			<p>Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 6 4 2	Jack	Ennis	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Council has adopted a tolerance policy.
4 4 4 3	Margaret	Etherington		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 3	P	Evans		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	
3 2 5 3	P	Evans		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of greenspace/recreational area; traffic increase and road safety.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
7 4 1	G	Evans		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on wildlife.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 7 8 5	Michelle	Evans		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 7 4 6	Charles	Evans		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.	
4 1 7 0	C	Everden		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 8 1	Joan	Everett		Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park on the grounds that it will cause additional traffic and put additional pressure on existing schools and GPs.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2 7 5	Joan	Everett		Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park on the grounds that it would spoil views, create additional traffic and put extra pressure on the local schools and GPs	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. At the Planning Application stage, the applicant will be required to submit a Transport

				Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 7 1 9	Beth	Ewart	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 3 3 5 1	Ian	Ewin	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 3 3	Natalie	Ewing		<p>Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park Believes that the proposed development is ill-considered and building here would both diminish the view of the country park as well as Penshaw Monument. Would like to know how the land will be drained as it is self-draining at the moment, if the hedge on Chislehurst Road will be removed and how traffic will access the site. Concerned about the increasing pressure that will be placed on existing roads and schools.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The conclusions of these assessments are sets out in the Development Frameworks.</p>
1 9 8	Edward	Failles		<p>Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council</p>

			for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.	undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
1 7 5 1	Edward	Failles	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 9 7	Andrew	Failles		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3 8 0 4	Susan	Farrell	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register

				and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 2 1 1	Janice	Farron	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2060	Jack	Faulkner	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2447	C	Faulkner	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1086	Danielle	Fellows	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1149	Sharon	Fellows	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1187	Laura	Felton	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2147	Elaine	Felton	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the	Comments noted. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
5 7 5	A	Fenwick	<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.</p>
1 7 2	Ashleigh	Fenwick	<p>Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure</p>

					that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced from 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.

In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 5 5 7	J	Fenwick	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
3 8 3 6	Lisa	Fenwick	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft</p>

			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

6 8 9	K	Ferguson		Objects to Policy SA3 - site HRS11 (West Park) and development of greenbelt sites more generally. Greenbelt land provides environmental and wellbeing benefit. Helps to safeguard against climate change. Concern over impact on mature trees, protected species. The site has historic significance with ridge and furrow. Loss of recreational space. Concern over impact on traffic.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
7 8 2	Stephen	Ferguson		Objects to Policy SA3 site HRS11 (West Park). Specific objections relate to: loss of greenspace and recreational area that supports wellbeing, historic ridge and furrow, wildlife impact, traffic impacts, school capacity, loss of Green Belt.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 9 9	Lesley	Ferguson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks</p>

					but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 2 8 8	Robert S J	Fiddy	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. 4040	Andrew	Field		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1410	J	Fielder		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Enjoys walks in the area.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4144	Richard	Fielder		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
280	Ella	Fielding		Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park as it is believed that the proposed houses are not needed and the area should be protected.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 1 7 5	Amy	Fife	<p>Object to HRS1, HRS2 and HRS3 in Springwell Village. Object to executive housing proposed, too expensive for local people to purchase and remain in village. Village already struggles with traffic and parking and this will only get worse. Plans will change the character of village detrimentally.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has</p>

				<p>undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.</p>
1 7 4	Helen	Fife	<p>Object to HRS1, HRS2 and HRS3 in Springwell Village. Object to development of executive homes when affordable homes are needed, particularly for younger people who wish to stay in the village. Concern that development will negatively impact on health, school and road infrastructure to unacceptable degree. Proposals equal urban sprawl. Will lead to lengthy disruption to village. Narrow roads cannot cope with traffic levels. Springwell is taking one of the biggest hits in terms of Green Belt release. Brownfield land should be developed first.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. 				be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
1 7 1 8	Helen	Fife	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 6 2 2	Mitchell	Fife	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4 1 7 3	Keith	Finch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 7 2	Kelly	Finch		I request that Sunderland City Council excludes Stephenson Lake Car Park (Hetton Lyons Ponds), at Hetton Lyons Country Park when considering establishing a transit/stop over site for the travelling community. I feel very strongly that the park is an important facility not only in our local community but also within the national sporting community and links to council's stated commitments to protect, conserve and enhance our environments and to plan for healthy communities. The loss or interference with the general public's use of Stephenson Lake Car Park and the access it provides to the country park and connected network of rights of way would be detrimental to its use and enjoyment. It will be a backward step in relation to the parks Green Flag Award. The Park received thousands of visitors from all over the country who attend major sporting events including those for cycling and triathlons as well as events such as the Annual Dragon Boat Race and Hetton Summer Carnival which raises thousands of pounds for charity. All of these events contribute to economic prosperity. Please keep me informed throughout the consultation and adoption process.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 5 0	Graham	Findlater		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 0 1	Joanne	Finn		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 3 9 8	Daniel	Finn		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. I like to go for walks in this area.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 1 4 2 0	Margaret	Fisher		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. There is plenty of land to build on without taking away the green belt.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 0 0 1	Edward	Fisher		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 8 9 4	G.R.	Fisher		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.	
1 4 9 2	Olive	Fitheridge		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 3 0 7	James Donnison	Fletcher		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought.

Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 7 8 2	DW	Foggin	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 1 7 4 9	Joanne	Ford		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 					included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

6 3 5	M	Forster	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
9 1 5	Nicola J	Forster	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 3 2	J	Forster	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy

6			<p>openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 1 8 1	Louise	Forster	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 				Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 3 2 7	David	Forster	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The Council has adopted a tolerance policy.
3 8 7 5	Yvonne	Forster	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has

					<p>been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 2 4 6	L	Foster		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons

			<p>prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out</p>

				<p>Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3820	Jakob	Foster		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. The Council has adopted a tolerance policy.
3 6 1 2	JG	French		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

1760	Anne	Frost		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3 3 3	C Dale	Froud		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Questions whether the travelling community will pay for the land, pay Council tax, if the site can be bought privately and what the current options for the travelling community are. It will deter people from using the park and fear that crime may increase.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 1	SJ	Froud		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Specific concerns whether site in due course could be privately bought, and general disruption that such site use could cause.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 5 3	C Dale	Froud		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 7 7	Hetton	Fruit & Veg	Hetton Fruit & Veg	Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 8	Sharon	Fryatt		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

5				waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Council has adopted a tolerance policy.
1 6 3	Lyndsay	Furnevel		Object to Policy SA3, sites HRS12 and HRS11. Loss of Green Belt at Penshaw would impact significantly on the local area and community. There is already too much housing development in the area and the road infrastructure (A182 and A183) cannot cope. Public transport is not adequate enough for the area. Despite recognition that the population is ageing (Strategic Challenge 1), current housebuilders are not building homes for older people- what plans are there to build extra care schemes in local area to address this? Houses being built are also not affordable housing, therefore Strategic Challenge 12 is also not being met. Level of development would have a major impact on schools and GP services (already struggling to cope at present). Increasing the population would simply stretch services further (i.e. refuse collections, street cleaning).	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
4 5 0 1	Gillian	Galbraith		Opposed to the proposed Housing Release Site at West Park on the grounds that it is a well-used amenity space which shows a commitment to health and wellbeing and it would put increasing pressure on existing roads and schools.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 0 6 9	P	Gale		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
5 9 7	Lorraine	Gallagher		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3814	Keavy	Gallagher	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the</p>

			lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. 3 9 8 0	Melanie	Ganley		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 4 5 3	Danielle	Ganning		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 8 1	Edward	Gardiner		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

				city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
7 7 5	Elizabeth M	Gardiner	Objects to Policy SA3 site HRS12 (Penshaw). 3 2 8 6	James	Gardiner	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm

					to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

				and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 7 5 1	Amelia	Gatens	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 1 9 5	Abigail	Gatherer		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of greenspace/recreation area; key role to village; loss of safe area for children.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 5 3 0	David	Gatherer		To develop housing within West Park, East Herrington is a contradiction to the need for homes and leisure whilst retaining a high quality environment - detrimental for those who use West Park, by name a place for public recreation not for development. A cherished public communal amenity for the residents of Herrington. Covenants imposed upon the land were intended to secure the perpetual use of the land as a Park. If the Council don't retain West Park for leisure our culture and everyday lives will be adversely affected.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 6 6 3	Virginia	Gatherer		Objects to Policy SA3, HRS11 (West Park). Specifically objects to: impact on archaeology; impact to landscape character; loss of greenspace; loss of grazing; increased traffic in area; increased traffic pollution; impact on wildlife; loss of community resource; new housing will impact on trees and affect their future viability; impact on road safety.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 2 4 7	Virginia	Gatherer		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: withdrawal of covenant; loss of greenspace/recreation land; loss of grazing land; loss of mediaeval ridge and furrow; impact on key gateway to city; increase in traffic and road safety; potential loss of trees from new housing; population of city is reducing- no need for all of this housing.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 4 0 4	Ralph	Gathorne		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints. 4 4 2	C	Gaughan	<p>Objects to Policy SA3-HRS12 (Land adjacent to Herrington Country Park). The site would be built up by investors with only a small proportion for social housing. Has identified many possible sites which are more suitable for development and already have infrastructure. The Council has granted permission for business uses in the city, despite the need for housing. These sites are smaller, so developers only interested in Green Belt for larger profits. Green Belt should only be developed in exceptional circumstances. Concern over impact on environment and local schools and healthcare. Changes to Green Belt and Settlement Breaks will leave inadequate separation between built up areas. Adverse impact on a wildlife corridor to the country park and surrounding areas. Concerns over impact on local road network.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 					Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 4 4 8	Janet	Gaydon		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Site will benefit privileged few, whilst most will suffer. We are encroaching on wildlife's space.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 4 5 6	Frederick	Gaydon-Lownds		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. There are plenty of brownfield sites which should be developed first.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and

					further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 6 3 2	Mrs	Geddis		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 1	Steven	Gee		Objects to proposed travelling showpeople site at Market Place Industrial Estate. Asks whether rumours of the site are true. Residents have not been consulted or informed.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
4 5 3 1	Steven	Gee		Re. proposal for a site for travelling gypsies (as opposed to showman's guild) - not beneficial to locate the site for 'travellers' at Houghton-le-Spring. Near to a children's playing area. Transients and people tantamount to vagrants living there would cause great concern, would be off limits and not safe. Local crime rate would increase.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 8 8	K	Gendi		Objects to Policy SA3 sites HRS1,2,3,6,7,11,12 and Safeguarded Site. Support for Travelling Showpeople site at Market Place, but opposes Station Rd site. Opposes proposed gypsy site at Hetton Lyons which would impact on park and car park inappropriately.	The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 7 1	Scott	Gerrard		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 6 3	Michael	Gibbon		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to potential damage that would be caused by the site on the park itself. Concerned that proposal would have negative impact on adjacent businesses.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1 4 4 0	Miriam	Gibbon- Arvaniti		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Site should be left available for enjoyment of public.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 3 4	Wayne	Gibson		Objects to proposed housing allocation at West park. Roads are already congested. Concerned over loss of park land.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
9 6 8	Barbara	Gibson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

2 8 7 6	Edith	Gibson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy

1			<p>openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 7 1 7	Margaret	Gibson	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 2 1 4	Joanne	Gibson	<p>Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. 				and negatively affect local people's health and wellbeing.	
4 2 1 6	Bradley	Gibson		I request that Sunderland City Council excludes Stephenson Lake Car Park (Hetton Lyons Ponds), at Hetton Lyons Country Park when considering establishing a transit/stop over site for the travelling community. I feel very strongly that the park is an important facility not only in our local community but also within the national sporting community and links to council's stated commitments to protect, conserve and enhance our environments and to plan for healthy communities. The loss or interference with the general public's use of Stephenson Lake Car Park and the access it provides to the country park and connected network of rights of way would be detrimental to its use and enjoyment. It will be a backward step in relation to the parks Green Flag Award. The Park received thousands of visitors from all over the country who attend major sporting events including those for cycling and triathlons as well as events such as the Annual Dragon Boat Race and Hetton Summer Carnival which raises thousands of pounds for charity. All of these events contribute to economic prosperity. Please keep me informed throughout the consultation and adoption process.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 6 6	M	Gibson		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 4 7	Marjorie	Gibson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Queries raised as to which additional sites have been considered and why discounted.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 1 5	Michael James	Gibson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 8 1	Emma	Gibson		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 4 9	M.R.	Gibson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 7 4	Pauline	Giles		Objects to Policy SA3 - HRS12 (Land adjacent to Herrington Country Park). Plenty of brownfield sites to be developed. Park should be left for residents to enjoy. Concerns over impact on traffic and parking. Concern over impact on local schools.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that

