931	J	Maddison		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
277	Leon	Maddison		Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park as believes there are sufficient alternative sites and the sites has ecological value.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
31	M	Maddison		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities;	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt,

7 3				impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 2383	Wayne	Majnusz		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

				<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the</p>

				development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 2 7 5	Jeanette	Malloy	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

				and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 2 3 8	Julie	Markham	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1994	D	Markham	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
574	Victoria	Marland	Objects to Policy SA3 site HRS12 (Penshaw). Specifically objects to: loss of agricultural land; grazing animals; loss of open countryside; affordable houses are needed; school capacity.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 2 2 4	Linda	Marriott	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
1 4 4 9	Chloe	Marron	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to</p>

			<p>impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>buy a new home. 4 9 4	Cameron	Marshall	Doxford Park and Tunstall Residents	Objects to SSGA site North of Burdon Lane. Specific objection relates purely to proposed bus only link on Burdon Road.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document.

3 5 2 2	Ruth	Marshall		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 0 0	R	Martin		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 7 8	Neville	Martin		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 5 6	George	Martin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

				lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1080	Bev	Martin		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
402	Paul	Martin		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1473	Elizabeth	Martin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2040	E	Martin	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

4012	June	Martin		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4117	Lauren	Martin		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
221	Andrew	Mason		Objects to Gypsy site at Hetton Lyons. Objects to impact to car park and country park, which will affect regional recreational resource, and despite proposals to protect these valuable sites. It would detrimentally affect holding major events in future and would affect potential to retain Green Flag status. Object to access impact into park (rights of way).	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
849	Billy	Mason		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
290	Alan	Mason		Objects to proposed Housing Release Site HRS12. Impact on local resources, healthcare, roads and schools. Concern over use of green field site instead of brownfield land. The site acts as a buffer between housing and the country park.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat

				survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 6 4	E P	Mather	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 2 8 7 7	Paul	McAdoo		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 8 7 9	Natalie	McAdoo		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing</p>

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4055	Paul	McAllister	<p>Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.</p>	<p>Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised</p>

					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 2 3 0	Kevin	McBride	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. 4304	Elle	McBurnie	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3056	Iris	McCabe	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better</p>

			<p>housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

8 0 4	Kelly	McClay		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1	Amy	McConville		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of

901				<p>relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution</p>	<p>housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.</p>
1691	Maureen	McCourt		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport</p>

				Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 2 8 5	Steven	McGill		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each

					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 3 8 9	Carol	McGlinchey		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 8 9	Ross	McGorman		Objects to Policy SA3, site HRS12. Objects to: loss of site that provides opportunity for children to see farm animals; loss of wildlife; road system cannot cope; impact on local school capacity; greenfield development when numerous brownfield sites exist in city; scale of development taking place in North Coalfield in last 5 years but without significant infrastructure investment; not justified since Sunderland's population has been declining; most people in area do not want development to go ahead.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
3 5 5 3	Edward	McGourley		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 1 7	Laura	McGowan		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm

					to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 4 4 5	John	McGregor		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 7 6 4	F	McInnes	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised</p>

					<p>following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are set out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Council's evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2606	A E	McKeon	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining</p>

			<p>accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. 2089	Marc	McKinley	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
3157	Amanda	McLaghin	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2023	David	McManus		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2018	Norah	McManus		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
3 3 2	Kay	McNeil		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. Limited access to green space in the area. Impact on the economy. Concerned that due to distance from the city centre the site is perceived to be the 'easiest option'.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 8 3 7	L	McNichol		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential</p>

				impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. There are numerous trees on the site which are protected by Tree Preservation Orders therefore the site will be carefully designed to preserve them unless individually they are considered to be dead, dangerous or dying at the time of development. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP.
265	Jennifer	McNish	Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of greenspace for the community; loss of greenspace affecting mental health and wellbeing; development adding to traffic pollution; A690 is already very busy; Herrington Road traffic is intense and fast; loss of mediaeval ridge and furrow. Also concerned about potential development north of Middle Herrington which would impact on ridge and furrow, Roman remains, the Scheduled Ancient Monument	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3072	Jennifer	McNish	Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: further narrowing of Green Belt gap; executive homes not needed- social housing is needed; sites are on the city periphery instead of centre of city; knock the civic centre down and put housing on it instead; loss of ridge and furrow; wildlife impact; impact on mature trees; loss of settlement break; further traffic congestion; impact to A690/A19 roundabout; construction traffic impact.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2853	Jennifer	McNish	Objects to proposed Housing Release site at West Park. There are no exceptional circumstances to justify Green Belt deletion. Government has published consultation on housing need with a 23% lower requirement. Trees and open space have positive health benefits. Concern over wildlife impacts and impact on trees. Conflict with Strategic Challenge 3, as the site is used by local schools. Concern over traffic impacts. Questions need for more housing. Development should be focussed in city centre and empty properties brought back into use. West Park is a medieval site with ridge and furrow. The site has a legal covenant to be retained for recreation in perpetuity. The site has been a well-used recreational space for a number of years.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4543	Jennifer	McNish	Protests at building 70 houses on West Park. Green Belt incomplete information, Greenbelt was eroded covertly by a non-consultative action in October 2016. Only 14 land developers responded. Government state that only if real economic need can you get rid of Greenbelt - nothing exceptional here. Government needs 23% lower than previously thought. Cllr Michael Mordey said people need places to enjoy rest and recreation. Housing Minister supports lungs around a city, university research proves trees prevent asthma/lung problems. Advantages of trees and fields from psychological point of view - we need a settlement break, West Park is part of this. Habitat West Park is home to at least 4 species of bats (protected species, costs of removal), grey squirrels, birds, flora and fauna. Nesting rooks. Old trees - guarantee none will be removed? park is used for schools biology and art field studies. Nearby primary schools are full. Could affect educational attainment (Strategic Challenge 3). Traffic building 70 houses valued >£600,000 will not bring executives here, where is the work? If do come they will travel out, more traffic congestion - traffic counts? Estate agents - no requirement for 70 luxury or any standard homes. Build in the city centre build where people can walk to work, helps traffic congestion and makes a more lively city centre with larger customer base for	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

				businesses, to improve viability, infrastructure already there. Empty boarded-up properties all over town, leave Victorian frontages in place, empty offices and factories. Build flats on Vaux site. West Park is a Medieval site - ridge and furrow, should be protected with preservation order. Clause negotiated to retain it for the recreation of residents in perpetuity. Many personal memories. Need open spaces for opportunities to draw the community together. Don't put more traffic along Herrington Road, difficult to cross the road and a crossing has been refused by the Council. 70 high-value houses will mean 150-200 more cars, access from Herrington Road will cause more congestion.	
4 5 4 4	Ingelise	McNulty		Oppose HRS11 - CSDP should be altered and resubmitted. Park was given to the people of Herrington in perpetuity, covenant cannot be lifted just like that. Part of the Green belt, can only be built on in very exceptional cases - regulations do not consider building 7-0 houses to be a reason to use this land for housing. Historical value - ridge and furrow. Asset to the city - Sunderland CC obliged to mitigate the loss of this open space - impossible to replace this ancient park land so mitigation cannot be fulfilled. Park creates a healthy environment, open space to play, walking, tranquil space good for body and mind. Several mature trees will have to be removed having great impact on the environment. Tree preservation orders? Many traffic problems - 70 houses will generate increase in traffic at roundabouts, at least 2 cars per executive household. Highways England have concerns. NPPF point 89 - should regard the construction of new buildings as inappropriate in Green Belts. Obligated to look at all brownfield land and make sure this has been used before consider using Green Belt land. East Herrington Primary School already 2-form entry, not possible to expand it. GP practices all at maximum capacity, no pharmacies close by so have to use car of public transport. Flooding at north side of the park, so drainage system will have to be improved.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
2 9 1 7	Ingelise	McNulty		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: withdrawal of covenant; loss of parkland/greenspace that cannot be mitigated for; brownfield land that should be developed; should focus on developing land that has less environmental value; loss of historic parkland; loss of ridge and furrow; impact on local health; mitigation for loss of this land is impossible; impact to sewers and area already susceptible to flooding; mature tree loss; wildlife impact / protected species; traffic impact; traffic pollution; school capacity; impact on GP Surgeries.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 5 4 5	Michael	McNulty		Opposes CSDP HRS11 Policy HY3 Housing mix and 8.14 - if 70 larger detached dwellings are built at West Park the positive (scenic) externalities will be enjoyed by a few hundred people at most, while the negative externalities of having this unique special site taken away will be suffered by >5000 people (based on petition submitted). Becoming part of expanding urban sprawl in a not attractive city. Operation of local private housing markets hasn't been taken into account. Development most likely to attract a small number of more affluent residents into 'trading up', freeing up less desirable houses further down the housing ladder, rather than attracting executive workers into the city to live. Analogy from labour markets - if another car factory was built in Sunderland, again 'trading up' in the jobs market would occur, it wouldn't be the unemployed who would be directly employed. Is there irrefutable	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

			evidence that this will not occur?	
2937	George	McPeake	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2940	Tracy	McPeake	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to</p>

			impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 2706	A	McRillup		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.

