1 7 0 5	Andrew	Hind		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2 5 6 2	Ian	Hodgson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 5 4	June	Hodgson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 6 4 0	Iain	Hoey		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be

					controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 1 1 9	Lindsey	Hogg	<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. 8 2 8	Keith	Holden	Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 3 4	JAMES	HOLLAND	Object to HRS11 West Park for residential development - was given to the people of Herrington in perpetuity as a recreational facility in the southern part and for grazing at the northern end. Used daily for exercise, dog walking and socialising, removing facility could be detrimental to physical and mental health - should be promoting not removing green areas of land. Southern gateway to the city, would be detrimental to a beautiful street scene. Traffic already extremely heavy, roads are carrying more traffic than they were designed for. Building 70 houses, each with 2 or more cars by the nature of the proposed development, would make the roads even more unsafe for pedestrians and motorists. Development would damage mature trees and their root systems. Evidence of medieval ridge and furrow farming should be preserved not dug up. Range of flora and fauna should not be disturbed. Green wedges and greenbelt should be protected and left untouched for recreation use. Development would have a very real, major negative impact of the local area and its residents.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.

The Council has adopted a tolerance policy.
1 6 5 4	John	Holliday		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the

				development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.	
3 8 8 7	Christine	Holliday		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 6 6	K	Holman		Objects to proposed gypsy and traveller site at Leechmere Industrial Estate. Impact on adjacent care homes. Concerns over disturbance and fear to neighbouring residents. Concerns over impact of additional traffic, including on school traffic. Concerns over slow moving horse drawn carriages and impact on road safety. Adverse impact on Hollymere pub and restaurant. Adverse impact on local businesses. Concerns over increased littering. Likely tethering of animals on greenspaces in area would give negative welcome to Sunderland. Negative impact on house prices. Believes this site has more issues of concern than other sites considered.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 6 3	Lynne	Holman		Objects to gypsy site at Leechmere Industrial Estate. Specifically opposes: impact to elderly care home that site would have; disturbance to care home with gypsies potentially arriving at site at unsociable hours; added noise and disturbance to adjacent care home; increased impact to traffic in area; traffic impact to the school run; slow moving caravans and trotters impact on local traffic; impact to adjacent Hollymere PH; impact to local businesses and effect on sales; impact on road approach to area; impact on house prices and general amenity to neighbouring residents.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 7	Janice	Holmes		Opposed to the Housing Release Sites at Springwell. Believes that development will change the character of the village and join areas together, traffic levels in the village will put increasing pressure on roads and that there are more suitable brownfield sites that should be developed instead of Green Belt	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic

					Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
4 5 8 6	Malcolm G	Holmes	ABP Property Consultants	Supports HRS10 land at Newcastle Road, Fulwell, on behalf of the owner of the adjacent Driving Range to the north of the site. encourages policy of development to meet strategic housing numbers (especially executive style homes), to support economic growth - supports including this area in the SHLAA and Core Strategy. reference to a golf course should be corrected, it is a driving range. boundary to the driving range should not be considered as durable - more sensible hard boundary would be to north of the driving range at the roundabout access road to Fulwell Quarries, could be shared with any future redevelopment of the driving range. residential development would complement the driving range use and mirror housing to east of Newcastle Road. site could come forward ahead of the timescales shown with a more compressed build-out period too, hardly any restrictions and constraints to development.	The council has undertaken a greenbelt boundary review to determine a suitable boundary. This site has been assessed as part of the Green Belt Assessment.
9 8 2	Marie	Holmes		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
9 5 9	Barry	Holmes		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 5	Rhiannon	Holmes		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy

5			<p>openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining</p>

			<p>accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2 3 9 8	Lee	Holmes	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The

0				for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Council has adopted a tolerance policy.
4 4 1 5	Steve	Homer		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 4	Richard	Hood		Supports the development of the Former Vaux Site and South Sunderland Growth Area Opposed to the Housing Release Sites at West Park, Newcastle Road and the Safeguarded Land Opposed to the proposed Gypsy and Traveller site at Leechmere due to the perceived threat to security to nearby businesses and wellbeing of care home residents in the event that the site generated noise and antisocial behaviour. Believes that there is the potential for disturbance in local pub with negative impact on local business and potential misuse of neighbouring Tunstall Hills and nature reserve.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 4 3	Richard	Hooper		Objects to proposed gypsy and traveller site at Hendon. Concerns over security of premises and fly tipping. Concerns over potential for additional travellers on spare land. The site also has a large sewer.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 1 8	A	Hope		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 3 2 8	Barbara	Hope		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and

			<p>been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

3 5 2 8	J	Hopkins	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm</p>

					to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

7 4	Richard	Hopper		Opposed to the proposed Gypsy and Travellers site at Leechmere. Concerned about security of premises in the area, fly tipping, the site not being big enough and the site planned has a sewer running beneath it.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 6 2	Christopher	Horn		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 9	Keith	Horrigan		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy

1			<p>openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 5 6	Kevin	Hosking		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 3 7	A S	Hoskins		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 9 7 4	Norma	Houghton		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 			<p>separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
1 4 3 8	Gladis	Howe	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 4 6	S	Howe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

			<p>forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Shouldn't be more houses built. Need more wildlife in the estate.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 4 1 2	Julie	Howe	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 4 2 1 9	O	Howe	<p>Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
4 5 3 6	Elaine	Howell	<p>Objects to proposed gypsy/traveller site on Sandmere Road, Leechmere, Grangetown. directly behind 2 elderly care homes, as well as another on Leechmere Road. Not appropriate, impact and disturbance to elderly residence. Unsocial hours of arrivals/departures, unacceptable burden on car home residents, disturbance and fear. Gypsy/Romany Travellers site inserted in green belt area buffer to industrial estate brings noise and disturbance. new access roads increase traffic flow from slow moving and horse-drawn vehicles accessing the site, dangers on 2 busy roads. primary school close to the site, risk to parents/carers and children from increased traffic flow. Animals owned by GRT community are tethered to any adjacent green grassed area, poor eyesore introduction for visitors approaching Sunderland rubbish and debris spill from sites onto nearby land and premises. local businesses would suffer from the presence of the adjacent GRT site, drop in sales due to lack of visitors in case of damage to their vehicles and passengers from increased traffic. Hollymere pub would see impact on the usual open friendly atmosphere. proximity of the site to residential area in Leechmere Road area, will impact on house prices hindering selling homes in future. Terrible location, unacceptable for all concerned. Other sites do not have similar amount of concerns of issues.</p>	<p>The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