					there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
641	Wendy	Giles		Supports Vaux site. Objects to all Green Belt sites and Safeguarded Site, plus all Travelling Showpeople and proposed gypsy sites. Specifically objections to HRS1 leading to more traffic and safety concerns; HRS7 loss of children's recreational fields; HRS11 increased traffic and road safety, quality greenspace; HRS12 construction disruption, traffic increase, loss of open countryside.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
272	Wendy	Giles		Supports the development of the Former Vaux Site. Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park on the grounds that it should remain as Green Belt and has ecological value and West Park should remain as Green Belt. Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3500	John	Gilling		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1432	Jack	Gillum		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on coast to coast cycle route.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess

					capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 5 6 5	Richard	Gilroy		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 5 3 2	Robin	Glass	<p>Objects to plans for housing on West Park, Middle Herrington on the grounds of: roads/highways infrastructure inadequate to cope with traffic increase from 70 extra executive 4-bedroom homes; pollution and air quality; extra junction would make congestion and road safety worse, dangerous for vehicular and pedestrian traffic, against aims of the Local Transport Plan to address safety, security, health and quality of life; school structure in East Herrington primary can't deal with the extra students, already over-subscribed primary academy with little room to expand without ripping up the playing fields - unacceptable to students' welfare; negative effect on the internal and surrounding areas of the park; removing ancient trees would result in loss of habitat for wildlife, destroying home to kestrels, bats, squirrels and buzzards; ancient ridge and furrow markings suggest archaeologically important, not been surveyed; West Park is not recognised as a park in these plans, even though listed as such on the council website; misrepresents the usage of the park and local recreational area. Hypocrisy against comments by Cllr Michael Mordey re. importance of providing green spaces - should maintain these standards and leave the park alone for the people of Herrington. Concentrate plans for development within the city centre and river area, many sites in need of development including brownfield sites which should be developed first, rather than beautiful areas at Penshaw and West Park. Dismiss West Park from</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>

				the CSDP to allow the people of the Herrington's to enjoy it as a park, as it was left in trust by the NCB and Sunderland council in the 1960s in perpetuity! The detriment to the area and its inhabitants hasn't been accurately assessed.	
1047	Gayle	Glass		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2787	Shirley	Glass		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. 1 5 0 3	Wendy	Goldsmith		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on growing food in the local area. Protecting local habitats.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4 2 2	Duncan	Goodfellow		<p>Supports Vaux allocation. Objects to proposed SSGA sites at Chapelgarth and Land North of Burdon Lane. Objects to housing release site HRS11 (West Park) due to the unnecessary use of green belt. Questions the need for executive housing in the area. The school is already beyond capacity and the road network is unsuitable</p>	<p>In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure</p>

				for access from West Park or Silksworth Lane. Does not believe that there is a housing need. Land is being sold for greed.	provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
500	Goodfellow	Goodfellow		Objects to Policy SA3 site HRS11 (West Park). Specifically objects to: loss of parkland; traffic increase and road safety; school capacity; other available waste land (rear of Clinton Place).	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2639	Caroline	Goodfellow		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each

				development	
4067	C M	Goodfellow		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3854	Lisa	Gooding		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 4 0 4 9	J	Gordon		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 0 7	Linda	Goshorn		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 4 3 8	Dylan	Gough		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

				<p>and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an on-going national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>
1 1 6 1	Bethany	Grace	<p>Objects to Policy SA3 site HRS12 (Penshaw). The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out</p>

					within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 3 3 7	Rebecca	Grace		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 0 1	H	Graham		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. 					included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 1 7 9	R	Graham		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 5 1 3	Jade	Graham		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Enjoy looking at countryside and wildlife.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 2 4 1 8	Robert	Graham		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 6 5 1	Ian	Graham	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 8 4 8	Margaret	Graham	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 5 3	Lindsey	Graham	Opposed to Housing Release Sites at Springwell, James Steele Park, adjacent to Herrington Country Park and New Herrington Working Men's Club.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks

					<p>but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an on-going national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, he Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. Development in the existing urban areas is the priority of the Plan the council has</p>

The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. There are numerous trees on the site which are protected by Tree Preservation Orders therefore the site will be carefully designed to preserve them unless individually they are considered to be dead, dangerous or dying at the time of development. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP.
1 4 6 6	Alan	Grainger	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. There must be more sites available than this one.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 9 9 3	Irene	Gransbury	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the

