	Speed		Object to proposed gypsy/traveller stop-over pitches at Hetton Lyons Ponds car park, and further travellers plots in Pearson's Industrial Estate. As landowner next to this proposed site I note no additional requirements have been made to accommodate the travellers livestock (horses), which will require grazing. Nearest area is our land currently grazed by own livestock. Risk of fly-grazing is increasing issue due to transient nature of travellers, limited recourse for landowners. Fly-tipping and clean-up is costly and inconvenient disruption on privately owned land. How will these issues be addressed if the site is to be used for gypsy/travellers, with assurances for landowner that the local authority will resolve them? Proposal would remove potential space for new businesses and job creation. Council should bring economic prosperity and regeneration opportunities. Removing car park from public use would reduce ease of access by car to Hetton Park, which makes significant contribution to health and wellbeing of the community. North East has higher obesity rates, retaining full access to this asset facilitates outdoor pursuits. Increased temporary residents is inimical to Hetton's stable semi-rural community. Proposals would be detrimental to Hetton. Given controversial nature of such proposals the Council should have been more proactive consulting directly with those most affected.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 5 5	John	Speed		Object to proposed stop-over pitches next to Hetton Lyons Park, and further travellers plots in Pearson's Industrial Estate. Give consideration to relationship of sites to the surrounding community, link in with broader strategies for improving community cohesion. Removing this parking facility at Hetton Park would negatively impact on park usage and the benefits it provides. Concerned fly tipping is increasing and costs for landowner - the land we farm is adjacent to the proposed site. Noise and disturbance not taken into consideration in proposing this land - vehicles entering/leaving at all hours in a settled residential area. Proposals run counter to Council's strategies for economic prosperity and job creation, health and well-being, so detrimental to Hetton and its community. Council should have been more proactive consulting directly with those most affected given the controversial nature.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 0	Pam	Spence		Objects to the proposed site allocation for Vaux. Objects to site allocation HRS12. The site is used for keeping horses. It should be kept as Green Belt and not used for more unaffordable housing, especially when Gentoo have demolished houses and these have not been replaced.	The Vaux is allocated in the Publication draft for office and residential development. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more

					of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites.
3 8 9 1	D	Spence		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 2 6	M	Spence		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 0 9 2	Emma	Spensley		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 0 8 9	Lauren	Spooner		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 5 6	Deborah	Spoor		Object to proposed housing development on West Park, Middle Herrington. Natural beauty in a semi-rural ambience. Historical, ecological and archaeological value. The Park is the identity of Herrington, its nucleus. Area will lose its identity and attractiveness if the park is removed. Road infrastructure will have to change to accommodate increased traffic. Medieval field. Farrington Avenue did not receive consultation documents. Re. Strategic Challenges 6. building executive housing on city's peripheral routes will attract commuters, not to the city centre. Primary school already stretched. 7. park is a cultural asset, medieval and of historic and archaeological interest, accessible open space used by many for dog walking and sports. Opportunity to preserve heritage. 11. new government population projection statistics, so proposals should be halted until new statistics known. 13. green belt sites identified for	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

			housing are all on the periphery so unlikely to attract people to the centre. Make the centre a more attractive place to go to attract people. 16. parkland is not mentioned. The Park is natural, untouched and historic; evidence of medieval ridge and furrow farming, mature trees, bats, tawny owls and grey squirrels. 18. green spaces like the Park have a positive impact on mental and physical wellbeing. 19. Park is a flood risk area, drainage issues in neighbouring housing developments. 20. Park should be protected as historic environment, medieval farming preserved by grazing cattle, only one in Sunderland. 21. an open space used for recreation and gateway to Sunderland. The Park was left to the people of Herrington in perpetuity for recreation. Green Belt status is meant to protect our land - brownfield sites exist. An act of vandalism.	
4 5 5 7	Jordan	Sraggon	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Many others areas for development, no need to disturb wildlife.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
3 1 4 6	Dylan	Stafford	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

			lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 5 1 0	June	Stafford	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 8 2 4	Margaret	Stafford		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

5 2	E	Staite		<p>Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers With regards to the Leechmere site it is believed that there will be no benefit to the area, it will cause disruption, be a blight in the area and have the potential to damage local businesses. Only provide for a transient population who do not contribute to local services.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.</p>
3 0 3 5	Judi	Stammers		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

1 8 9 6	Graeme	Stammers		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 2 3 5	David	Stamp		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
9 4 4	D	Stamper		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

8 6 1	E M	Stanbridge		<p>Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 4 2 9	Paul	Steadman		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

4 4 7	Susan	Steanson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

3 0 5	Louise	Stephenson		Objects to proposed gypsy and traveller site at Hetton Lyons Pond. It is an important facility which hosts national events and links to councils aims to conserve, enhance and protect environment. Would adversely impact on accessibility of the country park. Hosts major sporting events which add to economic prosperity. The car park provides disabled access to the fishing lake.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 4	T	Stephenson		Objects to proposed gypsy and traveller site at Hetton Lyons Pond. It is an important facility which hosts national events and links to councils aims to conserve, enhance and protect environment. Would adversely impact on accessibility of the country park. Hosts major sporting events which add to economic prosperity. The car park provides disabled access to the fishing lake, changing it could contravene the Disability Act. Concern over pollution to the 3 lakes.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 1 6 2	T	Stephenson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. May cause waste going into stream and be detrimental to water/wildlife in lakes. Put people off going into park with children.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 4 9 6	Marc	Stephenson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the

			<p>protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 6 5	Andrew James	Stevens		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

2				for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Council has adopted a tolerance policy.
3 2 7 2	G	Stevens		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 4 9	James Henry	Stevens		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 4 7	Alison	Stevens		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 8 8 6	Ashleigh	Stevens		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 6 8	M	Stevenson		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 7 5 7	Ian	Stimpson	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the</p>	

			<p>protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the</p>

				development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.	
4 0 7 5	Ella	Stoddart		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 3	Keith	Stoker		Objects to proposed gypsy and traveller site at Hetton Lyons pond. It is an important facility which hosts national events and links to councils aims to conserve, enhance and protect environment. Would adversely impact on accessibility of the country park. Hosts major sporting events which add to economic prosperity.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 0		Stoker		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 6 1	John	Stoker		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 6	Keith	Stoker		Opposed to South Sunderland Growth Area sites at South Ryhope and Land North of Burdon Lane however supports the development of Cherry Knowle. Opposed to all of the proposed Gypsy and Traveller Sites	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

4 1 1 4	Ellis	Stokes		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 2 0	J	Stokes		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 2 9 1	Joanne	Storey		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons

			<p>prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 2 7 8	Jean	Storey	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Area of natural beauty for walkers.</p>	<p>Comments noted. 3 1 2 6	Joan	Straughan		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 1 9	Colin	Straughan		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 5 7 5	M A	Street		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 7 2 0	Anthony	Stringer		Supports the development of the Former Vaux Site. Opposed to the proposed Housing Release Sites at West Park and on land Adjacent to Herrington Country Park. With regards to the land adjacent to Herrington Country Park it is believed that the local infrastructure cannot support the proposal. The site has ecological value that should be protected and questions the population figures which the housing projections are based on. Green Belt should be protected and views will be destroyed. The land should be included within Herrington Country Park.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
4 3 8	N	Strong		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	Leechmere has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 6 8 0	J	Strong		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft

			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

4 2 4	David	Stubbs	<p>Supports Vaux site, opposes all SSGA sites, opposes all HRS sites and Safeguarded Site, opposes all travelling showpeople and gypsy sites. Specific comments on HRS11 West Park relate to withdrawal of covenant, traffic impact and congestion and school capacity.</p>	<p>In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan</p>

				period. Where necessary, plans should also identify ‘safeguarded land’ in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as ‘safeguarded land’. This approach is justified in the council’s evidence base. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
4 5 1 6	David	Stubbs	Object to building executive houses on West Park in East/Middle Herrington. traffic around Board Inn roundabout already horrendous - more houses will exacerbate the problem. Land is used as a park, bequeathed to the people of Herrington in perpetuity - covenant on this land. East Herrington school is full - demand for schools places for more houses cannot be satisfied. Plans should have been delivered to residents well in advance.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
7 0 9	Marc	Stubbs	Supports Vaux site. Supports SSGA site at Chapelgarth, Cherry Knowle and South Ryhope. Supports Green Belt HRS sites 4,5,6,7,10,13,14 and 15. Objects to HRS7, 9, 11, 12 and Safeguarded Land. Supports proposed gypsy site at Hendon, but opposes site at Hetton Lyons. Specific objections relate to HRS11 - loss of key gateway site and greenspace; HRS12 impact on landscape, setting of Monument and Country Park; traffic impact; school capacity; wildlife impact; brownfield sites should be developed first and avoid greenspace development.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 2241	Susan	Suddick	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			<p>Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
4 4 9	Judy	Sunley	<p>Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
3 3 8 1	David	Sunley	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has</p>

				<p>been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
5 1 9	L	Surtees	<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.</p>
2 8 8 2	Deborah	Swaddle	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

				<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1016	F	Swan		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
110	Angela	Swan		<p>Supports proposed Vaux allocation and development of Cherry Knowle site. Objects to proposed housing at Chapelgarth, North of Burdon Land and South Ryhope. Also objects to proposed Housing Release Site at Southern Playing Fields, Rickelton. Objects to all of the proposed travelling showpeople and gypsy and traveller site allocations. Concerns over potential increase in crime rates and house values.</p>	<p>In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and</p>

					defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 4 3	Fiona	Swan		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 8 3	Anne	Swann		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 8 2	Ian	Swann		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Car park is well used and provides disabled access to the fishing lake. Concern over impact on footpath/bridleway.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
148	Malcolm G	Swinburne		Opposed to the Housing Release Site at West Park. Believes that the site should remain a park as it is well used by local residents, it is a habitat for local wildlife, it has historical value, would increase traffic volumes in the area, has poor access, would change the character of the area, noise and air pollution would increase and put increasing pressure on local services. Questions the ownership of the site.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
140	Susan	Swinburne		Objects to proposed housing allocation at West Park. The site is used as a park. The park is well used for recreational use. The land was bequeathed to residents as parkland in perpetuity and has a covenant which states the land should not be built on. The site is a haven for wildlife and contains mature trees. There is evidence of medieval ridge and furrow farming within the park. Concerns about impact on local traffic and increased congestion. Increased noise and pollution. Site acts as an attractive gateway to the city. Concerns over local school capacity.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2257	Colin	Swinhoe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the

					Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 5 9	Margaret	Swinhoe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 1 0	Susan	Swinney		Objects to Policy SA3, site HRS11 (West Park). Specifically opposed to: impact on natural environment, local area character; local heritage; increased traffic, increased noise and air pollution, impact on mature trees, impact on grazing cattle. Object to fact that Council promotes site as a local park, and is used by people of all ages. Brownfield site use should be maximised. Consider development in areas outside the A19 corridor route.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 0 3 3	Richard	Tait		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status;	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.	
4 2 7 3	M	Tait		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 7 2	Julie	Tait		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 7 5	G	Tait		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 9 6	Gill	Talbot		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 1 5 9	Russell	Tapping		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 7 5	Patricia	Tapping		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

4				for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Specifically concerned that site would affect personal access into site.	Council has adopted a tolerance policy.
1 1 2 8	R	Tate		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 2 6	David	Tate	Sunderland City Council	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 6 3	Lisa	Tate		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Object to greenfield land being used for housing when there is brownfield land available.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The	

				Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 5 3 5	Luke	Taylor	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 5 5 9	Charles	Taylor		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 1 5	Sarah	Taylor		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Should be protecting wildlife in the area.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
4 5 0 7	Tony	Taylor		Opposed to the proposed Housing Release Site at James Steele park on the grounds that there may be a legal covenant restricting development of the site, noise from the adjacent road, no affordable units are proposed and that it could lead to the redevelopment of the neighbouring community centre and play area. Opposed to the proposed Housing Release site at Glebe House Farm due to the neighbouring uses and the potential conflict this may cause. Opposed to the proposed Housing Release Site at Southern Area Playing Fields due to the absence of affordable housing on the site.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are

				<p>mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, the Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss. This site has been discounted following the Green Belt Review and in response to consultation responses.</p>
3 2 5 1	Valerie	Taylor	<p>Oppose HRS 14- Offerton. The document has not fully considered the key constraints and other key constraints have been omitted. Issues with the consultation its self are set out. Issues set out and questions raised with regards sewerage plant, noise impact, dust, air pollution, appropriate access, road safety, building issues, car parking, building design and the need for new executive houses in Offerton.</p>	<p>This site has been discounted following the Green Belt Review.</p>
3 5 7 5	Julie	Taylor	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied</p>

			<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 5 7 3	Stuart	Taylor	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4305	Joan	Taylor		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3938	Lynn	Taylor		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 3 4	I	Taylor		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 6 0 7	Janet	Taylor		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 1 7 4	Steve C	Templeman	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations</p>

					of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

192	Angela	Templeman		Opposed to the proposed Housing Release Sites in Springwell Believes that there are more suitable brownfield sites that provide sufficient land to meet the City's housing need without having to use Green Belt land around Springwell. Does not believe that there are exceptional circumstances to release Green Belt sites and that the	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open

				existing roads and facilities could not support the proposed growth.	<p>countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor’s surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.</p>
199	Angela	Templeman	Springwell Village Residents Association	<p>Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Therefore the density reflects the evidence.
3 7 4 9	Andrea	Tench	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 3 6	Fiona	Tennet	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 3 6 8	Steve	Terry	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1958	Kathryn	Tew		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport</p>

					Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

At the Planning Application stage, the applicant will be required to submit a Transport</p>

					Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2170	Ashleigh	Thomas	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.	
2307	Terry	Thomas	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the	

					Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 1 0 7	Joan	Thomas		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 6	Lynn	Thomas		Opposed to the proposed Housing Release Site at West Park. Concerned that the Council are not recognising the area as a park even though listed as a park on the website. Questions the ownership of the park. Increased pressure on local roads and schools. Area has high archaeological and ecological value. Lose of recreational space and believes that it is the wrong place to build housing.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 9 9 8	Blake	Thomas		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 3 4	M	Thompson		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 7 6 8	Delice V	Thompson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			<p>services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that</p>

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 2 2 8	P	Thompson	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The	

				Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 7 3 3	Angela	Thompson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3 2 1 6	E	Thompson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 4 0 4	Anne	Thompson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 1 4	Kevin	Thompson		Object to housing plans on West Park, Herrington. Regularly use West Park (and Herrington Country Park), dog-walkers and for collecting school teaching materials. Quite a unique space where public can encounter grazing cattle in touching distance of a public road. Wrong to lose the parkland space when many suitable 'brownfield' sites, including vast areas of Pennywell and Doxford Park where road networks, services and drainage already exist and could be developed with higher quality housing like the Ford estate.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 2 6 7	P	Thompson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has adopted a tolerance policy.
69	Laura	Thomson		Support for the Chapel Garth and Cherry Knowle site in South Sunderland Growth Area. Opposed to the proposed Travelling Showpeople sites and the Gypsy and Traveller site at Leechmere. Supports the Gypsy and Traveller sites at Hendon and Hetton.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1799	Maxine	Thornley		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these

				assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to

			<p>impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 3 7 6	Judith	Thornley	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. 1 1 3 0	Sue	Thornton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 3 0	K L	Thornton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 4 0	M P	Thornton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 6	John A	Thornton		Opposed to the proposed Housing Release Site at West Park on the grounds of loss of open space and brownfield sites should be built on first. Questions the ownership of the site. If West Park is developed other parks in the city could be put at risk.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 2 5	Norma	Thornton		Supports Vaux site. Objects to Policy SA3, sites HRS7 (Southern Area PF), HRS10 (Newcastle Rd) and HRS11 (West Park) but supports HRS13 (Herrington WMC) and HRS15 (Philadelphia). Specific comment on HRS7 is objection to loss of playing fields for kids to use. Objection to HRS10 is mistaken re land at Fulwell Methodist Church. HRS11 objection relates to loss of historic parkland and loss of pleasant gateway to city.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has

				undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 4 4	Norma	Thornton		Object to proposed housing on West Park. There is enough vacant land that would be suitable for housing. The park is used for recreation. The park includes bats and owls which are protected species. Impact on local primary school. The park gives a good impression at the entrance to the city.
1 4 5	Norma	Thornton		Opposed to Housing Release Site at West Park. Believes that the site is unsuitable for housing and that additional pressure will be put on local services and roads. The area is well used for recreational purposes and that development would spoil the character of the area.
1 2 6 2	Tracey	Thorpe		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.
				The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1</p>

					Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, the Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead.
3 6 9 7	Chris	Thyer	Lambton Estate	Object to the site on the grounds of loss of amenity and social play, the ecological impacts, release of contamination, loss of playing fields.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
3 7 0 7	Chris	Thyer	Lambton Estate	Object to Fullwell on the grounds of the loss of view, impact on wider community, visual impacts on the surrounding area and impact on the listed and scheduled monument.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. Many people were concerned about the loss of the playing fields however they have not been used for at least 3 years and the Playing Pitch Plan indicates that the area is shown to have amenity greenspace levels above the City average, although further greenspace adjoins at Fulwell Quarries which supports the Carley Hill area. The loss of greenspace within the neighbourhood can be offset by the enhancement to the wider Fulwell Quarry area, which is proposed for upgrading into a country Park.
3 7	Chris	Thyer	Lambton Estate	Object to West Park on the grounds that it would change the character of the area, increase flooding, result in a loss of parks and	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be

1 3				recreation space, access would be difficult and there would be a loss of medieval ridge and furrow.	at odds with the recommendations set out in the Greenspace Report.
2 9 2 3	Terry	Tiffen		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 4 8 1	Leanne	Tiffen		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
6 1 2	Trish	Tindle		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 4 3 1	Joy	Tinkler		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 1 8	Angela	Tinkler		Objects to proposed gypsy and traveller site at Hetton Lyons Ponds. Site provides free leisure access for local residents. It is an area of deprivation and lake is one of few facilities left and valued by residents. Concerns over access to the country park from 'Lyons'	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				part of the town. Concerns over litter. Concerns over impact on wildlife. Country park is well used for national sporting events.	
3 1 7 5	C	Tippins		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 9 4 9	Emma	Toche		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
308	Kellie Louise	Todd		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being. Specific concern on the impact to the car park for regular use and event use.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3396	Geraldine	Todd		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are

					within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 0 9 7	Lisa	Todd		Objects to Policy SA3, site HRS9 (North Hylton). Specifically objects to: impact to Green Belt and wildlife corridor; impact to village of North Hylton in terms of landscape and character; impact on walking/cycling/local recreation; impact on historic character of area; no local facilities to use; no consistency - extensions in village get refused.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
4 4 6 9	Monica	Todd		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 7 0	Donald	Todd		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 2	Lauren	Tough		Objects to Policy SA3, site HRS11 West Park. Objects to: loss of parkland/open space; loss of protective covenant; loss of Green Belt land; loss of historic and archaeological asset; impact on wildlife; impact to city gateway	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
8 1	Lauren	Tough		Support for the development of the Former Vaux site. Opposed to the Housing Release Sites at West Park and land adjacent to Herrington Park. Believes that West Park is a beautiful addition to the local community, is used by families and is a habitat for wildlife. Questions the ownership of the park.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver

					sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2 2 3	Leslie	Tough		Objects to Policy SA3, site HRS11 West Park. Objects to loss of greenspace- provision is linked to better health and well-being. According to NPPF para 74, greenspace should not be built on unless studies show that it is surplus to requirements - greenspace doesn't show a surplus. Land should be designated as a Local Green Space. Land should be built on according to NPPF that has least environmental and amenity value - this hasn't. Historic value of site is underplayed. Objects to withdrawal of covenant. Concern regarding school capacity and impact to local road network. Does not constitute sustainable development as it takes away a valuable local resource.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
7 6	Lyndsey	Tough		Support for the development of the South Sunderland Growth Area Opposed to the Housing Release Site at West Park. The area does not have a lot of green space and this area is used by frequently by local people and is a habitat for wildlife. Questions the ownership of the site. Will put increasing pressure on schools, GP surgeries and roads in the area. Site has some historic interest (ridge and furrow and the wall). Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 4	Lyndsey	Tough		Objects to Policy SA3, site HRS11 (West Park). Concern that West Park has an historic link to the setting and character of East Herrington. Concern that Parcel MD8 is not included at Stage 1 to be included in Stage 2. Object to rescinding of covenant. Concern that need for executive homes is overplayed, since there are numerous properties in area available for sale according to internet.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 7	Lyndsey	Tough		Opposed to the proposed housing release site at West Park on the grounds that it would result in the loss of green space, the park is used for recreational purposes, the Green Space Survey states that East and Middle Herrington have below average number of trees and amenity open space, this is a gateway site into the city, would be contrary to the aims of the Core Strategy, question over the ownership of the site, concern over the increasing pressure on local roads and schools and the site provides a habitat for numerous species.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 9	Lyndsey	Tough		Opposed to the proposed Housing Release Site at West Park. Would like to know why the Park has never been registered as a Village Green. Questions the ownership of the site. Development would result in the loss of a piece of open space which is well used.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 1 7 9	Ian	Towers		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

				<p>forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 1 8 3	Jeane	Towers		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
3 5	Amanda	Townshend		<p>Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers</p>	<p>The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that</p>

				identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2842	Thomas	Tracey	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3975	Joyce	Trainor	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.
1 9 1	Claire	Treadwell	Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will

					be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
8 7	Sarah	Treadwell		Supports the development of the Former Vaux site, the South Sunderland Growth Area and all of the Housing Release Site except West Park and adjacent to Herrington Country Park which are opposed to. Opposed to both of the proposed Travelling Showpeople sites and the Gypsy and Traveller site at Hetton Lyons	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
3 5 1 8	JS	Trembath		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are

					within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing</p>

				<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 1 6 9	Steven	Tumilty		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4 5 5 8	John	Tumman	Sunderland Civic Society	<p>Supportive of Policy SA1 bringing high quality office space into City Centre, however concerns over demand for quantum of development and delivery timescales. Consideration should be given to delivery of some retail on the site. Do not believe that there is a</p>	<p>Comments noted. Retail development is prioritised in centres. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites.</p>