809	Andrew George	Meadows		<p>Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
2064	Natalie	Meddes		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2	Bailey	Mein		Opposed to the proposed Housing Release Site at Ferryboat Lane on	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of

035			<p>the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. 2057	I	Metcalf		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 				to economic prosperity; would affect the Parks'	
8 2 0	Richard	Metcalfe		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 4 3	Tracey	Metcalfe		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 6 4 7	Hilary	Metcalfe		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of historic parkland and ridge and furrow; withdrawal of covenant; loss of greenspace/recreation land; loss of grazing land; loss of wildlife; impact on village character; increased road traffic; impact to road safety.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 4 0	Kenneth	Metcalfe		Objects to Policy SA3 - Site HRS11 (West Park). Lack of community facilities in the local area. West Park is local community asset for grazing cattle and recreation. Proposal would lead to further inequality, to satisfy Govt edict or allow developers to make large profits. If parkland is required consider using part of a larger park where the impact would be lower.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 3 8	Kenneth	Metcalfe		Opposed to the proposed Housing Release Site at West Park on the grounds that there is other Green Belt land available, questions the ownership of the site, loss of an area for sports, increased pressure on local roads, the site has high historical, ecological and recreational value.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 0 0 0	Linda	Metcalfe		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
6 7 8	Scott	Metcalfe		Objects to Policy SA3 - site HRS11 (West Park). The site is a public and community space that allows children to observe animals in their natural environment. The site has historic significance including ridge and furrow. Concern over loss of trees. Adverse impact on flora and fauna. Damage to important gateway to the city. The	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

				Transport Assessment shows that the junctions would not have sufficient capacity, causing congestion and pollution. Concern over pedestrian safety. Impact on local primary school. The plan is focussed on Greenbelt land and makes no mention of using brownfield sites - Greenbelt should be last resort. Concerns over consultation process. Suggests following sites as more appropriate; Coles cranes site, Sunderland High School site, factories next to Stadium of Light and the city centre (abandoned buildings).	
4 3 6 4	Danielle	Metcalfe		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 0 3	Samantha	Metters		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; intimidation and will ruin a tranquil/peaceful area, esp. for fishing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 6 8	Wetherell	Michelle		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 2 4 8	Neil	Middleditch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 7 0		Middleditch		Opposed to the proposed gypsy and traveller site at Hetton Lyons on the grounds that it will have a detrimental impact on the area and the angling club will no longer be able to use the lakes. Questions how the consultation has been carried out.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 5 0	Neil	Middleditch		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 5	Neil	Middleditch		Objects to proposed gypsy site at Hetton Lyons. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The

2				access in general to the country park.	Council has adopted a tolerance policy.
4 2 0 9	S	Middlemass		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 5 7	Douglas	Middlemiss		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: increased road traffic; historic parkland loss, loss of grazing; other brownfield sites that should be developed first.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 9 5 9	Susan Jane	Middlemiss		Concerned about plans for building houses on West Park in Herrington and building on precious greenbelt. Green fields and trees clean the air pollution from traffic - considerable in this area. Green space also aid mental health, benefits of 'the green gym'. The Park is a beautiful entry to our city - especially when striving to become City of Culture - long history of being used as pastureland. The road adjoining the Park is already too busy, dust and dirt will make roads more dangerous. Air quality is not good but trucks will make it worse. There are plenty of brownfield sites, why despoil a beautiful green space?	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 5 6	F	Middleton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 0 8 6	Kathleen	Middleton		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site

				frameworks.	
1 4 8 2	William	Midwood		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 9 3	Steven	Milburn	Objects to Policy SA3 site HRS4 (Golf Course) but supports HRS11 (West Park), HRS12 (Penshaw), HRS13 (Herrington WMC) and HRS15 (Philadelphia). Opposes both travelling showpeople sites. Supports proposed gypsy sites at Hendon and Leechmere but opposes site at Hetton Lyons.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
2 2 6 5	Anne	Milburn	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site

					frameworks.
2 7 7 1	Ian	Milburn		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 9 8 9	Edward	Miller	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The</p>

					noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 7 1 9	K	Miller		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 1 2 5	Shelby	Miller		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 7	Katrina	Milley		Objects to proposed Housing Release Sites HRS1, 2,11 and 12. West Park should be left for beauty and all to use. Leave nature alone and use brownfield areas. For HRS12 this would spoil a beautiful area with houses that are not needed, concerns over additional traffic and impact on local facilities. Also objects to proposed gypsy and traveller site at Hetton Lyons Ponds.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 9 3	Christine	Mills		Opposed to the Housing Release Site at West Park due to the aesthetic value and historic use of the parkland, the availability and quality of public green space and the effects of increased traffic congestion	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 9 0	Peter	Mills		Opposed to the Housing Release Site at West Park due to the aesthetic value and historic use of the parkland, the availability and quality of public green space and the effects of increased traffic congestion	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 5 6	Rachel	Mills		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4552	C	MILNER		Would like safeguarded land to be allocated for development within this Plan period. Green Belt Assessment should be updated to reflect new road improvements to A1290. The land to the south of the new road, no longer functions in any way in relation to Green Belt and potentially could be opened up for development. The triangle of	The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base.

				land to the north of this new road does not serve Green Belt functions and should be opened up for development and would round off the settlement. Green Belt Stage 3 does not recognise that SHLAA site 401 has been subdivided into 3 parcels. If considered separately, a number of the assumptions would not apply to site 401A. There would be two accessed provided to the site, neither of which would need to cross the Local Wildlife Site. Feel that site 401A could deliver housing in the short-term either individually or part of a larger proposal.	
1 1 1 4	John	Milner		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 2 4 2	Alan	Minnican	Opposed to the proposed Housing Release Site on land adjacent to Herrington Country Park, Penshaw. Brownfield sites in Washington available - industrial estate business premises at end of their working life. Building on Green Belt for easiness to avoid clearing sites to maximise profit, total disregard for the Green Belt, environment and residents. Traffic - 400 houses, 2 or more vehicles per household, peak times at strategic points, do the maths.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 9 6 5	Corey Lee	Minnican	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
				The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and

				<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are

					within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
188	Graeme	Moffitt		Opposed to the proposed Housing Release Sites at Springwell. Asked 3 question which would preferably like answered before attending a drop in event. Believes that the proposals in the report change the identity of the village and that the existing road network would be put under increasing pressure.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
3010	Graeme	Moffitt		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. 2 2 5 2	Bryan	Moffitt	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the

			<p>people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The conclusions of these assessments are sets out in the Development Frameworks.
296	Billy	Moore		Objects to the South Sunderland Growth Area, all proposed Housing Release Sites, the proposed safeguarded land and travelling showpeople sites.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
195	Jill	Moore		Opposed to the House Release Site at Southern Area Playing Fields. Opposed to the loss of open space and believes that brownfield land should be used before Green Belt.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1200	William	Moore		Objects to Policy SA3 site HRS12 (Penshaw). Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4042	Eddy	Moore		<p>Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.</p>	<p>Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
537	F	Moralee		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
5 4 6	Natalie	Moralee	Objects to Policy SA3 sites HRS1, HRS2 and HRS3 (Springwell), HRS11 (West Park), HRS12 (Penshaw), HRS15 (Philadelphia). At HRS12: Specifically objects to levels of growth forecast compared to current demand; questions whether Philadelphia is part of the overall housing supply, why Coalfield area takes more than fair % of housing. Also objects to: school capacity; GP Surgeries/NHS; traffic levels/road safety; brownfield register only has 15 sites; some brownfield sites are not being prioritised; impact on wildlife; impact on open countryside; setting on Penshaw Monument setting. HRS15 specifically objects to suggestion that Government previously agreed the site was not to be developed.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Sprinwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
2 0 8 7	Leon	Moran	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive

				zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 6 9 6	Julie	Moran		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 9 0	Lee	Moran		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5	Rachael	Mordecai		Opposed to the proposed Gypsy and Traveller site at Leechmere. Believes that there could be an increase in crime in the area. Disappointed with the level of consultation that has taken place.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 8 1	Michael	Mordey		Objects to proposed gypsy and traveller site at Hendon. Sewer in site will reduce usable area and cause health and safety concerns. Site also contains telecoms substation. Reduced site size would not be able to accommodate required vehicles and provide turning circle. Topography of site would make development costly. Safety concerns for families using the site due to surrounding industrial uses. Site is located within Port blast zone. Adverse impact on local businesses. Site is already leased and provides small income. Concerns over management of the site. Site may not be usable when port access is delivered. Sites 4, 11/12, 16, 18/19, 25, 34, 65, 88, 87, 112, 48, 77, 80, 93, 102 and 106/107 all have similar issues. Believes that sites should be located close to existing communities rather than in industrial estates.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 6 1	Michael	Mordey		Objects to proposed gypsy site at Hendon Industrial Estate. Specifically objects to: site requiring 24-hour access by Northumbrian Water Ltd to major sewerage inspection chambers, and telecoms substation which would drastically reduce available land for gypsy purpose; sewer gases from these chambers could prove dangerous health risk to gypsies; cost to create site due to topography; not suitable to children living there- heavy industry and heavy industrial traffic; within Port blast zone; negative effect on local businesses; already leased site; concern running/policing site; not a suitable location for residential development (scrap yards etc); impact of Port road on site. Also points out a number of sites have	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