			<p>village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. 29	Diane	Gray		Supports the development of Cherry Knowle and South Ryhope. Is opposed to the development of the Gypsy and Traveller site at Leechmere as it is next to a residential area and concerned that it is next to a care home. Also Leechmere road has lots of accommodation for elderly residents. The elderly are vulnerable and travellers could add to some of these residents anxieties Leechmere Road and Toll Bar Road are extremely busy. Extra traffic would add to the congestion. Believes that the proposed site at Hendon would be more suitable as it is further away from residential properties.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
480	Emma	Gray		Objects to Policy SA3 - HRS1,6,7 and 11. For HRS6 (James Steel Park) it would be sad to lose this attractive green space which could be better developed as parkland. For HRS7 (Southern Playing Fields) the site is well used for recreation and helps to keep people healthy. Feel that the consultation has been inadequate. Impact on schools and doctors. There is a lot of brownfield land and wasteland that should be built on first.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
691	Phil	Gray		Supports Vaux site. Opposes SSGA sites North of Burdon Lane and at Cherry Knowle. Supports HRS sites 4,13, and 15, but opposes sites 2,3,6,8,9,10,11,12,14 and Safeguarded site. Opposes both travelling showpeople sites. Supports proposed gypsy sites at Hendon and Leechmere but opposes site at Hetton Lyons. Specifically objects to Hetton Lyons due to: proximity to local businesses; restricting car park capacity and visitors to country park; safety issue with traffic; impact on fishing and weekend users of park.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated

					costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 3 3	Brian	Gray		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 1 4	J	Gray		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 6 4 6	Karl	Gray		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which</p>	

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3721	Phil	Gray		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4002	J	Gray		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4017	F	Gray		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. 2 7 6 3	Andrew	Greener		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 4	William	Greener Blackett		Objects to Vaux, all SSGA sites, all Housing Release Sites, the Safeguarded Site and all Gypsy and Traveller sites. Object to Vaux	The Vaux is allocated in the Publication draft for office and residential development. In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site

7				proposals on architecture grounds. Objects to scale of housing development which is not justified as population has been declining. Development should be limited to infills where previous housing once stood. Specific objection to West Park site - rescinding of covenant proposed. Safeguarded land- greenbelt should be protected for the future not for short term profit or unnecessary targets.	will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1091	Elaine	Greenhow		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3918	Ian	Greenhow		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4189	Greg	Greenhow		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
181	Anne	Greenwell		Opposed to the Housing Release Site at West Park. Believes there would be an increase in traffic and opposed to the loss of recreational space.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
6	Carole	Greenwell		Objects to Policy SA3 - HRS12 (Land adjacent to Herrington Country	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of

80				Park). Concern over impact on roads, schools, shopping and GP facilities. If building is unavoidable the number of dwellings proposed should be halved.	housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 1 2 1 9	Ken	Greig		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3030	Mary	Grey		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4321	W	Gribbin		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1171	V	Grieves		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 0 9 2	Michael Gerard	Groarke		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 9 1	Paul	Grocott		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 7 1	S	Groves		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status;	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.	
3086	M	Gudgeon		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. 					assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 1 7 8	R	Guy		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 9 5 3	Claire	Guy		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 				Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 5 6 5	Rachel	Guyll		Object to proposed West Park development proposal. There has been no architectural or historical investigation of the site. The legal restriction prevents the proposed development. No study has been conducted in relation to the sites conservation importance. Policy fails to address current road capacity. Number of smaller residential sites have not been considered. Fails to take into account the housing market as a whole. Concerns over Pennywell site not being developed. Recent residents objections to other plans within the area have been ignored. Council refused to make an application for Village green status. Concerns over lack of consultation information to residents.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 0 8 0	Watson	H		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought.

					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 5 5	J	Haig		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. 6 5 7	T	Hall	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the

			<p>village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
7 3 9	Lisa	Hall	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Wildlife and countryside would be destroyed.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate</p>

					any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1003	David	Hall		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Park not a suitable location.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 4 4 3	William Andrew	Hall		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised

					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 2 9 3	Carolyn	Hall	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport</p>	

					Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3390	Denise	Hall		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

			Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Enjoys the wildlife and walks.	the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
9 9 3	Jason	Halliday	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 1 1	Victoria	Halliday	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 3 1	John	Hall-Williams	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The Council has adopted a tolerance policy.
1 4 8 4	Maureen	Hamilton		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to