2 6 7 6	Clare	Hownam		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 0 5 1	Jon	Hownam		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 7 1	Catriona	Howson		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

1 5 3 1	L P	Hucknall		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106</p>

				agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
5 8 4	S	Hudson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
9 3 4	Lisa	Hughes		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
1 5 4 5	Phil	Hughes		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out</p>

			<p>Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 9 2 8	M	Hughes	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these</p>

					assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

4 0 9 5	L	Hughes		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 6	Paul	Huitson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 7 4 1	Tracy	Huitson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 7 4 2	Michael	Huitson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

3020	Elaine	Hulsmeier		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of Green Belt; loss of ridge and furrow; contradicts SA - seeking to enhance sports facilities/parks, avoiding loss of habitats etc; lack of justification for exceptional circumstances; impact on mature trees; creating urban sprawl; withdrawal of covenants; increase in road traffic; impact on road safety; school capacity; air quality impact; wildlife impact; loss of greenspace lost forever; loss of parkland.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
2614	P M	Hulsmeier		Objects to Policy SA3, site HRS11 (West Park). Specifically objects to: loss of historic parkland; impact on local wildlife; impact on ridge and furrow; loss of greenspace/recreational area; impact to village character; impact on urban sprawl and countryside encroachment; impact on local health; increased traffic pollution; increased traffic locally and impact on road safety; will exacerbate flooding; impact on local schools.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4098	James	Humble		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1735	Colette	Hume		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
4341	Stephen	Hume		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

8 1 5	Steve	Humphrey		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 6 4	Ellen	Humphrey		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 6 2 8	Stuart	Hunt		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in

			<p>Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 3 9 5	Adam	Hunt	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 1 6 6 5	William Andrew	Hurst	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the</p>

				<p>corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3027	John	Hutchinson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3963	Sammey	Hutchinson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3974	Georgia	Hutchinson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
85	Ian	Davies		Support for the Housing Release Site at Springwell, George Washington Pitch and Putt, Waterloo Road, James Steel Park, Glebe House Farm, Ferryboat Lane, West Park, land adjacent to Herrington Country Park, New Herrington Working Men's Club and Philadelphia. Opposed to Housing Release Site at Southern Area Playing Fields and Safeguarded Land. Believes that the Southern Area Playing Fields is inappropriate, ill proposed and alternative sites need to be considered. Opposed to all of the proposed sites for Travelling Showpeople and Gypsies and Travellers	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan

					states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 5 6	K	Ibinson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 0 6	Christine	Ibinson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport

					Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 5 0 2	Sylvia	Ikin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
8 7 1	M	Iley		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

179	Jess	Illingworth		<p>Object to HRS1, HRS2 and HRS3 in Springwell Village. Object to 182 homes being built over 4 sites around Springwell, which may lead to additional development being allowed in area. Negative impact to infrastructure- additional cars on roads, school which will not be able to cope. Disagree that there is not sufficient sites on brownfield land. Also suggests that land alongside A19 would be better suited for development. Executive homes is not appropriate. Unique character and environment of Springwell will be destroyed.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. `The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor’s surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.</p>
701	Jess	Illingworth		<p>Object to Policy SA3 sites HRS1, HRS2, HRS3 and HRS4 (Springwell Village and High Usworth). Specifically objects to: Green Belt purpose to preserve setting and character of Springwell Village is not duly considered; housing projections contrast to Government targets; tip of iceberg- more Green Belt will be released; HRS2 disagrees that gospel hall constitutes development within corridor and thereby enables HRS3 to be better justified; impact on local traffic and congestion; school capacity; consider that safeguarded site might be better option to Springwell Green Belt.</p>	<p>Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 7 7 5	Christopher	Ingram		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the

			<p>people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

3 4 7	Jackie Blake	Irwin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development

					to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 3 7 9	E	Irwin		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1	L	Irwin		Opposed to the proposed Housing Release Site at Ferryboat Lane on	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of

9 6 9			<p>the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>

Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 4 6	D	Jackson	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 1 9 6	Alan	Jackson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

2 1 2 7	Dave	James		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
3 1 9 3	Josphine	James		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
3 3 6 3	Ian	Jamieson		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
5 3 4	Gloria	Jennings	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to

				assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
8 9 2	A	Jepson	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
5 8 5	Gary	Jessop	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 8 9 3	A F	Jewitt	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 5 1	Walmsley	Jill	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that

			cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
7 1 4	M	Jobling	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 3 9 8	Linda	Jobson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5	Megan	Johns	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the

3 7				<p>evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 0 6	Susan	Johnson	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; intimidation and will ruin a tranquil/peaceful area, esp. for fishing. Believes the Hendon Road site is most suitable of the 3 options as no housing immediately nearby. Raises several questions for consideration: Control of access, 24hrs/day? Ensuring they don't overstay 7 days? Who will tidy up afterwards? Where will horses graze? Will the fee payment go to the local community that suffers them? Will police respond to reported disturbances in an appropriate manner? Will they be stopped from parking in the layby opposite Nicholson's farm if they refuse to enter?</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>	