			been dismissed which have similar issues to Hendon site. Further concerned that some sites have been dismissed because of proximity to showpeople, yet it is deemed appropriate to locate gypsies within industrial estates.	
4 0 2 7	Michael	Mordey	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 2 2	Chris	Morelee	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 8 2 7	Marian	Morgan	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106

				agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 8 3 1	L	Morgan	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 2 6 7	M	Morgan		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining

The Council has adopted a tolerance policy.
4 5 8 8	Alison	Morrell		Strongly oppose SSGA development of settlement break land north of Burdon Road - brownfield land should be exhausted first, and flooding the market with new homes at a time of population decline will be detrimental to property prices in the area. Concerned about proposed new road layout and increase in traffic and noise this will facilitate, but support some amendments made since the last proposal. Burdon Road has become a busy, fast and noisy road. concerned the plan to divert traffic down to Burdon Road from Burdon Lane will increase traffic volume and noise. welcome changes to move the proposed roundabout off the Ruswarp Drive junction, and the addition of open green space between our estate and the new houses. in favour of the bus lane - feel that if the bus lane alleviates traffic volume, speed and noise then the improved quality of life would be worth the slight detour. Plans could still be improved further - suggest new road and roundabout does not need to come as far down as Burdon Road.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure.
2 9 2 6	K	Morris		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and</p>

				<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4 4 6 3	Gael	Morris		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 4 0	Jennifer	Morrison	Newcastle City Council	<p>No specific support or opposition, but comment made that all SSGA sites and all HRS sites will require archaeological investigation. Specific site comments are that: North of Burdon Lane- an extensive prehistoric site has been found; HRS1- development either side of Mount Lane will change character of the lane; HRS2 - impact to Grade 2 listed building; HRS6 site of former waggonway, 19th Century public houses and prehistoric site; HRS7 includes the site of Harraton Colliery Row Pit and ancillary buildings/residential dwellings which was open from the 18th century to 1965; HRS9 cropmark currently under investigation; HRS11 mediaeval ridge and furrow belonging to mediaeval villages (highly significant concern); HRS14 adjacent to historic village; HRS15 setting of listed buildings needs to be taken on board;</p>	<p>Comments noted.</p>
2 2 4 9	Kath	Morrison		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 				development
4306	Suzanne	Morton	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1885	Emma	Moscrop	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
79	Claire	Moses	Support for the development of the Former Vaux Site. Opposed to the development of the South Sunderland Growth Area and all of the Housing Release Sites except the George Washington Pitch and Putt site. With regards to the West Park site believes that the park is a resource to the community as well as being a habitat for wildlife. Development would also put increasing pressure on the local road network. Opposed to all of the proposed Travelling Showpeople and Gypsy and Travellers sites	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
988	John	Moss	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1045	Annette	Moss	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.
4 1 4 1	B	Moss		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 8 4 5	Anthony	Mount		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport

				Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 2 9 7	Audrey	Moutter	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 5 1	R	Mowbray	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 4 2 6	J G	Mullen	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks</p>

3 3 5	Diane	Mullen		Objects to proposed gypsy and traveller site at Sandmere Road. Concerned over impact on local businesses. Concerns over potential increase in crime and site acting as a deterrent to customers. Gypsy and traveller sites should be out of town on wasteland. Concerns over littering. Site is too near businesses and housing.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 2 3	Maxine	Murphy		Objects to proposed Housing Release Site on land adjacent to Herrington Country Park.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. 			new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3016	A	Murray	Objects to Policy SA3 site HRS12 (Penshaw). The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site

					following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2509	Elizabeth	Myers		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought.