			<p>need for Land North of Burdon Lane as the housing requirement is too high. This should be retained as a Settlement Break. Does not believe that the housing need would require the release of land for the Green Belt for development, therefore Policy SA3 is not required. Object to site HRS2 as it would be contrary to Policy E11 and would effectively join Springwell Village and Washington, adversely impacting on the preservation, setting and special character of Springwell Village. The scale of development in Springwell Village appears disproportionate to the size of the village. Object to site HRS6. It would leave to tongues of Green Belt with no real meaning in Green Belt terms, opening the door for future housing development south of the river and north west of the site. Loss of attractive and valuable amenity area. Loss of a well-wooded part of the park, including car parks which support its recreational use. Concern over noise impacts and pollution from A182. Do not object to HRS7, given the developments to the east, provided that the tree belt to Bonemill Lane is retained and strengthened. Object to site HRS9. Green Belt Review considered the sites the fields to have major and moderate overall impacts. The site is prominent from A19 and development would undermine the integrity of this open area and there would be no real scope to mitigate the impact through landscaping. Concern over noise and pollution impacts from the A19. Appreciate that site HRS11 within the Green Belt is something of an anomaly. If the site is to be developed, only the southern part of the site should be developed and the northern part retained as open grassland. Objects to site HRS12. The fields are seen in conjunction with the Country Park and provide good panoramic views, development would impact on the openness of the area. Appreciate that whilst maintaining the fields as open land may not be essential to the Green Belt, if the site was to be developed, suggest development on a triangle of land running north east-south west along the eastern boundary. Object to site HRS14. The site was considered for retention at stage 2 of the Green Belt Assessment, so question its inclusion. Would extend the built up area of Offerton further east, resulting in only A19 separating it from Sunderland. No perceived need for bringing the site forward. A different view might have been taken if the unsightly building south of the Granaries was proposed instead. Object to proposed safeguarded land. Believe that the reason for this is as future expansion area for IAMP, but should only be provided if absolutely and demonstrably necessary. Do not object to the safeguarding of this land for longer term development, but feel that it should be retained as Green Belt until a time at which it is needed, otherwise restricting premature development may be more difficult.</p>	<p>Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. Comments noted. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 5 1 8	Brandon	Turnbull	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. 2 1 9 7	Ron	Turnbull	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be</p>

				controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 4 5 4	Kevin	Turnbull	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 5 1 7	Michael	Turnbull	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 5 7 1	BERYL	TURNBULL	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4 1 1 5	S	Tyrrell		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 6 1	June	Udale		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 3 1 2	Michael	Urwin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

				lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

39	Andrew	Usher		Objects to proposed gypsy site at Hetton Lyons. Concern about disruption that will be caused to residents and businesses.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to

1					designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 6 3	Catherine	Usher	Offerton Granaries Management	Oppose HRS 14- Offerton. The document has not fully considered the key constraints and other key constraints have been omitted. Issues with the consultation its self are set out. Issues set out and questions raised with regards sewerage plant, noise impact, dust, air pollution, appropriate access, road safety, building issues, car parking, building design and the need for new executive houses in Offerton.	This site has been discounted following the Green Belt Review.
1 1 3 4	Danielle	Uttley		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 7 8	G	Van Dijk		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints. 					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 1 1 1	Denise	Vant		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 9 0	Jordan	Vant		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 9 0	Ruth	Vater		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2 3	Mark	Veater		Supports the development of the Former Vaux Site Opposed to the development of land north of Burdon Lane and believes that re-designation of this site seems arbitrary. Not sure why the reasons for the original designation have changed, except for pure expediency. Opposed to the Housing Release Sites at James Steel Park, Southern Area Playing Fields, Glebe House Farm, land adjacent to Herrington Country Park and The Granaries. Supposes the Housing Release Sites at Newcastle Road, New Herrington Working Men's Club, Philadelphia and all of the proposed sites for Travelling Showpeople and Gypsies and Travellers.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has

				undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
9 8 5	Harry	Venables	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 3 4	C	Vendy	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 2 7	Isla	Venus	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 4 2 8	Gemma	Venus		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. 4 5 1 3	Victoria	Vickerson	Object to proposals to build houses on West Park, Herrington. Traffic levels on Durham Rd and Herrington Rd and road safety. Impact on East Herrington Primary Academy and school places? Historical agreement that the land would not be used for anything other than grazing or recreational purposes. Park is used regularly, open green space promoting a healthy lifestyle and exercise and observing nature (squirrels, birds, bats). Building on West park would have a detrimental effect on health and wellbeing. Campaign to save West Park shows community spirit and the popularity and love people have of this precious park.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 9 8 6	Sharon	Vincent	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm

					to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 9 1 3	Ken	Waddle	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints. 8 4 7	Edward	Wake	<p>Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
2 0 7 0	B	Wake	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be</p>

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 3 5 6	Leslie	Wakefield		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 8 2	Moira	Walker		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 2 1 3	L	Walker		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks

8			<p>and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 6 1 5	Christine	Walker		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft

			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government’s proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council’s Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. 7	Joanne	Walker		Support for development of the Former Vaux Site. Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.

Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 3 1 2	D	Wallace	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the</p>

				development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.	
3 9 9 9	Elizabeth	Wallace		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 8 2 3	Anne	Wallace		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
7 7 9	Brian	Walsh		<p>Objects to Policy SA3 site HRS11 (West Park). Specific objections relate to: withdrawal of covenant, impact on wildlife, loss of greenspace, loss of grazing, loss of historic ridge and furrow, school capacity, GP Surgeries, traffic congestion and road safety.</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>
9 1 9	Linzie	Walton		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. 9 4 5	E B	Walton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 0 8	D	Walton		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1075	William James	Ward	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that</p>

				cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. 1052	Kirsty	Ward		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1675	C	Ward		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2912	Carol	Warner	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the

			<p>village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. 3 2 2 7	Victoria	Warren	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 5 0 5	Alan Douglas	Warren	<p>Object to residential development on West Park, Middle Herrington. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; irreversible damage to quality of openness of the greenbelt and recreation; alter character of the village and infrastructure pressure would outweigh perceived benefit. Exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted. The park gives the settlement its unique character, Medieval ridge and furrow possibly oldest in Sunderland. Land is subject to Coal Board Covenant - heritage open space given to the people of Herrington in perpetuity as a place of recreation. Development would alter character and setting of the park impacting on wildlife, reducing the very attractiveness developers and residents seek. Proposals do not address need for affordable</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>