1 1 9 5	Alicia	Johnson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
4 8 7	Claire	Johnson		Objects to Policy SA3 sites HRS11 (West Park) and HRS12 (Penshaw). For site HRS12, specifically objects to: loss of greenfield land; increase in traffic/road safety; loss of views; school capacity.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1 8 5 8	D	Johnson		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed

				the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 9 3	Gavin	Johnson	Objects to Policy SA3 sites HRS1, HRS2 and HRS3 (all Springwell Village). Specifically concerned that the 3 sites could potentially deliver 3 times as many homes. Opposes Green Belt development which is meant to check urban sprawl. Concern that Springwell will be merged; concern about impact to school and local roads, pollution, impact on environment. Object to executive housing proposals- affordable homes are the norm in the area. There are enough brownfield sites available to meet housing shortfall.	Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced form 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither school have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctor's surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence.
5 2 0	Kimberley	Johnson	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. 8 3 5	Thomas	Johnson		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 5 6	Paul	Johnson		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport

					Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
9 1 4	Tia	Johnson		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

1 2 6 8	Robert	Johnson		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development

					to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 1 2 0	V E	Johnson		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the

			new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

4081	Margaret	Johnson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4082	Wendy	Johnson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1999	D	Johnston		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
733	Kevin	Johnston		Objects to Policy SA3 - site HRS15 (Philadelphia). Opposes any further development until road improvements are made. Concern over impact on schools.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A number of studies have been carried out including a Phase 1 Habitat Survey, Archaeology Study and Heritage Statement, Transport Assessment and Noise survey relating to this site and also the wider redevelopment of the Philadelphia Complex, and it is anticipated that the issues raised can be mitigated against. In particular sensitive design is needed to minimise impact to neighbouring properties and to blend with the remainder of the Philadelphia Complex development, including the Listed buildings.
710	Kevin	Johnston		Opposed to the proposed Travelling Showpeople sites on the grounds that consider the land would be more suitable for housing, it would be better suited to land north of Pearsons Industrial Estate as it has better access, good roads and local infrastructure and access to the sites is poor. Also opposed to the proposed Gypsy and Traveller site at Hetton Lyons Ponds as it is considered unsuitable.	The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

3 2 3 3	Linda	Johnston		<p>Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.</p>	<p>Comments noted. 3 6 2 9	Andrea	Johnston		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	
2 1 3 0	Norman	Jonas		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 0 5 9	David	Jones		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 4 5	David	Jones		Object to Policy SA3, site HRS12. Concern that 400 homes will put strain on local infrastructure- roads and primary schools in particular. Also object to use of greenfield land when brownfield sites are evident across the city.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining

					sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
299	Karen	Jones		Objects to proposed housing release site HRS12. Adverse impacts on wildlife and birds, including Skylarks and lapwings, which are on RSPB red list. Questions whether an environmental impact survey has been undertaken. Understand need for new housing but greenbelt is not the answer. Brownbelt areas should be developed instead. Impact of new homes on traffic. Concerns over difficulty of accessing the petition.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
8 8 1	Pat	Jones		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
7 9 8	Dan	Jones		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.
1 0 0 6	Sheila	Jones		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 6 9	Laura	Jones		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better

			<p>housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 9 6 2	Louise	Jones	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess</p>

				capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 7 8 2	J	Jones	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register</p>

The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
5 7	Jean	Joyce		<p>Supports the Housing Release Sites at Newcastle Road, West Park and on land adjacent to Herrington Country Park.</p>	<p>Support acknowledged.</p>
3 4 4 9	Jessica	Joyce		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has</p>

					undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4 2 7 6	Daniel	Joyce		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 3 8 0	Ricky	Kane		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 1 7 6	Lisa	Kellett	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out

					within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. 3 2 3	Laura	Kelley		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks

5			<p>and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
2 5 4	Claire	Kelly	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that brownfield sites are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has</p>

					undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

30	Norma	Kendle		Supports the development of the Former Vaux Brewery Site. Opposed to the Housing Release Site on land adjacent to Herrington Country Park and the proposed sites for Travelling Showpeople. Supposes the proposed Gypsy and Traveller sites at Hendon and Leechmere and believes that the site at Hendon needs to be tidied up. However is opposed to the site at Hetton as the car park is well used by the people of Hetton le Hole & surrounding areas. It has direct access to the fishing lake which is well used by Hetton Angling Club, the elderly and disabled. Hetton Lyons Country Park hosts a lot of sporting events and the pitches are regularly used.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
738	Lynsey	Kennedy		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations

					of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 6 1	Ronan	Kenny		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
3 2 0 5	Jamie	Kernen		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2110	David	King	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.

3 2 1 5	Anne	King	<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>

				to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	
509	John	Kinnison		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
4182	Graeme	Kirkley		<p>Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. The Council has adopted a tolerance policy.</p>

				to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	
870	M	Kirkwood		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4153	Trina	Kirtley		Objects to proposed gypsy site at Hetton Lyons. Specifically objects to the loss of car park/impact to park that will affect walking, cycling and fishing, plus regional and national events held at the park and access in general to the country park.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
38	Karla	Kirton		Supports the development of the Former Vaux site and the South Sunderland Growth Area however opposed to all of the Housing Release sites and the Gypsy and Traveller site at Leechmere.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.
4538	Craig	Kitching		Object to building 70 executive houses on West Park, East Herrington. Park give the village its unique character, meeting point for residents supporting community spirit - plans will destroy this. Scale and type of development will alter character, reducing attractiveness for developers and residents. 140-280 additional cars on already strained and congested road network. Housing type not meeting the needs of affordable housing or of ageing population. Why destroy a well-used and lived area of natural beauty enjoyed by people. Evidence to justify additional housing throughout the city is unconvincing. No thought given to health and wellbeing of the people of East Herrington - accessibility to open green spaces. Destroying West park would put strain on residents mental and physical health.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1141	Janet	Kitching		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3957	Annette	Knight		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4029	David	Knight		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1787	D	Knipe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that

			<p>the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. This area is special. Please look at brown belt first.</p>	<p>there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Stop building on our countryside.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
659	Caroline	Laffey		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied

			<p>unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. 2096	Noadic	Lalas	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. 2 9 5 9	Rachel	Lally	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that</p>

				cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
930	Mary	Lamb		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2048	Jaimie	Lamb		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
567	Linda	Lamb		Objects to Policy SA3 - HRS7 (Southern Area Playing Fields). Concern over loss of playing pitches. Not many alternative pitches available. 3G pitches are not the answer and have health risks. Building affordable housing, will devalue existing housing. Believes that	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites.

				families leave the area for jobs, not because of lack of housing. Adverse impact on the environment. Increase in cars and pollution. Impact on wildlife. Plans would leave very little Green Belt in south Washington. Concern regarding impact on road network, local schools and doctors.	Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
3068	Helen	Lamb		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3714	Wilfred	Lamb		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4175	Stephen	Lamb		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4187	Christine	Lamb		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1837	Alison	Lambe		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register

				A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Brownfield sites should be used rather than green.	and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 9 6 9	Alan	Lambert		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 7 2	Andrew	Lambert		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 9 6 8	T	Lambert		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 8 4 5	M A	Lane		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would

					be required for each development.
2 8 9 7	Caroline	Lane		<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

2 4 9 3	Judith Anne	Lashley		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 2 2 2	Elizabeth	Last		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 5 3 9	Vicky	Latimer		S. Dinsdale and V. Latimer object to Hetton Lyons park car park as a traveller's transit site location - provides convenient safe access to the park, fishing lakes, nearby public rights of way and bridleways, regularly and extensively used. Question why similar car park sites have been discounted as unsuitable - at Fullwell Quarries and James Steel Park, Washington. Hetton Lyons Country Park site is also a quite well used car park and may stop people accessing this area. Use as a stopover site for 5 pitches on a few occasions needed is at odds with current usage of the site as a valued car park and access to the Country Park, fishing lakes and rights of way. Alternative vacant land with hard-standing is available for an occasional restricted use transit site. Lack of car parking would adversely affect the fishing business on the lakes - equipment means major factor is car park in very close proximity. This site disregards the Plan's stated protection of Sunderland's valued leisure, nature, open spaces and countryside. Access to the site close to bend in the road, could obscure vehicles, risk of accidents from larger/slower (horse-drawn) vehicles. Green Flag Award park - would be lost when one end becomes inaccessible and potential increase in waste. Concern that travellers' horses would be left to graze in the park, dogs, hazard to public using the space. Voice of the travelling community has been missing from this process, no consideration of where they would need this facility most. Majority of unauthorised stops are within Washington, so inappropriate for transit site elsewhere, would have a 'sanitising' effect on the country park.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 0 0 8	Vicky	Latimer		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. The Council has adopted a tolerance policy.

				to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	
4 5 4 0	Christopher	Lavelle		Object to development of 70 executive houses on West Park, Sunderland. Poor consultation - residents unaware of draft plan, packs not delivered to some. Due procedure was not followed. Traffic - not been considered correctly or relevant studies taken place. Surrounding roads at/over capacity. Another 300 cars to a gridlocked road would be dangerous. Concern for people crossing the roads. Volume of traffic will have knock-on effect on whole arterial passage to/from Sunderland. Historic value and title deeds - medieval ridge and furrow. Playing Fields Association and Duke of Edinburgh endorsed keeping this park for the people of Sunderland in perpetuity in 1967. Who actually owns it? Historic land, fought for, is greenbelt, constantly used, ecological value, speeding/congested traffic, covenant stating it should never be built upon - this park should never have been considered. Village green - used of dog walking, sports and picnics, cathartic to the community. Council should have registered this park as a village green, it is used as such and should be registered. Community health - park is essential to mental health, gated community of out-of-towners will rip it asunder. Communitative nature of the site so local businesses will not benefit. In danger of removing identity. Ecology - bats (protected species), owls and beautiful mature trees with preservation orders. Drainage - road at bottom floods, more tarmac on the park would have terrible consequences. Older sewage systems will not cope with extra load. A lot of Gento brownfield sites are not included, should be taken into consideration before greenbelt land, especially parks. These or not exceptional circumstances. New government calculations will take effect, reducing proposed housing by around 14%. Proposal should be recalculated used the new projected methods and West Park removed and made into a village green. gateway to the city.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
8 1 3	Michael	Laverick		Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 9 0 9	Guy	Laverick		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been

				included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
8 6 3	Michael	Laverick	Objects to proposed gypsy and traveller site at Hetton Lyons ponds. The car park is used for access to fishing lake and country park. Some members of fishing club are disabled and this car park provides only suitable access. Believes an alternative site could be found which has less of an impact on the community.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 1 1 5	N	Laverick	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing. The Council has adopted a tolerance policy.
2 5 2 3	Beth	Lawrence	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought.

					The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 9 4 6	Susan	Lawrence		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

182	Lyn	Laws		<p>Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.</p>	<p>Opposed to the sites proposed for development at Springwell. Springwell Village has faced pressure from development for a number of years now which has been resisted. Development of the village will put pressure on the road network and local infrastructure for example the primary school which is already at capacity. Sites are capable of accommodating more than is set out in the information which is provided and would not cater for local people.</p>
4031	A	Laws		<p>Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.</p>	<p>Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
725	Gillian	Lawson		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess</p>

				capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1 5 4	Anne	Lawson	Support for the Housing Release Sites at George Washington Pitch and Putt, Waterloo Road, James Steele Park, New Herrington Working Men’s Club, Philadelphia, Newcastle Road and The Granaries. Opposed to the Housing Release Sites at Ferryboat Lane, Southern Area Playing Fields, adjacent to Herrington Country Park and the Safeguarded Land. Believes that the site adjacent to Herrington Country Park is too large and the area has already seen a lot of development and lost open spaces. Roads will come under increasing pressure, the site compliments the Country Park and there are other sites that should be developed before this one.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss. Comments noted. The council has identified sites throughout the city to accommodate approximately 90%

				of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
1014	Paula	Lawson	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1816	J	Lawson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
1835	G	Lawson	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put	Comments noted. 3951	Janet	Lawson	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm</p>