			<p>impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

80	Peter	Hannah	Opposed to the Housing Release Site at Southern Area Playing Fields. Believes that the site provides much needed playing field amenities. Will be very car dependent as there is no public transport facilities and existing houses would have to be demolished to provide access. Additional traffic will put increasing pressure on existing roads, schools and GP surgeries.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
3667	Kelly	Hannah	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3666	Darren	Hannah	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2015	Denise	Hannan	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised</p>

				<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 7 6	Gillian	Hanratty	<p>Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The conclusions of these assessments are sets out in the Development Frameworks.</p>
1 6 1 8	T	Hanratty	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. A lot of history in this area. Too beautiful to lose.</p>	<p>Comments noted. The noise that would be generated during the construction of the site would be temporary and hours of work can be</p>

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 2 1 3	Linda	Harbottle		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 6 0 8	P N	Hardy		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. This part of North Hylton should remain untouched. Enjoy walking in this area very much.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2872	Emma	Hardy		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The Council has adopted a tolerance policy.
4 0 9 0	Lee	Harnett		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status;	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.	
1 1 4 2	Sarah J	Harrington		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 7 3 7	Lisa	Harris		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

4 5 5 1	Nigel	Harrison	Tyne and Wear Joint Local Access Forum	HRS1 - the proposed pedestrian connections to the western edge of the site should be made available for all Non-Motorised Users (NMUs). HRS2 - The Right of Ways to the eastern side of the site should be upgraded and made suitable for NMUs. HRS3 - The routes designated as 'pedestrian movement' should be made suitable for all NMUs. HRS4 - The Right of Way between the site and the A194(M) should be improved and the Right of Way crossing the site be enhanced and remain separate from the estate pavements. HRS5 - The Rights of Way to the south and east of the site should be upgraded for all NMUs. HRS6 - A footpath with footbridge over Oxclose Burn should be provided on the south side of Bonemill Lane. HRS7 - The current Right of Way adjacent to the site should not be diminished. HRS8 - Pedestrian routes within the site should be suitable for all NMUs. HRS9 - Pedestrian routes within the site should be suitable for all NMUs. HRS10 - Pedestrian routes within the site should be suitable for all NMUs. HRS11 - The existing pedestrian route from Parkside to West Park should be preserved and improved to be suitable for all NMUs and not merely part of an estate pavement. HRS12 - The opening of Chislehurst Road to New Herrington and Philadelphia will increase traffic on A184 to detriment of NMUs. To alleviate this a Pegasus crossing should be installed. No motorised access should be provided from the development into Herrington Country Park. HRS13 - Pedestrian routes within the site should be suitable for all NMUs. HRS14 - The development should respect the Right of Way adjacent to the site. HRS15 - Pedestrian routes within the site should be suitable for all NMUs.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
8	S	Harrison		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further

5 2				The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 4 4 4	P	Harrison		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 6 3 1	M	Harrison		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that

			<p>the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
1 7 6 3	William	Harrison	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Would have a detrimental effect on the area.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing</p>

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1988	Allen	Hartridge	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 5 6 9	Joan	Harvey	Pawz for thought	Object to removing land north and west of Ferryboat Lane, North Hylton from the Green Belt. Fail to understand how Stage 1 set out that the site is unsuitable for residential and now proposing to remove it. Development of the site would be urban sprawl. Part of green infrastructure corridor, of which it would have an adverse impact upon. Part of Strategic wildlife corridor, which is already narrow at this point. Adverse impact upon this. Core Strategy emphasis importance of Green Belt Topography of the site may render site difficult to develop. Destruction of the natural and attractive landscape adverse impact on inward investment. Site has many attractions as a Green Belt site. A number of environment policies are set out in relation to this site. Inaccessible site with regards services and not meet policies CC1 and CC3 of the plan. Due to the slope of site potential surface water management issues. Request to speak at examination should site be taken forward.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
3 7 5	Sarah	Harvey		Objects to proposed housing release sites HRS11,12 and 13.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. 					the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. There are numerous trees on the site which are protected by Tree Preservation Orders therefore the site will be carefully designed to preserve them unless individually they are considered to be dead, dangerous or dying at the time of development. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP.
1 0 1 0	Michael	Harvey		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 4 9	K	Harvey		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 5 8 3	M F	Harvey		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 9 1 1	Louise	Harvey-Golding		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 8 9 0	Alan	Hassan		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 640	Michael	Haswell		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3118	S	Haswell		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2	Pat	Haswell		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to:	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance

6 2 7			housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 4 2 0	Robert	Haswell	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 5 9	Helen	Haswell	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2	Will	Haughan	Objects to proposed gypsy and traveller site at Hetton Lyons pond	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need

9 5				and proposed travelling showpeople site at Pearsons Industrial Estate. The proposals would use up land which should be used for new businesses. Closing the car park would discourage use of the country park and adversely impact on health and well-being of residents. Inner urban areas are better suited for a transient community. Hetton is a stable and established semi-rural community.	for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 0 4	Jordan	Hauxwell		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 2 6	D	Hawdon		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

				<p>forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Green Belt should be there for grandchildren and great grandchildren.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
4 5 7 0	Julie	Hawthorn	National Trust	<p>Concerned that the impact of proposed HRS12 and the development of 400 dwellings within the vicinity of Penshaw Monument (which the National Trust owns and manages) is likely to have a potential adverse impact of the setting of this Grade 1 listed building. Appears to have been no heritage assessment undertaken that includes any reference as to the setting of the site within the view of Penshaw Monument. Reference is made to the relevant acts and requirement within it. The green belt assessment gives no consideration to the proximity of the Penshaw Monument as a heritage asset and its setting not to the 'special regard' that must be given. Concern over the encroachment into the setting and increasing urbanisation that will result in the surroundings near to the monument. Unclear within the SA as to whether the monument has been included within the assessment.</p>	<p>The publication draft includes additional policies on Heritage Assets.</p>
1 1 4 8	David	Hawthorne		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 0 3 9	June	Hay		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 3 8	James O	Hayes		Objects to proposed gypsy site at Leechmere. Specifically objects to: site being unsafe for gypsy families due to traffic in industrial estate; poor environment in general.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 5 9	Mark	Hayton	Timberpak	Object to Policy SA3, site HRS6, though it is clear from the comments that the objection relates to HRS8 (Glebe House Farm). Specific objections relate to their existing operational business which creates numerous large wagon movements into site and on Staithes Rd, and together with Faurecia the road is already congested without housing being developed opposite. Object to housing also due to inevitable noise, dust and heavy vehicle traffic from business operations that will lead to complaints. Object to location of housing within an industrial area, where businesses have deliberately located to avoid residential impact. The business has plans to expand, but is concerned that this development could impact on future proposals significantly.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, he Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead. This site has been discounted following the Green Belt Review and in response to consultation responses.

2 8 6 4	Richard	Hayton	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 1 2 1	Paula	Hayton	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 3 7	Paul	Haywood	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport</p>

				Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
7 7 4	Linda	Heaney	Objects to Policy SA3 site HRS11 (West Park). Specifically objects to scale of development, local environment, school capacity, road traffic, noise.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 4 1 5	Joshua	Heaps	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 5	Alan	Heavinden	Objects to Policy SA3, site HRS11 (West Park). Specifically objection in relation to: withdrawal of covenant; effect on wildlife;	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be

4					at odds with the recommendations set out in the Greenspace Report.
1 8 5 2	C R	Hedges		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Need to keep cycle route green and accessible.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and