			housing or for ageing population; extra vehicular traffic negatively impacts on existing road network and safety; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; mature trees roots will become unstable from earthworks; proposals fundamentally impact on GB purposes; surface water flooding would worsen. Site location more likely for commuters so not likely to improve economy of Sunderland city centre. Plan conceived without local knowledge of existing conditions and constraints - unachievable and impractical. Leaflets not sent to every household and business.	
4508	Alan Douglas	Warren	Opposes proposals for West Park, Middle Herrington - inappropriate development, harmful to green belt (NPPF) and not very special or exceptional circumstances. Priority should be development on brownfield and previously developed sites - do not accept that brownfield sites have been exhausted. Evidence to justify the number of houses and to build on green belt land is unconvincing - jobs and workers are being double counted by neighbouring councils. Exceptional circumstances not demonstrated for each site separately. Type of housing proposed does not meet the need for affordable provision or for ageing population. City centre needs investment and improvement - the site would be more likely for residents commuting and shopping elsewhere, no evidence it will reduce out migration or for people living and working in the city. Parking issues in Park Lea. Impact would go against policies to enhance the city's natural and historic environment - Mediaeval ridge and furrow farming land, supports mature trees and wildlife and livestock. The land is subject to a Coal Board Covenant - parkland is a heritage of open space given to the people of Herrington in perpetuity as a place of recreation. Development would alter the character and setting of the park. Mature trees with large roots would become unstable from earthworks. Purposes of the greenbelt are of utmost importance for the park as a modest amount of land providing these protections. Road network already overused by traffic, safety issues. Substantial impact could not be minimised without further road widening. Local school already over-subscribed.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4510	Alison	Warren	Concerned that designated greenbelt land at West Park, Middle Herrington is under threat of development. Inadequate consultation process - leaflet not delivered to every household. Inappropriate development, harmful to the green belt (NPPF) and no very special or exceptional circumstances. Priority should be to develop the many brownfield and previously developed sites - do not accept brownfield sites have been exhausted. Development should be targeted at the inner areas, especially the city centre. Further green belt development would adversely affect the attractiveness of Sunderland to live and for business - this is the premier gateway into the city. The Council's traffic predictions indicate junctions around West Park will exceed capacity if there is any development, congested area already and safety issues. Area is of natural and historical value, possibly oldest Mediaeval ridge and furrow in Sunderland, enhances the environment and is home to wildlife	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

			(bats, owls), trees help air quality from polluted overused roads. Infrastructure at breaking point - schools, doctors and roads at full capacity. The land is subject to a Coalboard covenant and left to the people of Herrington in perpetuity. Surface water flooding, mature trees would become unstable from earthworks.	
4 5 1 1	Alison	Warren	Opposes proposals for West Park, Middle Herrington - inappropriate development, harmful to green belt (NPPF) and not very special or exceptional circumstances. Priority should be development on brownfield and previously developed sites - do not accept that brownfield sites have been exhausted. Evidence to justify the number of houses and to build on green belt land is unconvincing - jobs and workers are being double counted by neighbouring councils. Exceptional circumstances not demonstrated for each site separately. Type of housing proposed does not meet the need for affordable provision or for ageing population. City centre needs investment and improvement - the site would be more likely for residents commuting and shopping elsewhere, no evidence it will reduce out migration or for people living and working in the city. Parking issues in Park Lea. Impact would go against policies to enhance the city's natural and historic environment - Mediaeval ridge and furrow farming land, supports mature trees and wildlife and livestock. The land is subject to a Coal Board Covenant - parkland is a heritage of open space given to the people of Herrington in perpetuity as a place of recreation. Development would alter the character and setting of the park. Mature trees with large roots would become unstable from earthworks. Purposes of the greenbelt are of utmost importance for the park as a modest amount of land providing these protections. Road network already overused by traffic, safety issues. Substantial impact could not be minimised without further road widening. Local school already over-subscribed.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

3 7 7 1	Doug	Warren		Object to west park on the following grounds; no evidence to demonstrate that people will move back to Sunderland, loss of green belt, impact on openness, change of character to the area, no exceptional circumstances, loss of fridge and furrow, no need for executive homes, impact on the network, loss of open space and brownfield should be prioritised.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 4 3 3	Janice	Waterfield		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 7 6	Marion	Waterhouse		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 2 9	Doreen	Waterhouse		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each

				development
7 1 5	E	Watson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 1 0 9	Barbara	Watson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any</p>

				potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2037	John	Watson		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2 8 8	Linda	Watson	Objects to Vaux site but supports all SSGA sites. Supports Policy SA3 sites HRS4, HRS9, HRS10, HRS11, HRS13, HRS15 and Safeguarded site, but objects to HRS sites HRS6 and HRS12. Objects to all proposed Traveller and Gypsy sites.	The Vaux is allocated in the Publication draft for office and residential development. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, he Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified

					in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
4 5 0 3	Mark	Watson		Object to West Park, Herrington being in the draft Plan - would destroy an area of natural beauty and significant historical value. Plan does not demonstrate any means of preserving such areas. Many brownfield sites lying desolate. No demonstration on how already saturated road network could cope with the potential extra 200-300 cars. Limited capacity for road expansion and no rail or metro links. No explanation of how traffic would access/egress the proposed development and the impact on traffic flow at Board Inn and A19 roundabouts. No demand for such a development and would tear apart a community. Really a plan to create an executive 'commuter' belt in Sunderland for people working and still spending their time and money outside Sunderland. Economically dead city centre.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 5 0 0	Sarah	Watson		Opposed to housing development on West Park, Middle Herrington. Beautiful gateway to Sunderland, aesthetic value, historic significance and ecological value. Infrastructure will not support further housing, schools full, few safe green spaces for people, children and dogs to exercise, more suitable brownfield sites with infrastructure more able to cope. Plenty of homes in 'executive' bracket. Wildlife, bat colony and cows grazing, trees capture traffic pollutants.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 3 9	G	Watt		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	Leechmere has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 3 2	K	Watt		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that

			<p>cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 9 3 1	Joan	Watt	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. 				agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2660	Paul	Webb	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4068	Ben	Webb	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4202	J A	Webb	Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4458	Matthew	Webb	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2006	Xenia	Webster	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any

					potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 2 8	Lucie	Webster		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 3 1	Margaret	Wedderburn		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

1 8 0 5	David	Weir		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 4 9 7	John	Weirs		<p>Opposed to the proposed gypsy and traveller site at Hetton Lyons on the grounds that the access is from an already busy road, increase in traffic, it will have a detrimental impact on the local environment, people will be deterred from using the park and there will be an increase in the transient population in the area.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 4 9 9	John	Weirs		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.</p>	<p>The Publication Draft of the Plan allocated a stopover site. 4 9 8				Lyons Country Park to be excluded as a transit/stopover site for the travelling community. Important facility for local and national sporting community, loss/interference with public use of car park and access would be detrimental to its use and enjoyment.	the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 4 8 1	Kimberley	Welburn		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 4 9	Linda	Welch		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 9 5	S	Welch		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 9 6	R	Welch		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 4 5	Stephen	Welch		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 6 4	Ashleigh L	Welch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 6 7	Alan	Welch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 0 3	Sharon	Welch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 5 5 5	Shaun	Wellburn		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being. The facility is of great importance to the local community, in terms of cycling and recognised nationally.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1049	Graeme	Wells		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3177	N	Wells		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1019	Henry	Welsh		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2363	Paul	West		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2084	Stephen	West		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been

					included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
61	Catherine	West		Supports the development of the Former Vaux Site. Opposed to all of the Housing Release Sites and the proposed Travelling Showpeople and Gypsy and Traveller sites. Would no longer use Hetton Lyons Park if the Gypsy and Traveller site goes ahead.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4610	V	West		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3204	V	Westgarth		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3739	Sally	Weston		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3740	William	Weston		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
639	G R	Wetherell		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has

					been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. 1 1 0 2	Mark	Whaley		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 9 8	Ian	Wharton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 9 5	Gaynor	Whatcott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being. Would be deterred from visiting the park in the future if the proposal went ahead. Also concerned about the method of consultation used.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 9 8 1	N	Wheatley		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 1 1 3	L	Wheatley	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

The Council has adopted a tolerance policy.</p>
4 4 9 2	Jan	Wheeler	<p>Opposed to the proposed Housing Release Site at West Park on the grounds that the land was gifted to the Council in perpetuity for the enjoyment of residents, the site has archaeological and ecological value and does not believe that there are exceptional circumstances to warrant the release of the site from the Green Belt.</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>
9	Paul	Whelan	<p>Opposes travelling community transit/stopover site at Stephenson</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further</p>