					to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
4058	William	Lawson		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3720	Gwen	Lay		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
72	Alyson	Laydon		No opinion expressed on the development of the Former Vaux Site	The Vaux is allocated in the Publication draft for office and residential development.
1832	Peter	Laydon		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Plenty of brownfield land available.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each	

					development
3 5 4 3	P.E	Lea		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. 3 1 5 8	Lee	Leadbitten		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	
7 4 0	Bernadette	Leckenby		Objects to Policy SA3 - sites HRS1,2,3,7,8,9,11,12 and 14. Important to maintain greenbelt to prevent urban sprawl and protect countryside. Exceptional circumstances have not been demonstrated for green belt. There are enough brownfield sites. No case has been made for each individual site and the sites are all shown as not currently developable in SHLAA. In addition for HRS11 West Park, SHLAA states not suitable as is designated Green Belt, southern part is amenity greenspace, is subject to HRA, part of site at flood risk, site in Critical Drainage area, contains archaeology (including ridge and furrow, coal board covenant on site. These issues also acknowledged in SLR. For site HRS12 (Land adjacent to Herrington Country Park) . Concerns over impact on Penshaw Monument, the country park and wildlife. Concern over impact on roads. Specific additional concerns raised include abnormal costs for pylons, area of high landscape value, green belt separation, impact on wildlife corridor and Local Wildlife Site, local road network, schools, critical drainage area and public right of way.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks.
7 8 0	Michael	Leckenby		Objects to SSGA site North of Burdon Lane. Objects to Policy SA3 sites HRS 1,2,3,5,6,7,8,9,11, 12, 14 and Safeguarded site. General concerns that not all brownfield site options have been exhausted. Specific concerns relating to West Park refer to SHLAA and SLR Review that list numerous constraints affecting site, and that site is "not currently developable". Concern regarding withdrawal of covenant. Specifically regarding HRS12 - impact to landscape, wildlife, traffic levels/congestion, fact that SHLAA and SLR say "not currently developable", SLR constraints mentioned, impact on infrastructure.	In order to help meet identified housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify "safeguarded land" in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as "safeguarded land". This approach is justified in the council's evidence base. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
4 2	Vivienne	Lee		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. 7			<p>evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
808	Ricky	Lee	<p>Opposed to the proposed Gypsy and Travellers site at Hetton Lyons. The car park is used daily by members of the Angling Club many of whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.</p>	<p>Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.</p>
58	Zoe	Lee	<p>Supports the development of the Former Vaux Site and Cherry Knowle but opposed to the South Ryhope development. Opposed to the proposed gypsies and travellers sites at Hendon and Leechmere. The roads surrounding the industrial estate are poor and the local businesses and the care home will suffer due to the increase in traffic and people looking for alternative places.</p>	<p>The Publication Draft of the Plan allocated a stopover site. 1 8 2 5	D	Lee	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on wildlife.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat</p>

				survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3 1 4 7	P	Lee	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has adopted a tolerance policy.
4 1 9 9	Geoff	Lee	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 3 3 0	David	Lee	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 0	Clinton	Leeks	Supports the development of all sites although it is essential that the supporting infrastructure, including public transport is provided in parallel.	Acknowledge support.
4 0 0 3	Frederick	Lees	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
3 5 6	John	Leigh	Objects to Policy SA3, site HRS7 (Southern Area PF). Specifically opposes impact that site would have on local road capacity; lack of bus services serving area; further impact on GP services; loss of playing fields which will impact on people's health; building on Green Belt land.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to

					provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. In regards to the loss of pitches, the 2018 Playing Pitch Plan states that the long term future of the site is to be considered in the context of Parklife local Hub provision at the Northern Area Playing Fields. The site is in use at present, but as part of the Parklife Hub provision is due to cease in 2019. If at that stage, the revised Playing Pitch Plan does identify the site as surplus to need, then CSDP Policy E9 would allow for a contributions made to enhance nearby Rickleton Park to help compensate for the area loss.
3 8 5 7	Edward	Leigh		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 2 2 8	Stuart	Leigh		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 9 8 6	Grace	Leonard		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the

				<p>corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2098	B	Leroy	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council has identified sites throughout the city to accommodate approximately 90% of housing</p>

			<p>out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 2 7 6	Josef	Lewandowski	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 			<p>services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
2994	S	Lewis	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. 4	Steven	Liddle		Objects to Vaux site, all of the SSGA sites, all Green Belt sites and	The Vaux is allocated in the Publication draft for office and residential development. In order to help meet identified

8 9				<p>Safeguarded site and all Travelling Showpeople and Gypsy sites. Vaux objection relates to use- should be for heritage and tourism rather than financial/business and housing. Specific objection to SSGA and Green belt sites relate to loss of greenfield land when brownfield urban should be developed.</p>	<p>housing needs within the city, the Plan allocates the SSGA for residential development through Policy SS6. The site will comprise of 4 parcels of land which will deliver approximately 3,000 dwellings. In order to guide the comprehensive development of the SSGA, the council has prepared the SSGA Supplementary Planning Document (SPD), which provides detailed design guidance. The scale of development at SSGA will result in a significant increase in the population of South Sunderland. Therefore there is a need to ensure provision of adequate supporting infrastructure. This is likely to comprise a new primary school, extensions to existing a local centre, community/cultural facilities, open space, woodlands, cycleways and footpaths and the completion of the Ryhope Doxford Link Road. The Infrastructure Delivery Plan (IDP) prepared to support the SSGA Supplementary Planning Document (SPD) identifies the overall infrastructure requirements for SSGA, anticipated costs for infrastructure provision and provides a broad strategy for its delivery. Developers will be expected to contribute/deliver necessary infrastructure. The Plan does not include any proposals for bus only routes as part of the SSGA, this was a proposal within the draft SSGA SPD and will be dealt with as a response to that document. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The sites within Washington and Sunderland North also help to provide more of a balance of housing options across the city, which otherwise would be dominated by sites in the Coalfield and South Sunderland. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The NPPF requires that when a Local Plan revises Green Belt boundaries consideration should be given that the boundary will not need to be altered at the end of the plan period. Where necessary, plans should also identify 'safeguarded land' in order to meet longer-term development needs stretching well beyond the plan period. The Publication draft identifies land East of Washington and South East Springwell as 'safeguarded land'. This approach is justified in the council's evidence base. The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review.</p>
1 8 3 9	A W	Liddle		<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site. Impact on wildlife, including birds travelling to Washington Wildfowl Centre. The site is a possible battle field. The site potentially contains the remains of crashed planes on way back to Usworth Airfield. The site has excellent views. There are plenty of brownfield sites in Sunderland. The site contains shallow coalfields. A part of the coast to coast cycle route passes the site. Concerns</p>	<p>Comments noted. 7 6 1	Sandra	Lincoln	Opposed to the proposed Gypsy and Travellers site at Hendon as it is not considered a suitable place for people to live and Northumbria Water need 24 hour access to the site.	The Publication Draft of the Plan allocated a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4 0 7 8	J	Lincoln	Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating sense of fear and trepidation for residents.	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
2 3 7 1	Wendy	Lindsay	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development

Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 3 3 2	Ian	Littlejohn	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has</p>

The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 5 5 8	Esime	Loadman	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out</p>

			<p>Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 9 7 5	C	Lofthouse	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
3	Alison Jane	Logan	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to:	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance

9 7			<p>housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>

At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1125	Kimberley	Lomax	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register

					and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
1 8 3 8	W A	Long		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
2 2 0 3	J W	Longley		Objects to Policy SA3 site HRS12 (Penshaw). 				Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
3 8 0 9	S	Longstaff	Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
1 1 2 7	J	Lormor	Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
1 3 1 0	Elliott	Lowden	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has</p>

				<p>been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. 7 2 9	Helen	Lowes	<p>Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.</p>	<p>Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.</p>
4 5 4 1	David	Lowson	<p>Object to proposed development of the area surrounding Penshaw monument. Plan to build almost exclusively on green belt land rather than invest in regenerating city centre. Numerous vacant brownfield sites in Sunderland for residential conversion or redevelopment, better than concreting over greenbelt and ancient</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>

				<p>parkland, and would draw people who want to live in the town out of the suburbs (students renting converted Victorian town houses). Over 70 executive homes on West Park - a desirable location because of the green spaces and park land the plan proposes to build on. Area is an important haven for nature, home to colonies of bats, ancient trees and squirrels. Community will lose an area of extreme beauty and biodiversity if built on, as well as spoiling the stunning visual amenity around Penshaw monument. Noise and fumes from 400 houses and 1,000 extra cars - encouraging people to use bicycles is impractical for most commuting long distances on dangerous roads. Building on this site would further erode the green belt around Sunderland. Potential archaeological significance given proximity to Penshaw monument (site of an Iron age hill fort long before). The area makes a substantial contribution to the ambiance of the grade 2 listed monument, a valuable escape for the community for mental health and happiness. Green belt review states development of any part of this section of the Green Belt would result in substantial protrusion into the wider Green Belt, surely resulting in urban sprawl with negative effect on the environment and biodiversity as well as discouraging tourists visiting Penshaw monument. Site is close to 2 busy roundabouts, already overcrowded and dangerous, adding 800 new rush hour commuters will only make it more chaotic and dangerous. Development with potentially 1600 new residents would increase pressure on availability of local primary and secondary school places, GP and dentistry services. Decrease in air quality by removing green space, with cars and increased traffic causing parking problems in Penshaw area.</p>	
667	David	Lowson		<p>Objects to Policy SA3 - site HRS11 (West Park). Site is a park with old trees and wildlife. The site is part of green belt separating Houghton and Sunderland. Site provides an attractive entrance to the city and is a well-used community asset. Most houses proposed in plan are on green belt. Brownfield sites should be developed first, including those within and on edge of city centre. Concerns about loss of wildlife and ancient parkland. Increased noise and pollution. The park has medieval ridge and furrow. The park improves health and wellbeing of residents. Concerns over impact on road network. Increased pressure on schools and health facilities. Increased parking problems around the park.</p>	<p>West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.</p>

2 3 9 4	David	Luke		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that

			<p>infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development</p>
3 9 4 2	Stephen	Luke	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that</p>

			<p>cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. 					development
9 0 2	Ian	Lumley		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; intimidation and will ruin a tranquil/peaceful area, esp. for fishing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
5 9 6	Dorothy	Lumley		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these</p>

				have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
2 1 3 5	Kirsten	Lunn	Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
2 0 9 3	Maria	Lusby	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations

				of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
6 5 3	Andrea	Lyall	<p>Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.</p>	<p>The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. 7 1 6	Michael	Lyall	<p>Opposed to the development of the Former Vaux Site. Believes that the site should be the show piece of the City Centre and not a location for offices Opposed to the proposed Housing Release Sites at Springwell, West Park and land adjacent to Herrington Country Park. With regards to West Park, objecting on the grounds that it is a beautiful gateway into the city and has archaeological value which should be preserved, the loss of green space. Questions the population figures that the housing numbers are based on. Development would put increasing pressure on existing roads and local facilities such as schools and GPs. Questions the ownership of</p>	<p>The Vaux is allocated in the Publication draft for office and residential development. The plan prioritises development on the urban core. West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report. Comments noted. Following consultation on the Draft Plan, the Council has considered all comments received and reduced the number of sites in Springwell from three to two. Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable</p>