					further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 7	David	Hedley		Opposed to the Gypsy and Travellers sites at Hendon and Leechmere	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy
4 2	Laura	Hedley		Supports all of the South Sunderland Growth Area Sites except Chapelgarth where no opinion is offered. Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites except Hetton Lyon where no opinion is offered. In relation to Leechmere concern is raised regarding the arrival of travellers often brings with it increased levels of crime. This area is also near to a residential home for the elderly, who are often vulnerable.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
3 8 5 8	Victoria	Hedley		Objects to removal of sit HY2, land north and west of Ferryboat Lane from the Green Belt - was assessed as being integral to the Green Belt and unsuitable for development in Green Belt Review Stage 1 and then considered at later stages to be perfect for building houses on. Contradictory to policies E1, E4, E5, E6, E7, E8, E11, E12, E13, E14, E15, E16, E17, E18, CM1, CM4, CM5, SA3. Currently Green Belt land made up of 2 large agricultural fields separated by a stream and wildlife corridor, and surrounded by 2 main A roads. Wildlife habitat, rare view of nature and countryside, alongside C2C cycle route. Set in a tiny hamlet, 300yr old pub, no shop. Building 135 houses would destroy character of the area, ruin views. Few places of pure nature in North Sunderland outside of this hamlet for wildlife or trees. Natural habitat for plants and wildlife will be lost. Owls, hawks, bats (protected species), foxes, grey partridges, and otters in the river nearby - would lose many great assets to our local ecosystem. Building on these fields would close the gap of a settlement break. Agricultural land and food source, self-destructive to pave over it, especially given mass building on what was Green Belt and agricultural land between Washington and A19. More houses equals more cars, executive houses won't rely on public transport (no bus service). More pollution. Fields sit higher than every dwelling in the area, prone to flooding, surface water run-off flowing down the road into the river, where will water go when concrete/tarmac on the fields instead of slowly draining through the land? Quality of life of residents and visitors is currently of contentment. No recorded crime. New estate would attract unwanted attention and opportunist criminals. New houses close to two busy A roads - noise and air pollution, noisy boarding kennels close by. Currently minimal light pollution, will be lost with lots of street lighting in new estates. Residents of North Hylton who will be affected were only consulted weeks before the deadline date, disgruntled by huge and abrupt changes.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
2 7 5 0	Emma	Hedley		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

				<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 4 0 7	Shirley		Henderson	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
3 8 4 0	Laura		Henderson	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. The council has identified sites throughout the city to accommodate approximately 90% of housing

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 8 3	Adrian	Herbert	<p>Objects to Policy SA3 - HRS11,12 and 13. For HRS12 (Land adjacent to Herrington Country Park). Would no longer be able to walk children to the field to see animals. Concerns over impact of additional traffic. Do not wish to live on a building site. Impact on wildlife. Concerns over impact on schools. Increased demand for GP surgeries. There are already lots of houses being built in this area. There are also a lot of brownfield sites nearby, which should be rebuilt. The purpose of Greenbelt land is to ensure that the whole countryside is not built over.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3105	Robert	Heron		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to: impact on wildlife/biodiversity; use of car park constantly by fishermen and also by visitors; impact on regional events; use by schoolchildren for education programme; impact to emergency access; future development of park.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
728	Nicola Ann	Heron		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess

				capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.	
3 6 9	The WI	Herrington		Objects to Policy SA3 - HRS11 (West Park). Small amount of green space available in the area and West Park gives the area a semi-rural feel. Concerns over traffic impact. Local primary school is already full to capacity. The site is a recreational area. Loss of park will affect people's well-being. Local Scouts, Cubs, Rainbows and Brownies all use the park for outdoor activities.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 4 2		Herrington Village Show Committee		Objects to proposed housing on West Park. The park was established for open space when transferred to the Council in 1967. It makes a unique contribution to the diversity of landscape. The park defines our community and gives identity to the communities of East and Middle Herrington.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 8 6 2	Lewis	Herron		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2	Gillian	Hesler		Opposed to the Housing Release Site adjacent to Herrington Country	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of

7				Park. Believes that any building on the site would severely affect views from within the park and surrounding areas and wildlife that has been attracted to the park. Also Chester road is already one of the busiest commutes in the city and these proposals would only exacerbate the problem. Believes that schools in the area are already struggling to cope with the number of pupils and children are being forced into attending schools outside their own catchment area and that doctors surgeries are at full capacity. Main objection is that the council are proposing to build on more of "England's green and pleasant land" and once approval is given and houses are built it will never be undone and the geography of the local area will be changed forever. Opposed to the proposed Gypsy and Traveller site at Hetton Lyons.	housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 3 0 9	Melanie	Hetherington		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
2 6 3 3	DJ	Hetherington		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which</p>

					has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The Council has adopted a tolerance policy.
4 1 8 0	L.J	Hicks		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 0 2	Philip	Higgins		Objects to Policy SA3 sites HRS1,2,3,4 and 5, but supports Safeguarded site.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Sprinwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will

					be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
1066	Philip	Higgins		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
109	Christopher	Hill		Objects to proposed Housing Release Sites HRS6, 7, 11, 12, 13, 15 and the proposed safeguarded land. Concerned about the impact of HRS12 on road congestion, road safety and school capacity. The area is beautiful land which would be lost.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

					by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
8 8 2	Martha Dorothy	Hill		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1	Natalie	Hill		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to:	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance

2				<p>housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any

					potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 9 2 9	R	Hillier	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are

					within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