7 5				Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 1 1 7	Patricia	Wheldan		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 1 6 0	E	Wheldon		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. 1 2 6 4	Ann	White		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional</p>

				Washington - open space used regularly for football and recreation - disgraceful given availability of brownfield sites and health issues around obesity and lack of exercise.	Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
4 4 9 1	Andrew	White		Opposed to the proposed Housing Release Site at Southern Area Playing Fields on the grounds that the area is well used for recreational purposes and promotes healthy lifestyles.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
4 4 9 0	Lois	White		Opposed to the proposed Housing Release Site at Southern Area Playing Field on the grounds that the area is well used for recreational activities and encourages people to stay fit and healthy	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

					have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
3021	Peter	White		Objects to Policy SA3, sites HRS11 (West Park). Specifically objects to: loss of parkland; impact on mature trees; loss of wildlife; increased traffic pollution; increased noise pollution; impact on road safety; increased congestion on local roads; 70 houses could end up being a lot more; withdrawal of covenant; loss of ridge and furrow; plenty of brownfield land available; Parkside corner is a listed structure.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1143	Robert	Whitehead		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4151	David	Whitehead		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
984	Richard	Whitehouse		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1024	Danielle	Whitehouse		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
13	D	Whitfield		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the

0 1				<p>evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

2 1 1 3	Shelagh	Whitfield	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on coast to coast route.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 9 3	June	Whittle		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
5 3	Christine	Whittle		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities;	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt,

0				impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 4 8 5	Christine	Whittle		SHLAA site 465 development of land adjacent to Herrington Country Park - facility whole of Sunderland to be proud of, triumph of food design and an asset for all. To build houses around the park would block this magnificent park from view, be a waste of green space. Extra traffic would exacerbate already busy A183 road. By far the largest proposed development and nowhere near any major employment site, surely makes sense to build housing nearer to existing employment sites to lessen travel on congested roads.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2088	Tracey	Wilkinson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2050	A W	Wilkinson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. 2316	Andrew	Wilkinson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2595	G	Wilkinson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons

			<p>prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

2 4 8 5	S	Wilkinson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 4 2 3	Brian	Wilkinson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 5 5	Adam Lewis	Wilkinson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 0 0 5	Brian	Wilkinson	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
7 0 8	Janet	Wilkinson	Objects to Policy SA3 sites HRS1,2,3,4,6,7 and 12. Specific objection to HRS6 (JS Park) historic demolition, loss of greenspace, impact to wildlife corridor, archaeological significance. HRS7 objection relates to loss of well-used leisure facility, impact on ancient woodland.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has

				been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
3 2 6 9	Paula	Wilkinson	Objects to Policy SA3, site HRS11 (West Park). Specifically opposes: loss of Green Belt; building at West Park draws people away from city centre; loss of historic parkland; impact on local health via loss of greenspace; increase in road traffic; plenty of brownfield sites undeveloped in city.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 0 3 7	Sandra	Wilkinson	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 8 4	Sarah	Wilkinson	Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can

					be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
7 6 9	Tim	Wilkinson		Opposed to the development of the Former Vaux Site, South Sunderland Growth Area and all of the proposed Housing Release Sites and to refer to comments on the Core Strategy. Aggrieved that James Steel Park has been proposed for housing after residents were so opposed to the demolition of housing on the site by the Washington Development Corporation. With regards to the Southern Area Playing Fields it is believed that development here would encroach even further into the Green Belt and that development would put additional pressure on existing roads.	The Vaux is allocated in the Publication draft for office and residential development. In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2 3 2 0	Neil	Willey		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 9 4 8	Caitlyn	Williams	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks</p>

					but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 1 4 6	I	Williams		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 7 0 9	Victoria	Williams		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 9 8	R	Williams		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 8	Lindsay	Williams		Object to Policy SA3, site HRS12 (Penshaw). Specific objection to: impact on schools; local road network; impact on unique landscape of area.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining

					sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 9 8 6	Tracy	Williams		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2311	Val	Willis	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Wildlife sanctuary on the border.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 3 6 6	Christine	Willis		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 3 9	Linda	Willis		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 7	Lynne	Willis		Supports the development of the Former Vaux site, Chapelgarth, Cherry Knowle and New Herrington Working Men's Club. Opposed to the Housing Release Sites at Springwell, James Steel Park, Southern Area Playing Fields, Glebe House Farm, Newcastle Road, West Park and the Safeguarded land. Believes that the plan has a huge negative impact on local residents and for residents near Southern Area Playing Fields the views from existing properties will be effected as well the effect from noise / traffic levels. States that West Park needs to be kept as greenbelt. Development upon it would have a huge negative impact for existing residences who overlook the park. Many local people make regular use of this green space. The local community infrastructure would be negatively impacted by development there. Traffic is already an issue in the area.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 4 9	M T	Wilson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2930	David	Wilson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 6 2 2	Kirsty	Wilson	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. 2 9 8				Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 5 2	Helen	Wilson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 5 8	Andrew	Wilson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 6 1	Denny	Wilson	Sunderland City Council	Opposed to the site at Ferryboat Lane for the following reasons - Would take away all of the North Area's rural environment - Part of the wildlife corridor and on the flight path of migrating birds - Habitat for animal, birds and insects - Nearby areas are being developed for IAMP, Vantec etc -Need the green space for health and wellbeing benefits - Site has historic importance - Schools are at full capacity -Site will be subject of noise and air pollution - There are a number of brownfield sites with permission that have not come forward. They should be used first.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs

					and adhere to CSDP policy.
4 5 2 6	Denny	Wilson	Sunderland City Council	Concerned at public suspicions of possible of financial corruption (and legal action) that SHLAA site 416 at North Hylton has been renamed and divided into 2 parts (HY1 and HY2) in the Green Belt assessment, with HY2 now deemed suitable for housing. Many members of the public received no notification of public consultation meetings until some had taken place. Requests this land to be removed from the Core Strategy Green Belt assessment for the reasons given in the SHLAA and by members of the public.	The evidence base which supports the Core Strategy and Development Plan identifies the need to deliver at least 13,410 new homes during the Plan period (2015 to 2033). The Plan must identify locations to meet this growth, this was done through the Strategic Housing Land Availability Assessment, also known as the SHLAA. When a site is assessed through the SHLAA, the Council must test it against a number of criteria, including Is the site suitable for development " which means that there are no constraints on the site which would prohibit the site being suitable for housing, Is it the site available " which means that it is available for housing development, and Is the site achievable " this means that the site is viable and is very likely to be built within the Plan period. Please note that any site in the Green Belt is immediately discounted in the SHLAA, as it can only be included if and when it is removed from the Green Belt. The Council undertakes this assessment on an annual basis and consults on the findings. The Council, through the consultation process, gives developers and residents the opportunity to identify alternative sites which are then considered for inclusion in the SHLAA. The SHLAA includes all sites that are considered to meet the test identified above as deliverable and developable housing sites over the next 15 years. Where sites do not meet the criteria, they are classed as "not currently developable" within the SHLAA and do not form part of the potential housing supply. In regards to Site 563 (Hylton Skills Campus - 100 dwellings) and Site 565 (Phoenix Tower Business Park, Castletown Way - 140 dwellings). Both of these sites are included in the SHLAA as developable housing sites. Site 563 is expected to start in year 4 and site 565 has outline consent, and as such in line with SHLAA methodology, is included within the five-year land supply. As the consent expires June 2018, contact was made with the agent when updating the SHLAA to get an update on whether a reserved matters application was likely to be submitted. The agent advised that this would be submitted before expiry of the outline consent. The reserved matters application has now been submitted (18/00823/REM). Following the completion of the SHLAA, it became apparent that Sunderland does not have a sufficient supply of deliverable and developable housing sites to meet the identified need. The Council then considered alternative sites including looking at employment land, Greenspace, open countryside and the settlement breaks to identify additional capacity. This was done through the Strategic Land Review. Following this, the Council then undertook a Green Belt Review to identify if any land could be removed from the Green Belt to meet the future needs of Sunderland. Amending Green Belt boundaries is a last resort and can only be done through the preparation of a Local Plan where exceptional circumstances can be justified. The Council consider through the evidence base that these exceptional circumstances do exist. To verify this, the Council commissioned independent consultants to scrutinise the Council's approach to the Green Belt and to prepare an exceptional circumstances report. This report will be included in the Local Plan evidence base during the consultation period. It sets out a comprehensive case for exceptional circumstances. The Plan seeks to maximise land in the existing urban area and as a result less than 10% of the homes needed, will be built in the Green Belt. The strategy prioritises the development of brownfield land and the housing supply includes sites in Pennywell, Seaburn and Stadium village, but despite this, there is a shortfall. For the purposes of the SHLAA and the Strategic Land Review the site was referred to as site 416. However, when the Green Belt Assessment was undertaken the site was subdivided into land parcels and included a different reference system. The Strategic Land Review (SLR) identified the issues in your email, notably in relation to the need for HRA investigation, that priority species are recorded in the area, and that adverse impacts were anticipated in relation to protected European sites, SSSI's and LWS sites. The conclusion given was that significant mitigation is required. The SLR conclusion states that site is not considered suitable for development, based on Green Belt grounds. The location within Green Belt is also the reason why the site is not supported in the SHLAA. It is important to point out that significant mitigation required, does not rule out the site on these specific grounds, but just indicates that mitigation will be required to address the issues identified. The scale of the proposed site on the wider wildlife and green infrastructure corridor along the River Wear is considered to be sufficiently limited as to enable appropriate mitigation to be undertaken through careful design that can satisfy landscape, wildlife and other considerations. The site does not directly impact on protected wildlife sites, but nevertheless there are considerable ecology issues that will need to be addressed, including in relation to Habitats Regulations Assessment, to appropriately mitigate for any impact to priority species, and mitigating for any indirect impacts to protected wildlife habitat along the River Wear. A Habitats Regulation Assessment has been undertaken in support of the Plan and identifies necessary mitigation in relation to the site. This will be published in June alongside the plan. The Green Belt Stage 1 Update and Stage 2 identified field parcel HY1 as being "fundamental" to Green Belt purposes but field parcel HY2 was not fundamental. A revised site area (416A) incorporating part of HY1 and HY2 was put forward for consideration in the same report " Call for Sites Review. Page 145 reviewed this and concluded that this revised site area should be considered at Stage 3 (because the northernmost part of parcel HY1 was not considered to be fundamental to Green Belt purpose). Since then, a Green Belt Boundary Review has been undertaken, and this part of HY1 has been recommended for retention in Green

					Belt. Hence, the revised site put forward as a Housing Growth Area involves part of parcel HY2 only. The site is now being put forward by Hellens, but previously the site was promoted by Barratts. The Publication Draft of the Plan includes a strong policy for the development of this site, if the Plan is to be found sound with this site included, developers would still need to address the issues identified in the policy through the planning application process. If these issues could not be adequately mitigated, then the site would not receive planning permission.
2 5 7 7	Joanne	Wilson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 4 8 4	K	Wilson		Object to draft planning proposal to build on West Park in Herrington - gateway to Sunderland from A19, distinct character in housing style, trees and greenery. Popular for walkers and children can safely play and wildlife thrive. 70 2-car families will create unwelcome additional traffic burden. Wrong to build on precious green areas with history and beauty - irreversible damage. Disrespectful lack of preservation for established areas doesn't correlate with a city of culture. Destroying character of established housing and public access to communal natural land integral of the locality is counterproductive.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 1 1	Lee	Wilson		Objects to SSGA site North of Burdon Lane but supports other 3 SSGA sites. Supports HRS13 (Herrington WMC) but objects to all other HRS sites and Safeguarded Site. Objects to all travelling showpeople and gypsy sites.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document.
6 9 2	Paul	Wilson		Supports Vaux site. Supports proposed gypsy sites at Hendon and Leechmere but opposes site at Hetton Lyons. Specifically objects to Hetton Lyons due to: impact on users of park and to park's future.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 6 7	Joanne	Wilton		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 4 1	George	Wind		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 4 6	Janet	Wind		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 3 6 3	Madaleine	Wood	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has</p>

					undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. 2047	Gillian	Wood		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Concern over impact of noise from A19/A1231.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council’s Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 6 2 4	Tracy	Wood	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government’s proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied</p>

			<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 2 5 1 0	Sean	Wood		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 8	Lisa	Wood		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

8				for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Council has adopted a tolerance policy.
4 2 2 1	Alan	Wood		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 8 0	Albert	Wood		Would not like to see Houghton Council depot used for show people. Back gates emergency way out onto private Gravel Walks estate being cleared.	The council has considered this site.
1 8 9	Dale Royce	Wood		Opposed to the proposed Housing Release Sites at Springwell Feels that the proposed development sites would change the look and feel of the village and have a negative impact on village life and that there is enough brownfield land available to meet housing needs. Would like to know what alternatives have been considered	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
3 2 3 8	Lisa	Wood		Oppose HRS 14- Offerton. The document has not fully considered the key constraints and other key constraints have been omitted. Issues with the consultation its self are set out. Issues set out and questions raised with regards sewerage plant, noise impact, dust, air pollution, appropriate access, road safety, building issues, car parking, building design and the need for new executive houses in	This site has been discounted following the Green Belt Review.

				Offerton.	
2 5 6 7	M	Wood		Objects to Policy SA3, sites HRS1, HRS2 and HRS3 (Springwell Village). Specifically objects to: traffic impact on village streets/homes; impact to sewers; increased noise; increased traffic accidents.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
5 7 0	Peter	Wood	Sunderland City Council	Objects to proposed gypsy site at Leechmere Industrial Estate. Specifically opposed to: proximity to nursing care home and stress this could cause; proximity to businesses and local residents.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 1 5	D	Woodhouse		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 2 9	J W	Woods		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 4 1 1	Billi Jane	Woods		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 3 1	Julia	Woods		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being. The Council has adopted a tolerance policy.
2 6 1 1	Michael	Woodward		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2612	GP and P	Woodward		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 2308	S	Wraith	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Concern over destroying wildlife, habitat and light pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport</p>

				Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 4 7 8	Elizabeth	Wrathmall	Would never chose to live near a gypsy site. Sandmere location is in middle of premium residential areas so would contribute to out-migration, to detriment of the environment and residents. Site is not near A1 or A19 for ease of gypsies and travellers. Temporary residents, can be unnerving for local populations. Should be in a secluded area near major road links, not nestled into business, shopping, educational and residential areas. Not received any information leaflet.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 7 7	Kevin	Wrathmall	Object to gypsy/traveller site proposal at Sandmere Road - would make the area less desirable to live due to temporary nature of the residents. Heard that trouble always follows when transient populations come to an area. It is a long route in from major roads, a site nearer the A19 or A1 would be preferable, and not near populations.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 5 9	Alan	Wright	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 6 4 4	Jon	Wright	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised

					following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 1 1 2	W	Wright		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