					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 1 3 2	Christine	Nelson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 7 5 7	P	Nelson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. 2 2 4 4	Dionne	Nelson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton,	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield

			be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 2 0 0	Richard	Nelson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these</p>

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 9 4 5	Jordan	Nesbitt	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 8 7 8	Jackie	Newall	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				sense of fear and trepidation for residents.	
4 2 9 0	M	Newey		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
6 3 2	Michelle	Newman		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 2 4 2	Paul	Newman		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site

					frameworks.
1 1 6 0	I	Newton		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. 5 1 6	Annette	Nichol	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>	

5 1 5	Rob	Nichol		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 3 9 9	L	Nicholson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3037	Ada	Nicholson	Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of historic parkland; impact to village character; loss of greenspace.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
211	Barry	Nicholson	Objects to SSGA sites to north of Burdon Lane and South Ryhope, but supports Chapelgarth and Cherry Knowle. Objects to all 15 HRS sites (Policy SA3), and objects to all Gypsy and Traveller proposals. Objects to creeping housing growth into greenfield countryside. Objects to any Green Belt development - if land is not available for development levels proposed then the levels should be reduced accordingly. Washington is being particularly hit. Southern Area Playing Fields were created to replace previous fields that were built on for housing. Development here will take away the only grassed area for local residents to use. Infrastructure will struggle to cope.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites.
3	Francis	Nicholson	Objects to Policy SA3, sites HRS11 (West Park). Specifically objects	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site

0 3 4				to: loss of greenspace/recreational land; loss of historic environment; no exceptional circumstances justified; impact on roads; impact on school capacity; impact on GP Surgeries.	is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2 2 4 3	Nora	Nicholson		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 7 0 2	Irene	Nicholson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1053	Alan	Nixon		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
921	Charlott	Noble		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3451	Pete	Noble		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4244	George	Noble		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
550	John	Nordstrom		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	Leechmere has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
20	Michael	O'Brien		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities;	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt,

9 7				impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 2 7 0	Carole	O'Brien		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 6 7	Alice	O'Brien		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 5 4 3	Brendon	O'Donnell	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington;</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the</p>

			lack of understanding of local conditions and constraints.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

4 5 8 3	Kate	Ogden		Object to potential plans to build executive homes on West Park. The park was bequeathed to the people of Herrington in perpetuity as a place of recreation. The park offers residents access to green space. Health benefits associated with accessing green space. Concerns over noise pollution and increased volume of traffic. Concerns over school capacities. Alternative sites available within the city to regenerate. The development would ruin the character of the village. New housing should be affordable housing in associated areas.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
6 4 5	Emma	O'Hara		Objects to Policy SA3 site HRS11 (West Park). Specifically objects to: Newcastle Council has focused on brownfield land; loss of parkland; withdrawal of covenant; impact on wildlife; loss of recreation area; loss of historic ridge and furrow; many other brownfield sites undeveloped in city; loss of attractive gateway into city; school capacity; road traffic; sewerage; not a need for executive houses.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 5 5 9	Kevin	O'Hara		Object to proposed development of 70 executive houses at West Park, Middle Herrington. Para.6.14 states the Housing Release Sites were chosen for their low ecological value, favourable water management and transport issues, and landowner support. Very debatable, no credence or evidence. Fundamental issues of this land glossed over - public park land not acknowledged, secured agricultural tenancy with long term tenant not approached/represented. All 3 council representatives and community petition not in favour. Archaeological and historical landscape and ecological importance has been overlooked. Rare unimproved pasture habitat, rich diversity of flora and fauna - ridge and furrow 'waxcap grassland' supporting rich fungal assemblages, a priority habitat for Northeast England Nature Partnership (Durham BAP) not acknowledged. Veteran trees, >66 species of bird in the park including several schedule 1 nesting birds, 5 protected bats species (3 roosting) - no evidence of having fulfilled legal obligations for surveys. Dubious requirement for 'executive' housing. CSDP wrongly envisages 'growth' when slowest growth in UK in northeast and Sunderland. If implemented its proposals would inflict environmental damage on West Park area and unsustainable developments, increasing CO2 emissions from traffic congestion on already over-burdened transport infrastructure. CSDP fails to address cumulative impacts of agreed and proposed housing developments - increased ecological and environmental threats (biodiversity, traffic, lost farmland, flood risks, sewage, waste management, school places, GP/dental places, water pollution). Socially unsustainable - would increase inequality and social exclusion from taking away public right to use. Does not provide the social housing required. Expensive 'executive' housing built on urban fringe would not improve prospects for the majority of ordinary	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