			<p>the Park. The site should be saved in accordance with Green Belt policy and has ecological value that should be preserved. The local community is strongly opposed to the proposal. Believes that there are other brownfield sites available that should be used before this site. Questions the consultation process and whether it has been adequate. Opposed to the Travelling Showpeople sites as believes that adding more poverty and stress to services would be catastrophic and that unauthorised campsites should be dealt with by removal under law not building authorised sites.</p>	<p>and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. In regards to Springwell, the Plan seeks to limit the impact to the character of the village. The number of sites has been reduced from 3 in the village to 2. The Council has sought through its evidence to the development does not detrimentally impact the setting of the village. Through the Green Belt Review, the Council has sought to ensure that the sites identified cause the least harm to Green Belt purposes. The report recognises that gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. A tree buffer alongside the A194(M) will be retained. The Council has undertaken technical assessments to ensure any impacts of the development. The Council has prepared a Strategic Flood Risk Assessment. It identifies any flood risk across the city. In regards to Springwell, it is considered that surface water flood risk can be mitigated for. A number of public sewers cross the eastern site and would need to be considered appropriately within the scheme design. The Plan includes policies to address this concern. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. Sites will be required to retain trees and hedgerows and increase an existing woodland belt alongside the A194(M). The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The County Archaeologist requested that archaeological work was carried out on the site and an Archaeology Study and Heritage Statement have been prepared. The recommendations of which will be brought forward as part of the development. Once allocated in the Plan, the boundary for the Green Belt could not be altered until a review of the Plan and exceptional circumstances justified. Therefore the boundary for the site cannot be widened once the Plan is adopted. In regards to density levels the Plan seeks to maximise densities, however the SHMA has identified a need for larger family homes of three or more bedrooms. Therefore the density reflects the evidence. The Gypsy and Traveller and Travelling Showpeople Accommodation Assessment Update (2017) identifies the need for a total of 33 plots for Travelling Showpeople in the city over the Plan period to 2033. In order to ensure that identified needs for Travelling Showpeople are met in full, Policy H4 seeks to protect existing sites, allocate new sites to meet needs up to 2023 and identify broad locations for growth beyond 2023. The sites have been identified following a comprehensive review. The Council has sought to ensure that consultation on the Core Strategy and Development Plan is as open as possible and have gone beyond the legal requirements to ensure that the consultation was fair, transparent, proportional, effective and inclusive. The Consultation was in accordance with the legal requirements prescribed by the Town and Country Planning Regulations 2012 and the Council's Statement of Community Involvement.</p>

0				whom need to be able to park as close to the lake as possible due to age and mobility issues. The club hold many competition annually attract large numbers of people and vehicles. Club also work with young people and local scout groups.	Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
1 2 9 7	Graham	Lynn		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not be made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Council will ensure through Policy that the Bowes Railway line is not impacted. The Education Plan has been updated to assess capacity. Primary schools within Springwell Village and Usworth are within catchment distances. If neither schools have capacity at the time that the site comes forward and a contribution is required from the developer for further provision then this will be sought through a Section 106 agreement. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development
6 7 4	Alison	Lynn		Objects to Policy SA3 - site HRS11 (West Park). The site has historical ridge and furrow. Lots of wildlife live on the site. Site provides a valuable recreational resource. Concerns regarding traffic impacts. Impact on local schools. The land was left to the people of Herrington for recreation. Site improves the quality of life for Herrington residents.	West Park has been discounted as a Housing Growth Area as the impact of losing the greenspace element of the site is considered to be unacceptable as it would compound the lack of amenity greenspace provision in the area and be at odds with the recommendations set out in the Greenspace Report.
1 2	D	Lynn		Objects to proposed Housing Release Sites HRS 12 and 14. The fields that surround the park are an oasis. Adverse impact on green	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt,

1				corridor from Shiney Row to Hastings Hill. Impact on local road network, schools and doctors. Concerns over the development at Offerton destroying its peaceful setting and increased traffic on the roads.	the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. This site has been discounted following the Green Belt Review.

2 0 0 7	Peter	Lynn		Objects to Policy SA3, sites HRS1, HRS2, HRS3 and HRS4. Objects to: housing projection increase (historically over estimated); no evidence that housing proposals will reduce out migration; loss of openness of Green Belt and damage to village; will undermine separation of Springwell Village from surrounding settlements; more people in village will affect village character and affect infrastructure; exceptional circumstances argument should be made for each site separately; exceptional argument has not been made to prove that all brownfield sites have been exhausted; loss of unique village character; proposals do not address need for affordable housing or for ageing population; extra vehicular traffic negatively impacts on existing road network in village; these sites could be built out to 2,435 houses; these developments go against the principle of protecting existing durable GB boundaries; brownfield sites have not been exhausted- in 2016 there were brownfield sites accommodating 15000 houses; contests that site are shown as unviable; school capacity cannot withstand expansion; if more services are needed, does this mean more Green Belt loss?; would cause environmental pollution; would impact on setting of Bowes Railway; proposals fundamentally impact on GB purposes; release of Green Belt is disproportionate in Springwell Village and Washington; lack of understanding of local conditions and constraints.	The council has undertaken a robust assessment to determine its objectively assessed housing needs in accordance with Government guidance contained within the NPPF and PPG. The justification for the OAN figure within the Publication Plan is set out within the SHMA Addendum 2018. The Council is timetabled to submit its Core Strategy and Development Plan for examination in late 2018. Under the transitional arrangements set out within the draft NPPF, the Plan will be examined against the existing NPPF and PPG, therefore it is not appropriate to use the Government's proposed standardised methodology. The Edge Demographics modelling report (2016) indicates that the council has suffered from significant levels of outmigration over a number of years, with an average net internal outmigration of over 1,000 people per annum over the period from 2001-2014. There are a wide range of reasons why people have chosen to leave the city. However, evidence from the household survey undertaken as part of the SHMA indicates that the main reasons why households planned to move out of Sunderland were to move to a better neighbourhood or more pleasant area, to be closer to work/new job, to move to a larger property and wanting to buy a new home. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The SHLAA has been further reviewed and scrutinised following the Draft Plan consultation. The Council through the Green Belt Review has sought to cause the least harm to the Green Belt. The gap to the west of Springwell Village will be narrowed very slightly in relation to Eighton Banks but not towards the wider Gateshead area. The gap to the east is already compromised at Peareth Hall Road, so the corridor is viewed as incomplete. A tree buffer alongside the A194(M) will be retained. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The publication draft includes policies to ensure that any potential impacts are mitigated. The Policy in accordance with Councils evidence base is expected the development to include family home (3+ beds) 15% to be affordable housing. The Council has reviewed the capacity of the site following consultation on the Draft Plan. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these