4 3 0 0	J	Wright		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 7	Alan	Wright		Opposed to the Housing Release Site at West Park The Park is a habitat for various wildlife and used frequently by local people and local roads are already very busy and the site is not easily accessible. Local schools are already at capacity.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 1 9 6	Samantha	Wright		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these</p>

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 6 0 3	Miley	Yeaman	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.		The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. 2020	Lisa	Young	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks</p>

					but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 1 8 4	Denise	Young		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 5 2 1	Michelle	Young		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the

			<p>village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. 4 1 8 5	Shirley	Young		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 4 2	Margaret	Young		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 7 0	Janis	Young		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 7 7	Andrew	Young		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 7 4 7	Julie	Young		Object to West Park as well used peaceful place to walk. Concerns over traffic increase and school capacity. Concerned over loss of open space and residents recreational needs. Concerns over impact on wildlife, heritage, historic and archaeological value.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 4 7 6	Julie	Young		Objects to proposed housing development at West Park, Middle Herrington - beautiful park used by local residents, peaceful and tranquil place to walk. Potential increase in traffic from more cars, school cannot deal with increase in intake of more children. Where will residents go for recreation? Health issues. Wildlife issues should be protected and preserve heritage/historic/archaeological value of the area. Wasn't the park transferred for recreational use for residents?	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 7 0	Kevin	Young		Opposed to the proposed Housing Release Sites on land adjacent to Herrington Park and at West Park. Is opposed to the proposed development at Herrington Country Park on the grounds that views of penshaw monument will be lost and the loss of the fields.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 4 7 5	Marie-Claire	Young		Object to building 70 houses on West Park, Herrington - beautiful open space amenity used frequently for recreation and exercise, for dogs and children to play in. An oasis in an urban landscape, mature trees provide habitat for wildlife (bats). Numerous brownfield sites yet to be re-purposed and utilised. Detrimental effect on Herrington area. Environmental impact devastating, paving the land will surely make flooding worse. Impact of the minimum 140 cars of the 70 'executive' houses adding to existing traffic problems, increasing stress and decreasing air quality putting local residents health in danger from pollution. Will add strain to school and health services in the area - local school stated it cannot expand further (some land recently granted permission for housing). Park is a site of archaeological interest - Medieval ridge and furrow.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

2 7 2 6	Marie-Claire	Young		Object to West Park for the following reasons:- Detrimental impact on people's lives in terms of health and removing open space. Taking away trees and plants and habitats for wildlife. Numerous brownfield sites in the city can be built on. Increase the flooding problems. Increase pollution from additional cars Impact on traffic congestion and road safety Impact on schools and health care. Park is a site of archaeological interest	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
5 6 6	Philip	Young		Objects to Policy SA3 - HRS11 (West Park). Concerns about increased traffic, loss of the park for recreation and loss of Green Belt. The park was transferred to the Council to be retained for recreation in perpetuity. Concerns about lack of governance and conflicts of interest between the Council and Siglion.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 8 8 8				Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

4 3 7 9	Guys Coatings Ltd			<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and well-being.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 5 3	National Farmers' Union		National Farmers' Union	<p>Opposes proposed gypsy site at Hetton Lyons. Specifically concerned on behalf of adjacent landowner regarding potential grazing impact on farming land adjacent by gypsies.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
7 9 4	Taylor Wimpey		Taylor Wimpey	<p>Support the proposed Housing Release Site on land adjacent to Herrington Country Park. Agrees that there is limited capacity within the urban area and that amendments to the Green Belt are</p>	<p>Support noted.</p>

			required. Since previous representations were submitted to the Council, Taylor Wimpey has been in detailed discussions with Northern Powergrid in relation to the design options which have subsequently informed a cost benefit analysis to confirm which design layout presents the most deliverable option. Following further investigation, it is anticipated that the pylons would be retained though the pole mounted cables immediately to the west will be diverted. Hence the site could now accommodate 435 dwellings assuming an average density of 30 dwellings per hectare. Further clarity has been given on the main technical considerations at the site. Requests that the following revision to Policy SA3 sub point 8: make provision or contributions to support facilities including education, health care and shops and services where justified.☒	
7 9 1		Story Homes Ltd	that site HRS3 should be expanded to reflect the defined landscape features and create a more defensible boundary. The omitted area has low landscape value. Site is considered to be sustainable and accessible, and SUDS feature can help to create larger developable area. Bigger site could accommodate 140 homes. Site will provide new public open space, better pedestrian and cycling connectivity, improved green infrastructure and wildlife habitat and mitigate for local flooding issues. Wish to alter point 8 and consider making provision or contributions to support facilities including education, health care and shops and services where justified.	Comment noted.
3 3 8 6		Buckley Burnett Ltd	Representations were previously made to the Strategic Land Review - Call for Sites that the site was suitable in principle for residential development, particularly executive type housing and that the Green Belt boundary should be amended so that this land is excluded. The allocation of site HRS8 for housing is supported. The site is suitable, available and achievable. Propose a slightly larger site for development, with a different access point. On this basis the record should be updated so that the owner/developer is Buckley Burnett Ltd, the site size is 2.5ha, able to accommodate up to 55 units and developable from 2020 with completion in a 2 year period. There are no known physical constraints. Likelihood of pollution is low as site is not previously developed. Not in a flood risk area. Telecoms infrastructure already in place adjacent to site. Enquiries on water supply and drainage with NWL are complete. Topographical surveys are being undertaken, which will inform drainage strategy. Vegetation on site cut regularly, so ecological potential is limited, but an assessment can be undertaken and mitigation put in place if necessary. Any noise from neighbouring industrial site can be measured and considered. Tree belt will provide a buffer and a noise assessment undertaken as part of a planning application. Detailed transport assessment work will be undertaken later.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
7 9 2		Story Homes Ltd	Support the proposed Housing Release Site west of Waterloo Road, agrees that there is limited capacity within the urban area and that the amendments to the Green Belt are needed to allow for sustainable expansions to meet the long term needs of the City. Whilst Story Homes supports the proposed release of the sites, only a partial extent of the site is proposed to be released. It is	Support acknowledged. The council has identified the site and safeguarded land in the publication draft.

			<p>considered that the site should be larger to ensure the site is based upon defined landscape features or existing field boundaries and serve to create a logical, robust and defensible Green Belt boundary. Supports the Lichfields HEaDROOM analysis that suggests the housing requirement should be increased to 880 dwellings per annum (dpa) which would equate to an OAN of 15,840 dwellings and a need to release additional land from the Green Belt as well as a buffer in case there is under delivery and potential slippage rates. Does not believe there is sufficient safeguarded land and that it should be increased and ‘pepper-potted’ around the city. Believes that a wider area of each land interest should be released from the Green Belt at Springwell and Washington. Set out a vision for the site in an attached document which deals with many of the issues surrounding the site. Sought to address any concerns in relation to the remaining part of the site. Suggested rewording of point 8 of Policy SA3. Whilst Story Homes agrees with the majority of the points, they consider that sub point 8 should be revised to the following: make provision or contributions to support facilities including education, health care and shops and services where justified.</p>	
1 1 6			<p>Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Does not believe that the site could accommodate necessary number of caravans and vehicles. Living conditions of site would be appalling. Roads are dangerously busy. Supports all other proposed travelling showpeople sites and gypsy and traveller sites.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
1 3 1			<p>Opposed to the proposed gypsy and traveller site at Leechmere. Believes that there would be an increase in crime</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