			<p>people, and wouldn't spend their money in Sunderland. CSDP neglects town centre and regeneration of Vaux and Hendon areas and brownfield sites - unsustainable economy dependent on high risk developments and speculative housing. Strategy mired in 'growthism'. Plan should be making better use of the existing built-up area, not unsustainable urban sprawl extending it onto Green Belt and green fields. Abandon plans to build on West Park and Green Belt - losses and diversity of wildlife habitats and species cannot be offset in any way by so called 'planning gain' compensation. Would contribute to adverse climate change. Councillors' claims for not being able to build on brownfield sites are fallacious arguments - just for revenue from closely linked developers. Traffic problems at West Park effect on property prices and resale opportunities. Developers ignoring planning regulations and lack of enforcement of breaches - encroachment on neighbouring land, culverting watercourses with protected species. West Park is a gateway into Sunderland, and utilised by people playing sports, walkers, dogs, children and admiring nature and aesthetic beauty. Should be kept as greenbelt. Huge negative impact from development, destroying remaining local community infrastructure. Land given in perpetuity to the people of Herrington. Wrong to develop such valued pieces of land when such an undeveloped, undernourished city centre with little attraction. Plan should focus on needs and requirements of the existing populace of Sunderland, not what is perceived - protect our green spaces and regenerate the city from the centre not from the edge. Housing alone will not bring people, a deprived culturally derelict town centre will not attract people to make a city prosper.</p>	
2919	Sally	Ohre	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 2 2 3 8	Charlotte	Old	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 2 4	Rosalind	Oliver	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1 4 1 1	Joanne	Oliver	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has

				<p>been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2809	Debbie	Oliver	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied</p>

			<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 4 3 3 5	John	Oliver		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 3 4	Elizabeth	Oliver		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 6 6	Rita	Olsen		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 1 8	Adam	ONeil		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The Council has adopted a tolerance policy.
2 2 3 9	Ernest	Ord		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 0 9	Patrick	Orme		Objects to Policy SA3, site HRS11 (West Park). Specifically opposed to: impact on natural environment, local area character; local heritage; increased traffic, increased noise and air pollution, impact on mature trees, impact on grazing cattle. Object to fact that Council promotes site as a local park, and is used by people of all ages. Brownfield site use should be maximised. Consider development in areas outside the A19 corridor route.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 4 1 4	Claire	O'Rourke		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield</p>

			Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would

				be required for each development.	
1 8 8 9	Stephen	Paisley		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. 3 2 2	Deb	Palfreyman		<p>Objects to Policy SA3, sites HRS11 (West Park) and HRS12 (Penshaw).</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>
3 0 2 4	Terence	Palfreyman		<p>Objects to Policy SA3, sites HRS6 (JS Park) and HRS7 (Southern Area PF). Specifically objects to: loss of Green Belt land; loss of sports fields; loss of recreational greenspace; impact on school capacity; impact on GP Surgeries; lack of local retail to support homes; brownfield sites/unused sites should be used-up first; limited access to public transport services; Bonemill lane limited road capacity.</p>	<p>Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. In regards to the loss of open space, he Fatfield area has a very high proportion of greenspace (almost 3 times the city average), which equates to 41ha surplus according to the 2012 Greenspace Audit. In regards to the covenant, this has been investigated and development of the land can go ahead.</p> <p>Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 3 6 1	Caroline	Palmer		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 2 2	Doreen	Palmer		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 9 5 5	Jack	Pane		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft

			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 2 7 5	T	Parish		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. 2 6	Derek	Park	Supports the development of the Former Vaux Site. Opposed to the Housing Release Sites at Waterloo Road, James Steel Park, Ferryboat Lane, Newcastle Road, West Park, land adjacent to Herrington Country Park, The Granaries and the Safeguarded Land. Believes that there are any number of sites, brownfield or otherwise, within Sunderland which should be given first consideration for new housing before any further greenfield land. Believes that there are acres & acres of unused land in the old east end/Hendon area for example which may have been earmarked for future industrial use but in reality are highly unlikely to ever be so used. Opposed to proposed Gypsy and Travellers sites at Hendon and Leechmere.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 7 7 8	Christopher	Parker	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has

				undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2803	G	Parker	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these</p>

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. 3 7 1 1	Derek	Parker		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 2 1	Lesley	Parkes		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 0 7 4	Hazel	Parkes		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

3 7 5 0	Tom	Parkin		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 1 5	Sandra	Parkin		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 8 3	Helen	Parry		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 8 4	Sarah	Parry		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the

				Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
203	Christine Parry		Supports the development of the Former Vaux site Opposed to all of the Housing Release Sites except The Granaries and the New Herrington Working Men's Club. With regards to land adjacent to Herrington Country Park there are great concerns regarding the impact on local infrastructure, roads, schools and the NHS. Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
89	Christopher Parsons		Support for the development of the Former Vaux Site and the South Sunderland Growth Area. Opposed to the Housing Release Sites at George Washington Pitch and Putt and Southern Area Playing Fields as it will release in a loss of recreational space which is well used. Will also put pressure on local services. Opposed to all of the proposed Travelling Showpeople and Gypsy and Traveller sites.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable

					and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
2 4 4 3	Michelle	Partington		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 1 6	Karen	Partington		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
8 3	Yvonne	Partridge		Support for the South Sunderland Growth Area sites at Chery Knowle and land to the north of Burdon Lane. Opposed to all of the proposed Gypsy and Traveller sites.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 3 2	Jeanne	Partridge		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
6 4	Christina	Patchett		Opposed to West Park development. Local services have no capacity and surrounded by busy roads. The park is frequently used by local people and believes that there are other areas that should be developed before this site.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
6 2	David and Eve	Patchett		Support the development of the Former Vaux Site. Opposed to the Housing Release Site at West Park. The park is a habitat for various wildlife and would be great loss for the community, local services and roads are already under pressure, the land floods frequently and East and Middle Herrington has below average tree cover and amenity space. Questions the ownership of the land and some of the scoring in the Green Belt Assessments.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4	M	Paterson		Objects to Policy SA3 site HRS11 (West Park). Specifically opposes:	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site

9 6				withdrawal of covenant; loss of park (recognised by Council as a Park); loss of Green Belt; loss of recreational area; effect on wildlife; increase on local traffic; historical impact (ridge and furrow); effect on city gateway.	is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 9 5	S L	Paterson		Objects to Policy SA3 site HRS11 (West Park). Specifically opposes: withdrawal of covenant; loss of park (recognised by Council as a Park); loss of Green Belt; loss of recreational area; effect on wildlife; increase on local traffic; historical impact (ridge and furrow); effect on city gateway.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
3 5 9 1	John	Patrick		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 6 5	Susan	Patterson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy

5			<p>openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified</p>

					<p>following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 3 2 0	Matthew	Patterson	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 2 9 4	Karen	Pattison		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 1 3 5	Michael	Pattison		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4 2 2	Alan	Pattison		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status;	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				and negatively affect local people's health and wellbeing.

The Council has adopted a tolerance policy.
1 4 6 0	M	Pearce		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport

					Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

				provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
1 8 5	Bryan	Pearson	Opposed to the proposed Housing Release Site at Southern Area Playing Fields on the grounds that the consultation has been poor and by developing on the land the Council will not be meeting its own aims set out in the plan. Development would put increasing pressure on existing roads which are already in need of repair.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. 4 9	Michael	Pearson	Supports the development of the Former Vaux Site and South Sunderland Growth Area. Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 4 9	Daniel	Pearson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons

			<p>prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to

			impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
7 8	David	Peart	Support for development of the Former Vaux Site and the South Sunderland Growth Area. Opposed to the Housing Release Sites at George Washington Pitch and Putt site, James Steel Park, South Area Playing Fields and the land adjacent to Herrington Country Park. Would like to see James Steel Park remain as a park and development adjacent to Herrington Country Park would have an impact on its character. With regards to Southern Area Playing Fields they are used by local football teams and local families and the council should be encouraging sport and leisure activities and not removing well used facilities.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 1 0 8	Kerry	Peart	Objects to proposed travelling showpeople sites at Market Place and Pearson Industrial Estate. Also objects to proposed gypsy and traveller site at Hetton Lyons Ponds.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
2 2 9	Nicola	Peden	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks

7				<p>and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
3 0 0 4	M E	Peel		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 4 4 2 1	Denis	Peel	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 2 8 9	Simon	Peer	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. 				Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 5 6 6	John	Pendergast	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 2 9 5	Adam	Penman	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton,	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The plan encourages and prioritises the use of brownfield

			be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4 3 4 9	S	Penman	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 7	Arthur	Pennell	Objects to PolicySA3 - Site HRS11 (West Park). Concern over loss of recreational area. Welcomes safeguarding of transport corridors for Leamside line and at South Hylton, however large parts of Sunderland miss out should be considered for metro extensions. Queries what upgrades could be made to A19 junctions. Potential for new junction between A690 and Seaham could be considered. Consideration should be given to park and ride to reduce congestion. Area north of Hillcrest and Thorney Close should be retained as greenbelt due to wildlife and archaeological importance. The footpath from Steep Hill to Hastings Hill is well used. The agricultural area to the west forms a natural boundary. Concerns over potential use of this for housing, including impact on traffic on A690. Concerns regarding potential mess left by travelling community and indicates that any site should be as small as possible.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report

The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