3 9 6 1	Matthew	Lyons		Objects to proposed gypsy and traveller site at Hendon. Hendon ward has had fair share of bad neighbour uses. Specific concerns include, impact of neighbouring port, sewage treatment site and waste treatment site. Area already has problematic hostels creating	Hendon has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.

				sense of fear and trepidation for residents.	
2031	Cathy	Lysaght		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The Infrastructure Delivery Plan sets out the additional services/infrastructure that would be required for each development.
718	K	Lyttle		Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that it is contrary to policies E6, E7, E11, E12, E13 and E15 and other policies in Chapters 4, 5 and 6 of the Core Strategy and would like to know why the site was assessed as unsuitable for development in Stage 1 of the Green Belt Review but is still be put forward for development. Believes that the site is integral to the Green Infrastructure/Wildlife Corridor which forms a green lung in the centre of the City, would adversely intrude into a well-defined Green Belt boundary, would dominate the hamlet of North Hylton, be isolated from amenities and facilities, would require extensive new infrastructure for access and adversely impact on the strategic views. Questions if it is appropriate to build houses so close to the A19/A1231 due to noise and air pollution and if the required buffer zones and green spaces are provided is it possible to provide 135 dwellings on the site.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The council considers that there are exceptional circumstances which warrant an amendment to the Green Belt boundary. Details are set out within the council's Exceptional Circumstances paper. The plan encourages and prioritises the use of brownfield land. Approximately 43% of the housing supply identified in the SHLAA is on brownfield land. Historically within the city new homes have predominately been built on brownfield sites. In fact 90% of recent housing development has been on brownfield land, however we are running out of viable sites. The Council has published a Brownfield register and will allocate sites in the Allocations and Designations Plan. The site was identified following the comprehensive Green Belt boundary review. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. Concerns have been raised regarding the noise that would be generated from the site. The noise that would be generated during the construction of the site would be temporary and hours of work can be controlled by condition on the planning application. Once complete the development is not expected to generate any more noise than the residential dwellings that already exist. The Education Plan has been updated to assess capacity. A contribution will be required from the developer which will be sought through a Section 106 agreement. There is scope in the locality to create a new school. Access to doctors surgeries is an ongoing national problem and further advice from NHS will be sought. Another concern raised regarding this site was the impact that the development would have on the character of the area With regards to flora and fauna on the site, a Phase 1 Habitat survey has been carried out which identifies what is actually present on the site. The findings and recommendations of this survey will be taken into consideration at the Planning Application Stage but have informed the Site frameworks.
615	James	Macbeth		Objects to Policy SA3 site HRS12 (Penshaw). Specific objections relate to: Green Belt encroachment; effect on villages identities; impact on wildlife; plenty of brownfield sites elsewhere that should be used; strain on local schools, GP Surgeries, sewerage; traffic impact/congestion, pollution.	Comments noted. The council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. 3069	Barry	MacDonald		Opposes travelling community transit/stopover site at Stephenson Lake Car Park (Hetton Lyons Ponds), Hetton Lyons Country Park. Considers it would be detrimental to the Park's use and enjoyment for local community and national sporting events which contribute to economic prosperity; would affect the Parks' Green Flag status; and negatively affect local people's health and wellbeing.	Hetton Lyons has not been identified in the Publication Draft of the Plan as a stopover site. Following further consideration of the evidence base and the representations that have been made during the consultation of the Draft Plan it has been decided not to designate a new stop over site to accommodate Gypsies and Travellers. The Council has adopted a tolerance policy.
4502	Doris	MacKnight	Sunderland City Council	Opposed to the proposed Housing Release Site at Ferryboat Lane on the grounds that if other developments are to go ahead including this there will be no area of environmental value between Washington and the coast. Would like to see brownfield sites used before Green Belt.	Development in the existing urban areas is the priority of the Plan the council has identified sites throughout the city to accommodate approximately 90% of housing needs within the existing urban area, however there remains a shortfall. Prior to considering the Green Belt, the council undertook a Strategic Land Review and reviewed its employment land, greenspace, Settlement Breaks and open countryside to identify potential housing sites. Nevertheless, a shortfall remains and the only remaining sustainable and viable option left is to release parts of the Green Belt. The 3 stage Green Belt Review (accompanied by a Green Belt Boundary Review and Exceptional Circumstances Paper) has identified 11 Housing Growth Areas in the Green Belt which will deliver sufficient sites to provide the city with a 15 year supply. The Council has also prepared an Exceptional Circumstances Report and defined the Green Belt boundary. Since the Draft Plan was consulted on the Council has undertaken further studies to assess the site and potential impacts of development. The conclusions of these assessments are sets out in the Development Frameworks. The Publication Draft includes policies to ensure that any potential impacts are mitigated. The Council has undertaken technical assessments to ensure any impacts of the development. A Phase 1 Habitat Survey has been prepared to determine the species that are present and it is considered that suitable mitigation can be put in place. The Council has also updated the Transport Assessment for the City which has assessed the impact of the development on the road network and identified mitigation measures needed, these have been included in the IDP. At the Planning Application stage, the applicant will be required to submit a Transport Assessment for the site. The education plan has been updated, if schools in the areas do not have capacity at the time that the site comes forward and a contribution will be required from the developer for further provision then this will be sought through a Section 106 agreement. The site is classed as Grade 3b agricultural land which is defined as being of moderate quality. Therefore using this land would not be contrary to the NPPF. The land is in private ownership. A public footpath runs across the site which will have to be considered as the site comes forward. However, other cycle and walking routes associated with the River Wear corridor lie to the south of the site and are not affected. The site is affected by surface water flooding and the initial scheme design has considered how this can be treated through the use of greenspace and SUDS. The final site design will fully address flood mitigation needs and adhere to CSDP policy.
